## PREFACE

The Asian Women Mathematicians Forum is initiated on July 30, 2016, at the 7<sup>th</sup> Asian Mathematical Conference (AMC), Nusa Dua Bali, Indonesia. After that, the event is continued on July 30, 2019, and the event name has established as the First Southeast Asian Women Mathematicians Meeting (SEAWM<sup>2</sup>). This event is in line with the 8<sup>th</sup> Southeast Asian Mathematical Society-Universitas Gadjah Mada (SEAMS –UGM) International Conference on Mathematics, Yogyakarta, Indonesia. Since then, the meeting is intended to be held regularly. In 2020, the 2<sup>nd</sup> SEAWM<sup>2</sup> is planned to be organized in line with AMC 2020 in Vietnam. Unfortunately, the AMC is canceled due to the pandemic Covid-19. However, the 2<sup>nd</sup> SEAWM<sup>2</sup> is still going online on July 10<sup>th</sup>, 2021 and hosting collaboration by Southeast Asian Mathematical Society (SEAMS), the Indonesian Mathematical Society (IndoMS), Department of Mathematics Universitas Padjadjaran, Department of Mathematics Universitas Indonesia, and Committee for Women in Mathematics International Mathematical Union (CWM IMU) for Indonesia. All of these meeting are supported by the CWM IMU (<https://www.mathunion.org/cwm>).

The 2<sup>nd</sup> SEAWM<sup>2</sup> is a realization of the participation of women mathematicians in developing mathematics and applications in various fields as well as the role of mathematics in human development in Southeast Asia. The forum also shares best practices as well as research experiences done by women mathematicians in Southeast Asia from both developed and developing countries. The Second SEAWM<sup>2</sup> 2021 meeting's objective is to continue establishing a network of women mathematicians in Southeast Asia to support activities of the Asian-Oceanian Women in Mathematics (AOWM) which is discussed in the First Asian-Oceanian CWM Ambassador Meeting on 25-26 June 2021. The grant from CWM IMU is used to publish a book "Southeast Asian Women Mathematicians CV Collection 2021". The book is a collection of short curriculum vitae of women mathematicians in the Southeast Asian countries or ASEAN to highlight their contributions not only at the academic level (locally and internationally) but also their social services outreach.

The success of this event is supported from various parties, and we are very grateful for the support from Prof. Dr. Marie-Francoise Roy (the Chair of CWM IMU), Prof. Dr. Neela Nataraj (The CWM IMU Member), Prof. Dr. Motoko Kotani (The CWM IMU Member and the Committee of Asian-Oceanian Women in Mathematics), Prof. Dr. Maslina Darus (The President Southeast Asian Mathematical Society 2020-2021), Prof. Emeritus Dr. Polly Sy (Philippines), Prof. Emeritus Wanida Hemakul, MS (Thailand), Prof. Dr. Berinderjeet Kaur (Singapore), Prof. Dr. Dato Noraini Idris (Malaysia, the President STEM Malaysia), Prof. Dr. Indah Emilia Wijayanti (Indonesia, the President of IndoMS) as the speakers in the 2<sup>nd</sup> SEAWM<sup>2</sup> 2021.

We also grateful with the support from Prof. Dr. Schehrazad Selmane (North Africa Vice President African Women in Mathematics Association), The president of the mathematical society in ASEAN countries, Dean of Faculty of Mathematics and Natural Sciences - Universitas Indonesia, Dean of Faculty of Mathematics and Natural Sciences - Universitas Padjadjaran, a Head of Department of Mathematics Universitas Indonesia, a Head of Department of Mathematics Universitas Padjadjaran, Assoc. Prof. Yanhui Wang and Assoc. Prof. Chunmei Gong from China, Guest participant from Bangladesh, India, Iraq, Kazakhstan, Nepal, Oman, and Taiwan, all excellent mathematician women in ASEAN who sending their curriculum vitae, the Organizing Committee, Publisher Unpad Press and all of the participants for attending the meeting.

**Report from the Coordinator of 2<sup>nd</sup> Southeast Asian Women  
Mathematicians Meeting (SEAWM<sup>2</sup>)**

The Second Southeast Asian Women Mathematicians Meeting (SEAWM<sup>2</sup>) is a meeting of women mathematicians from 10 ASEAN countries and is attended by participants from various countries in Asia and Oceania region. This meeting was funded by the Committee in Women for Mathematics International Mathematical Union (CWM IMU) and received a grant of Euro 1,690. The meeting was attended by participants from 19 countries: Bangladesh, Brunei Darussalam, Cambodia, China, India, Indonesia, Iraq, Japan, Kazakhstan, Laos, Malaysia, Myanmar, Nepal, Oman, Philippines, Singapore, Thailand, Taiwan, and Vietnam. There were 391 participants, with 352 female participants, and 39 male participants. The recapitulation of participants consisted of academics with academic qualifications of 240 doctorates, 147 masters and 2 undergraduates, including 43 professors with 23 research interest.

The event was officially opened by The Presidents of SEAMS (Southeast Asian Mathematical Society) 2020-2021, Prof. Dr. Maslina Darus from Universiti Kebangsaan Malaysia, and continued with a presentation from the Member of CWM IMU Prof. Neela Nataraj from IIT Bombay–Monash Research Academy India. The Sharing Experiences of Women Mathematicians in ASEAN Countries and Asian-Oceanian Women in Mathematics session, moderated by Dr. Kiki Ariyanti Sugeng from the Department of Mathematics, Universitas Indonesia. This event presented speakers Prof. Dr. Motoko Kotani (a Committee of Asian-Oceanian Women in Mathematics/AOWM from Tohoku University Japan), Prof. Em. Dr. Polly Sy (Philippines), Prof. Em. Wanida Hemakul, MS (Chulalongkorn University Thailand), Prof. Dr. Berinderjeet Kaur (Nanyang University of Singapore), Prof. Dr. Dato Noraini Idris (University of Malaysia), and Prof. Dr. Indah Emilia Wijayanti (Universitas Gadjah Mada Indonesia).

The Second SEAWM<sup>2</sup> meeting was also filled with the launch of the book "Southeast Asian Women Mathematicians CV Collection 2021". This book is a collection of curriculum vitae

of women mathematicians in Southeast Asian or ASEAN countries to show their contribution not only in the academic (local and international) but also in the community service activities and social services in professional organizations in the field of mathematics, that have been carried out both at the national level as well as in the international level.

In this CV collection, 128 CVs of women mathematicians from 11 countries were collected. The book published by the Unpad Press Universitas Padjadjaran. This book was officially launched by Prof. Dr. Maslina Darus (Universiti Kebangsaan Malaysia) as President of SEAMS 2020-2021. The 558-pages book collection of women mathematicians' CVs, with ISBN: 978-623-352-018-8, arranged by country in ASEAN and supported by CV data from 2 participants from China is presented in the following table.

Table 1. Collection CV of Women Mathematicians at ASEAN Countries in the SEAWM<sup>2</sup>

Country	Number of CV
Brunei Darussalam	2
Cambodia	2
Indonesia	36
Laos	1
Malaysia	17
Myanmar	1
Philippines	12
Singapore	1
Thailand	39
Vietnam	15
China	2
<b>TOTAL</b>	<b>128</b>

The committee would like to thank all those who have supported this activity and apologize for any limitations in its implementation during the Covid-19 pandemic that occurred throughout the world. Hopefully, the SEAWM<sup>2</sup> activity provides an opportunity for researchers and students to discuss and collaborate between institutions and between countries in ASEAN and the Asia-Oceania region. Stay safe and keep the spirit.

Bandung, 31 August 2021

Budi Nurani Ruchjana

Coordinator of the Second SEAWM<sup>2</sup> 2021

***Foreword from the Southeast Asian Mathematical Society (SEAMS)***

***President 2020-2021***

This book is a collection of short curriculum vitae of women mathematicians at the Southeast Asian countries or ASEAN per say. It is intended to highlight their contributions not only at the academic level (locally and internationally) but also their social services outreach. The book contains about 128 CV collections and I am sure this may not be the first or the last of such collections. We hope that there will be more edition in the future so that more collection can be done. This book serves as the *Who's Who's* of women mathematicians for the Southeast Asian region. It is our vision and hope to establish stronger collaborations among the women mathematicians towards similar research interest or multidiscipline area of studies. This book is to honour women mathematicians who have contributed significantly throughout their careers and those who will continue to contribute in the years to come.

Efforts to publish this collection have received encouragement from several parties who support SEAMS activities. Thus on behalf of SEAMS, we would like to express our gratitude to the Indonesian Mathematical Society (IndoMS), Department of Mathematics, Universitas Padjadjaran, and Department of Mathematics, Universitas Indonesia for the persistent and hard work to complete this book. We also would like to thank the Committee for Women in Mathematics International Mathematical Union (CWM IMU) for funding such event and finally the collection of the biodata. Our gratitude also goes to Professor Dr. Budi Nurani Ruchjana, the Indonesia Ambassador of CWM IMU for Indonesia and her team for their help and support. Thank you to all women mathematicians who has contributed their CV to materialise this book.

Prof. Dr. Maslina Darus  
President,  
Southeast Asian Mathematical Society  
(SEAMS)  
2020-2021

***Foreword from the Committee for Women in Mathematics  
International Mathematical Union (CWM IMU) Member***

As a representative of The Committee for Women in Mathematics International Mathematical Union (CWM IMU), I am delighted to participate at the Second Southeast Asian Women Mathematicians Meeting (SEAWM<sup>2</sup>) held online on 10 July 2021. The Second SEAWM<sup>2</sup> activity is one of the supported activities of IMU CWM in the year 2020. This activity was proposed by the Southeast Asian Mathematical Society (SEAMS) in collaboration with the Indonesian Mathematical Society (IndoMS), Department of Mathematics Universitas Padjadjaran, Department of Mathematics Universitas Indonesia and the CWM IMU Ambassador for Indonesia.

This activity was originally planned as a part of the 8<sup>th</sup> Asian Mathematical Conference (AMC) in Vietnam in July 2020. However, due to the Covid-19 pandemic, the schedule for the 8<sup>th</sup> AMC was changed to 2021, and finally the 8<sup>th</sup> AMC was canceled. However, the second SEAWM<sup>2</sup> activity has been conducted very successfully in online mode. A support of 1,690 Euros from IWU CWM has been utilized for this.

The aims of second SEAWM<sup>2</sup> activity-to build a communication forum for women mathematicians in ASEAN countries and to support the Asian-Oceanian Women in Mathematics, held online from 25-26 June 2021 have been successfully fulfilled. In addition, this activity has published a book entitled “The Southeast Asian Women Mathematicians CV Collection 2021” which contains a short curriculum vitae in education, research and community service activities both at the national and international levels. We hope that this activity can be organized continuously and the book can also be updated with complete data of women mathematicians from all ASEAN countries and can be extended to the Asia-Oceania region.

Prof. Dr. Neela Nataraj

CWM IMU Member

**CURRICULUM VITAE WOMEN MATHEMATICIAN  
COUNTRY : BRUNEI DARUSSALAM**

## CURRICULUM VITAE

### WOMEN MATHEMATICIAN AT ASEAN COUNTRIES

#### COUNTRY: BRUNEI DARUSSALAM

Name : Dr Masitah Shahrill  
Affiliation : Sultan Hassanal Bolkia Institute of Education,  
Universiti Brunei Darussalam  
Office Address : Jalan Tungku Link, Gadong, BE1410, Brunei  
Darussalam  
e-mail : masitah.shahrill@ubd.edu.bn;  
masitah.shahrill@gmail.com  
Phone/WA : +6738783800  
Field-1 : Mathematics Education  
Field-2 : Teacher Education

ID Orcid : orcid.org/0000-0002-9395-0798  
ID Google Scholar : o1LhSSYAAAAJ  
*h*- index Scopus : 14

#### Short Biography

Dr Masitah Shahrill is a Senior Assistant Professor and Teacher Educator at the Sultan Hassanal Bolkia Institute of Education (SHBIE), Universiti Brunei Darussalam (UBD). She obtained her BSc (Hons) and MSc in Pure and Applied Mathematics from University of Northumbria at Newcastle and University of Reading in the UK, respectively. She joined UBD as a lecturer in August 2001 and later pursued her graduate studies (MEd and DEd) in Mathematics Education at the University of Melbourne, Australia. Dr Masitah was appointed as Senior Lecturer in August 2013, and as Senior Assistant Professor in October 2017.

Dr Shahrill has held several administrative appointments, for SHBIE as the Academic Group Convenor for Mathematics Education (March 2009 to December 2010), Programme Leader for Initial Teacher Preparation (January

2011 to June 2014), and Deputy Dean (Academic) (August 2014 to February 2015 and January to June 2018). Meanwhile for the Office of Assistant Vice Chancellor (Academic Affairs), UBD, she has served as the Director of Studies (February 2015 to June 2017 and July 2018 to June 2020), and the Head of Teaching and Learning Centre (July 2016 to July 2017).

### Research and Publication

Dr Masitah Shahrill is passionate about raising the quality of teaching and learning of students and their development in the schools and in the higher education settings. She has supervised and is currently supervising several graduate students (Master and PhD) of SHBIE, and collaborated with almost all for international journal publications and presentations at international conferences.

Dr Shahrill's research interests are in teacher education, mathematics education, higher education, teaching and learning, assessment, classroom research, and youth practices and their education. The details of her publications can be found from the links below:

- <https://expert.ubd.edu.bn/masitah.shahrill>
- <https://scholar.google.com/citations?user=o1LhSSYAAA&hl=en>
- <https://www.scopus.com/authid/detail.uri?authorId=55873798300>
- [https://www.researchgate.net/profile/Masitah\\_Shahrill](https://www.researchgate.net/profile/Masitah_Shahrill)
- <https://publons.com/researcher/3843075/masitah-shahrill/> <https://orcid.org/0000-0002-9395-0798>

To date, Dr Masitah Shahrill has published more than 130 articles in international journals and conference proceedings, of which more than 90 are indexed by Scopus, and presented about 160 papers at international conferences (in-person and online), as sole author as well as in collaboration with academic colleagues and graduate students.

She is currently the Editor in Chief for the Southeast Asian Mathematics Education Journal published by the SEAMEO Regional Centre for QITEP in Mathematics, Yogyakarta, Indonesia.

*h*- index Scopus : 4

#### Short Biography

Maureen Chong Siew Fang is a senior education officer at Department of Educators Management, Ministry of Education, Brunei Darussalam. She was born in Brunei Darussalam on 20<sup>th</sup> November 1976. She graduated in Ph.D. in Education from Universiti Brunei Darussalam on 2017. Her doctorate thesis title was Integrating a Local Mathematics Framework in Developing Students' Competency in Problem Solving in Brunei Darussalam. Her research interest includes mathematical problem-solving skills and designing of non-routine mathematical tasks for primary, secondary and pre-university students. In her free time, she continues to learn new knowledge and skills by attending courses in mathematics education. Recently, in June 2021, she completed 20 online lessons on Teaching Mathematics to Develop Mathematical Thinking as Higher Order Thinking: How do you teach? Why? by the SEAMEO network in conjunction with Center for Research on International Cooperation in Educational Development (CRICED) and University of Tsukuba.

In 2016, she joined Brunei Darussalam Teacher Academy (BDTA) as Lead Mathematics Facilitator in developing and conducting professional development courses for mathematics teachers. From 2016 to 2018, she has trained more than 500 mathematics teachers in two main courses

entitled mathematical problem-solving skills and developing higher order thinking skills in mathematics. In 2017, she was trained as Lead Trainer in co-delivering the Literacy and Numeracy Coaching Programme courses to approximately 160 English Language and Mathematics teachers.

Later in 2018, she got promoted as Senior Education Officer to lead the Database Management Unit under Human Resource Development Division in Ministry of Education. Under her leadership, the Database Management Unit managed to create a basic human resource management system.

In 2019, she was assigned to lead the newly established unit called Specialist Unit in Department of Educators Management, Ministry of Education. The role of the Specialist Unit is to develop a systematic and cohesive progression plan in ensuring rigorous diverse career pathway for Education Specialists. This is in line to support the Ministry of Education in the development of competent Education Specialists in various specialisation areas as proactive leaders in their expertise to lead and manage changes in education trends.

On 23<sup>rd</sup> and 24<sup>th</sup> June 2021, the Specialist Unit hold the inaugural Education Specialists Seminar 2021 with the Honourable Minister of Education as the Guest of Honour. Under Maureen's leadership, with 60 working committee, together they invited about 420 guests comprising of Deputy Minister of Education, Vice Chancellors, Rector, Director General of Education, Directors, senior officers, senior teachers and educators for the seminar.

1. Joining the Walailak Computational Science Summer School 2016 (WUCSS 2016), from the 4th to 5th April 2016 at the Large Scale Simulation Research Laboratory, National Electronics and Computer Technology Center, Bangkok, Thailand.
2. Joined the Summer School on Applied Mathematics and Science for Scientific Computing, the Philippines October 3rd-7th 2016 organized by the Interdisciplinary Center for Scientific Computing (IWR), Heidelberg University, Germany and Ateneo de Manila, Manila, The Philippines. [SEP]
3. Joined the 9th International Conference on Science and Mathematics Education in Developing Countries on November, 4-6th, 2016 at Mandalay University, Mandalay, Myanmar. [SEP]

4. Joined the 1st Angkor International Conference on Applied Mathematics and Statistics (AICAMS- 2016) on December, 8-10th, 2016 at Angkor Paradise Hotel,
5. Siem Reap, Cambodia. <sup>[SEP]</sup>
6. Joined the International Conference in Mathematics and Applications(ICMA-2016) on December, 17-19th, 2016 at Royal River Hotel, Bangkok, Thailand.
7. Joined the Bangkok Summer School on Applied Mathematics & Computational Science, March 20-24, 2017, organized by Chulalongkorn University and the Interdisciplinary Center for Scientific Computing (IWR), Heidelberg University.
8. Joined the training program on Statistical Methodology and Data Processing in the Republic of Korea, April 2-19, 2017.
9. Joined the world meeting for women in Mathematics and the International Congress in Mathematics (ICM) at Rio de Janeiro, Brazil, 31 July to 9 August, 2018.
10. Joined the 11th ICMMEDC at National University of Laos, 1-4 November, 2018
11. The 2nd Angkor International Conference on Applied Mathematics and Statistics at Siem Reap, Cambodia, 19-21 November 2018.
12. Visited the International Science Programme and participated in the staff week of Uppsala University May 13-27, 2019.
13. Joined the 12th ICMMEDC at National University of Laos, October 20-November 3, 2019.

**Short Biography**

Sri Wahyuni is Professor of Mathematics / Algebra at Department of Mathematics, Faculty of Mathematics and Natura Sciences, Universitas Gadjah Mada, Indonesia since 2003. She was born in Banyumas on June 19, 1959. She got a Ph.D. degree in Mathematics at The University of Graz, Austria University of Graz, Graz, Austria ( <https://www.uni-graz.at/en/#> ) in the year 1996 with the Ph.D. Dissertation entitled On Similarity of Matrices over Principal Ideal Domains. She now focuses on research and research supervision on the area of Algebra especially on The Ring and Module and Related topic. She also has an interest on teaching learning algebra ( algebraic structure and linear algebra). Professor Sri Wahyuni has been awarded some research grant since 2007 from the Ministry of Research and the Higher Education Republic of Indonesia, and research grant of university level. She is also an external examiner of Ph.D. defense at some universities in Indonesia.

Professor Sri Wahyuni also has experiences in the university management as the Chair of The Department Mathematics for 2 (two) periods, and as the vice deans of the faculty of mathematics and natural sciences for 2 (two) periods. Now she is the chair of the Master Program in Mathematics University Gadjah Mada, and also as the Chair of Curriculum Committee of The Department of Mathematics, the faculty of mathematics and natural sciences.

For the mathematical society, Professor Sri Wahyuni was a President of the Indonesian Mathematical Society (IndoMS) in 2002-2004, and 2004-2006, A council member of the Southeast Asian Mathematical Society (SEAMS) in 2007-2019. Beside that Professor Sri Wahyuni was one of Founder of the Indonesian Algebraist Society (KPA) on 1996, continuing the activity initiated by Prof. Ahmad Arifin (ITB), Prof. Soeparno Darmawidjaya (UGM), and Prof. Drs. Setiadji (UGM). The Indonesian Algebraist Society now is the most active subsociety of the Indonesian Mathematical Society. For international level, together with Prof. Edy Tri Baskoro, and Prof. Budi Ruchyana, Prof. Sri Wahyuni promotes the participation of the Indonesian Mathematical Society to be active on IMU by initiating The Indonesian Mathematical Society to be the member IMU and participation at ICM as well as on the AMC.

Prof. Sri Wahyuni has played an active role on the accreditation board (BAN) PT as assesor, and also played a role on curriculum development especially on formulating the IndoMS recommendation of minimal program learning outcome of mathematics study program. Beside publishing her paper on the journal or proceeding, Professor Sri Wahyuni also writing a books as effort of her to promote the field of algebra in Indonesia.

**Short Biography**

Budi Nurani Ruchjana is Professor of Statistics at Department of Mathematics, Faculty of Mathematics and Natural Sciences, Universitas Padjadjaran, Indonesia since 2007. She was born in Sumedang on December 23, 1963. She got a Ph.D. degree in Mathematics and Natural Sciences Institut Teknologi Bandung in Indonesia in the year 2002 with the Ph.D. thesis entitled The Generalized Space-Time Autoregressive Model and Its Application to Oil Production Data. She now focuses on research and research supervision in Group of Stochastic Modeling including Stochastic Processes, Time Series Analysis, Spatial Analysis, Spatio Temporal Analysis, and Ethnomathematics.

Professor Ruchjana has won awards in research grant since 2002 from the Ministry of Research and the Higher Education Republic of Indonesia, from the KNAW The Netherlands from the CRDF Global USA 2014-2015, and the European Union in the scheme of H2020 for the year 2019-2022 as a coordinator from a developing country in Research Innovation and Staff Exchange Social Media

Analytics (RISE\_SMA) which Prof. Stefan Stieglitz from University Duisburg Essen as a Coordinator. She is also an external examiner of Ph.D. defense at some universities in Indonesia and the Netherlands.

Prof. Ruchjana also has experiences in the organization as a Head of the Department of Mathematics in 2002-2007, Dean of Faculty of Mathematics and Natural Sciences Universitas Padjadjaran in 2012-2016. For the mathematical society, Prof. Ruchjana was a President of the Indonesian Mathematical Society (IndoMS) in 2012-2016, A council member of the Southeast Asian Mathematical Society (SEAMS) in 2012-2016, a member of the Commission for Developing Countries International Mathematical Union (CDC IMU) in 2015-2018.

Prof. Ruchjana promotes the participation of women in STEM informally as an Ambassador of Committee Women in Mathematics International Mathematical Union (CWM IMU) for Indonesia since 2016. She is also active in Sundanese culture in the Kacapi Tembang D'Gbees group.

### Research and Publication

Professor Ruchjana's research is on the Spatio Temporal Modeling and Its Applications and also in Ethnomathematics. Her mathematical works have been published in national and international journals and books. Her list of Publications can be found at:

<https://scholar.google.co.id/citations?user=KuVIWZsAAAAJ&hl=en>

**Short Biography**

I have been started my career as a lecturer at the Department of Mathematics Universitas Gadjah Mada in 1994 and received a Deutsche Akademische Austauschdienst (DAAD) scholarship for a doctoral program in Germany. My dissertation entitled Coprime Comodules was successfully completed in 2006 at the Mathematisches Institut, Heinrich Heine University of Duesseldorf.

After that I play an active role in the development of the branch of mathematics, namely algebra, in Indonesia as the coordinator of the Indonesian Algebra Society (Komunitas Peminat Aljabar, KPA) from 2007 - 2011. Moreover, I am active in the professional organization of the Indonesian Mathematical Society (IndoMS). Currently, I have the mandate as President of IndoMS for the period 2020-2022 and also as Editor in Chief in the Journal of the Indonesian Mathematical Society (JIMS) (2019 - present).

In my institution, I am entrusted with developing an Algebra Research Group for two periods and more (2007 – 2010, 2011 – 2015, 2021) as Head of the Research Group. Meanwhile, I became Secretary of the Mathematics Department (2016 - 2020).

The commitment to developing algebra research can be seen from several research grants obtained, including from the DAAD for the Re-Invitation Program (2013) in Germany and from the Fulbright Senior Research Program (2016) for research visits to the Ohio University Center of Ring Theory and its Applications (OCRA), Athens, USA.

I was confirmed as a professor of mathematics on September 15, 2020 with an inaugural speech entitled Research and the Role of Abstract Algebra in the Development of Science in the Present and Future.

### Research and Publication

My research when I took my doctorate was about the ring and prime modules and their dualizations, namely the coprime comodules and coalgebras. After I finished my study, I have developed various primeness of (sub) modules, for example weakly prime (sub) modules, endoprime (sub) modules, endocoprime (sub) modules in some algebraic structures.

I have also developed the clean ring and module, and now dualize the notions into comodules and coalgebras. When I looked into the structures involved in my research, there was a very strong relationship between the ring and the module category of the ring. The approach I use is the concept of a generator and the generalization. A significant result is the emergence of a definition of a relative basis which is expected to accommodate modules that do not have a conventional basis.

Recently, I conduct the ring fractions and types of orders, which were then generalized to become fraction modules over ring orders.

### **Short Biography**

Professor Dr. Ratu Ilma Indra Putri, Since 2014, she has been a Professor in Mathematics Education, Faculty of Teacher Training and Education, Sriwijaya University. She was born in Palembang, South Sumatra, on August 14, 1969. In 2010, She completed the Doctoral Program at the State University of Jakarta, Educational Research and Evaluation Study Program, which researched the form of tests and Realistic Mathematics Education. Since becoming a lecturer, he has always carried out research, especially in Indonesian Realistic Mathematics Education (PMRI), Design Research, Lesson Study, PISA, TIMSS, and Ethnomathematics.

Prof. Dr. Ratu Ilma has won several research grants from Dikti since 2001, started from research by young lecturers, Competitive Grants, National Strategic Grants, and Postgraduate Grants, which explored the value of Indonesian wisdom in mathematics and about PISA and HOTS questions. He has also been sent by the government several times abroad to take part in the Postdoctoral Program at Utrecht University, the Netherlands, the European School session in Design Research at Jaen University Spain in 2013, and as a Tutor for Lesson Study for Learning Community in Tokyo, Japan in 2017. In addition, from 2004 until now, she is also active in

organizations both in the Indonesian Mathematical Society (IndoMS) and women's organizations. In 2014-2020 as Governor of the Indonesian Mathematical Society (IndoMS) South Sumatra, in 2020-2022 as Head of Curriculum Development and Learning at the International Mathematics Educators Society (IMES) Center, Since 2019 as an administrator of the Ethnomathematics Association. As a women's organizer who actively pays attention to women's development, She has been active since 2011-2021 as Vice-Chair of the Indonesian Women's Cooperation Agency of South Sumatra Province and Chair of the Indonesian Women's Graduate Association South Sumatra Province.

### Research and Publication

Prof. Dr. Ratu Ilma Indra Putri focuses research on System Lesson Study for Learning Community originally from Japan. Also, she did a lot of research on studies in Realistic Mathematics Education and Ethnomathematics. In addition, she is a designer of high-level thinking problems based on the PISA and TIMSS frameworks. As a result, she has many publications such as books and journal articles at national and international levels. Her publications are listed as follows:

Scopus: <https://www.scopus.com/authid/detail.uri?authorId=55874038900>

**Short Biography**

Pudji Astuti is Professor of Linear Algebra at Faculty of Mathematics and Natural Sciences, Institut Teknologi Bandung, Indonesia since 2010. She was born in Purwokerto, Central Java, on April 1, 1961. She got a Ph.D. degree in Engineering (Control Systems) From Faculty of Engineering, Australian National University, Canberra, Australia in 1997 with the Ph.D. thesis entitled the convergence and control of a class of hybrid dynamic systems. She now focuses on research and research supervision in Module Theory and Linear Algebra including research on structures and properties of bilinear and indefinite inner product spaces by using module theory approach.

Professor Astuti has won awards in research grant since 1997 from Institut Teknologi Bandung and from the Ministry of Research and the Higher Education Republic of Indonesia. She is also an external examiner of Ph.D. defense at some universities in Indonesia and Malaysia.

In the area of administration and organization, Prof. Astuti was a Head of the Department of Mathematics in 2002-2005, Vice Dean Academic Affair of Faculty of Mathematics and Natural Sciences, Institut Teknologi Bandung in 2006-2010, Dean of Faculty of Mathematics and Natural Sciences, Institut Teknologi Bandung in 2010, and Dean of Graduate School, Institut Teknologi Bandung in 2011-2020. Currently Prof. Astuti is the head of Algebra Research Group of Faculty of Mathematics and Natural Sciences, Institut Teknologi Bandung.

### Research and Publication

Professor Astuti's research is on invariant subspaces and their generalization in modules, bilinear and indefinite inner product spaces, and several class of modules and their application in Algebraic system theory. Her mathematical works have been published in national and international journals and proceedings.

Her list of Publications can be found at:

<https://www.scopus.com/authid/detail.uri?authorId=6602659378>

*h*- index Scopus : 5

**Short Biography**

Christiana Rini Indrati is a professor at the Department of Mathematics, Faculty of Mathematics and Natural Sciences, Universitas Gadjah Mada, Yogyakarta, Indonesia. She got her Ph.D. in mathematics in 2002 at Universitas Gadjah Mada. Her Ph.D. thesis is entitled The Henstock-Kurzweil Integral in the  $n$ Dimensional Euclidean Space. Her main research is in the theory of integral. She also has interest in functional analysis and topology. She has published many research papers in integral and its application, especially in the theory of differential equations. She is active in academic meetings by attending and presenting her papers in seminars, national and international.

Christiana Rini Indrati has also some experiences in organization. She was a secretary of the IndoMS (Indonesian Mathematical Society) in period 2002 – 2006, and she became a vice president of the IndoMS in period 2008 – 2012.

She managed the Journal of the IndoMS (JIMS) as managing editor in 2002 – 2006 and became the executive editor of JIMS in 2009 – 2017. Right now she is a member of the Scientific Board of KAMINDO (Keluarga Analisis Matematika Indonesia – A Group of Indonesian Mathematics Analysis).

At the Department of Mathematics, Universitas Gadjah Mada (UGM), she has an experience as the head of Undergraduate Study Programme in Mathematics in 2016 – 2021. Right now, she is the head of the Doctoral Study Programme in Mathematics, FMNS – UGM.

She also pays attention in Mathematics Olympiad. She is involved in the National Math Olympiad for university students as a member of Jury Team and a trainer for students who are going to the IMC (International Mathematics Olympiad). She is also a member of the Indonesian Student Research Competition Jury Team (since 2016).

### Research and Publication

Prof. Christiana Rini Indrati works on the Theory of integral and its application. She also works in optimization, including graph. Her mathematical works have been published in national and international journals and books.

The list of her publications can be found at:

<https://scholar.google.co.id/citations?user=EShn850AAAAJ&hl=en>

### **Short Biography**

Salmah is Professor of Mathematics at Department of Mathematics, Faculty of Mathematics and Natural Sciences, Universitas Gadjah Mada, Indonesia since 2016. She was born in Surakarta on June 15, 1964. She got a Ph.D. degree in Mathematics and Natural Sciences Institut Teknologi Bandung in Indonesia in the year 2006 with the Ph.D. thesis entitled Optimal Control of Descriptor Regulator System for Dynamic Game (*Kontrol Optimal Sistem Regulator Deskriptor untuk Permainan Dinamis*). She now focuses on research in Group of Applied Mathematics.

### **Research and Publication**

Professor Salmah has won awards in research grant since 2008 from the Ministry of Research and Technology, Ministry of Research and the Higher Education Republic of Indonesia, from the KNAW The Netherlands. The research including national and international collaboration with Tilburg University, Delft University, Netherland and Konkuk University, Korea.

### **Short Biography**

**Widowati** is a Professor at the Department of Mathematics, Faculty of Sciences and Mathematics, Universitas Diponegoro Semarang, Central Java, Indonesia since 2014. She was born in Kebumen on February 14, 1969. She got a Ph.D. degree in Mathematics Departement, Mathematics and Natural Sciences Faculty, Institut Teknologi Bandung, Indonesia in the year 2005 with the Ph.D. thesis entitled Model and controller order reduction for linear parameter varying system.

She now focuses on research in Group of applied mathematics including mathematical modelling, optimization, control system and biomathematics. She has published more than 46 reputable International Journals/ reputable International Proceedings/ International Journals and 6 ISBN- books. In addition, the research results also have been obtained more than 20 patents/ intellectual property rights. Prof. Widowati has won awards in research grant since 2002 from the Ministry of Research and the Higher Education Republic of Indonesia. She is also an external examiner of Ph.D. defense at some universities in Indonesia.

Prof. Widowati also has experiences in the organization as a Head of Mathematics Department Faculty Science and Mathematics, Diponegoro University (year period 2008-2011), Vice Chairman of Indonesian Mathematics Society (INDOMS) in Central Java Area

(Year Periode 2009-2015), Vice Dean for Resource of Faculty Science and Mathematics, Diponegoro University (Year Periode 2011-2015), Dean of Faculty Science and Mathematics, Diponegoro University (Year Periode 2015-2019), Dean of Faculty Science and Mathematics, Diponegoro University (Year Periode 2019-2024).

### Research and Publication

Prof. Widowati's research is on a Mathematical Modeling; Control system: theory and Its Applications and also in Biomathematics. Her mathematical works have been published in the national and international journals and books.

Her list of Publications can be found at:

<https://www.scopus.com/authid/detail.uri?authorId=8255360300>

### **Short Biography**

R. Poppy Yaniawati is a Professor of Postgraduate Mathematics Education at Universitas Pasundan. She was born in Bandung on January 21, 1968. She earned her doctoral degree in the title of her dissertation from the University of Education Indonesia in 2006, which is “Implementation of E-Learning to Develop the Mathematical Power of Pre-service Teachers. Currently, she focuses on research including e-learning, learning models, educational psychology, and ethnomathematics.

Professor Yaniawati has earned several awards as Outstanding Lecturer at the Coordinator of Private Higher Education, Region 4, West Java, in 2007, “100 Inspiring Women” Indonesia, in 2014, Lecturer with the Most Research Grants from the Ministry of National Research, Innovation Agency and Higher Education Technology (Indonesia), in 2019. She was also a Reviewer for

Research Grants from the Ministry of Research, Technology and Higher Education, Reviewer of proceedings manuscripts and Scopus indexed journals, an external examiner of doctors at several universities in Indonesia, Reviewer of Mathematics books, Publisher Gakko Tosho, Japan, and she has produced many IPR (Intellectual Property Rights) of e-learning programs.

Professor Yaniawati has various organizational experiences, namely as Chair of the Research Center for the Faculty of Teacher Training and Education, Secretary and Chair of the

Postgraduate Mathematics Education Masters at Pasundan University, Secretary-General of the Indonesian Professors Association of West Java, Deputy Chair of the Research & Publication Commission for Higher Education Service Institution, Region 4, West Java, Tridharma Trustees in several Universities in Indonesia, Deputy Chairperson of the Sundanese Student Alumni Corps, Patron of the Elmu Luhung Kasakti Diri Foundation.

### Research and Publication

Professor Yaniawati's research is on the e-Learning, learning model, educational psychology, and also in ethnomathematics. Her researches of mathematics education have been published in national and international journals.

Her list of publications can be found at:

[https://scholar.google.co.id/citations?user=\\_i8SJQkAAAAJ&hl=id](https://scholar.google.co.id/citations?user=_i8SJQkAAAAJ&hl=id)

### **Short Biography**

Hasmawati is Professor of Mathematics Combinatorics at Department of Mathematics, Faculty of Mathematics and Natural Sciences, Hasanuddin University, Indonesia since 2014. She was born in Belajen, Enrekang Regency, South Sulawesi, on December 25, 1964). She got a Ph.D degree in Mathematics and Natural Sciences, Institut Teknologi Bandung in Indonesia in the year 2007 with the Ph.D thesis intitled The Ramsey Numbers For Union of Stars. She attended primary and junior secondary education in Sudu, Alla Subdistrict, Enrekang Regency, then attended senior secondary education at SMAN 374 Enrekang and graduated in 1983. This year, the author continued his education in the S1 program, Mathematics Department, Faculty of Mathematics and Natural Sciences, Hasanuddin University until 1989.

Seven years later, on November 21, 1997, the writer married Abdul Basir MCE., MT. and they were blessed with a son named Reyhan Bashir, two daughters each named Ufairah Damara Bashir and Ilmiyyana Iffatunnafsiyah Bashir. Since joining the Doctoral Program until now, Prof. Hasmawati has been actively writing papers or articles published in national and international journals and She also has actively participated in several national and international scientific activities. Besides writing and teaching, She also active in various professional organizations such as indoMS, KPA, INACOMB, and PDRI.

### Research and Publication

Professor Hasmawati's research is on the Ramsey numbers, Labeling, dimension partition, and dimension metric . Her mathematical works have been published in national and international journals and books. Her list of Publications can be found at:

<https://scholar.google.co.id/citations?hl=id&user=Mr-kEkQAAAJ>

### **Short Biography**

Euis Eti Rohaeti is Professor of Mathematics Education at Department of Mathematics Education, Faculty of Mathematics Education and Sciences, IKIP Siliwangi, Indonesia since 1993. She was born in Sumedang on December 9, 1968. She got a Ph.D degree in Mathematics Education Universitas Pendidikan Indonesia in Indonesia in the year 2008 with the Ph.D. thesis Improving Junior High School Student's critical and CreativeThinking Skillsa Through Exploration Approach.

Professor Euis Eti Rohaeti has won awards in research grant for the year 2015, 2016, 2017 and 2020 from the Ministry of Research and the Higher Education Republic of Indonesia, from Research Agency for Development and Application of Science and Technology West Java, Indonesia, for the year 2016. In 2020 she was included in the 500 best Researchers in Indonesia.

Prof. Euis Eti Rohaeti also has experiences in the organization as a Vice Rector IKIP Siliwangi from 2013 until now, Deputy head of research and community service at IMES (Indonesian

Mathematics Education Society) from 2019 to the present, Coordinator of discipline and human resource development at KORPRI LLDIKTI IV since 2017, Expert Council at ABPPTSI and PGRI West Java from 2019 until now, Chief Editor Journal of Educational Experts (JEE) LLDIKTI IV since 2017

### Research and Publication

Professor Euis Eti Rohaeti's research is on ICT-based Innovative Mathematics Learning, Higher Order Thinking Skills, and character reinforcement. Her mathematical works have been published in national and international journals and books. Her list of Publications can be found at: <https://scholar.google.co.id/citations?user=My61ZGoAAAAJ&hl=id>

### **Short Biography**

Wamiliana is a Profesor of Operations Research at Department of Mathematics, Faculty of Mathematics and Natural Sciences, Universitas Lampung, Indonesia since 2017. She was born in Sungailiat Bangka on November 8, 1963. She got her Bachelor's degree in Mathematics from Universitas Indonesia, Master's degree from The University of Montana, USA, and Ph. D degree from Curtin University of Technology, Australia in 2004 with Ph. D thesis entitled: Combinatorial Methods for The Degree Constrained Minimum Spanning Tree Problem.

She now focuses on research and research supervision in Optimization, especially in Networks Design which use Minimum Spanning Tree (MST) as the backbone of the networks. Beside network design, she also supervised students who interested in graph theory, especially in graph enumeration. Moreover, recently she also acts as promotor for her doctoral student with research topic in steganography. Steganography is the process of hiding information, images, or audio messages inside another piece of information, image, or audio.

Profesor Wamiliana has awarded research grants from WACEIO (Western Australia Center for Excellence Industrial Optimization) in 2002; from Ministry of Research and the Higher Education Republic of Indonesia: in 2005-2006 (Pekerti Research Grant as the head/chair of TPP research team), in 2007 (Fundamental Research Grant, as the head/chair of research team), in 2016-2017 (Pekerti Research Grant, as the head/chair of TPM research team), in 2017-2018 (Competency/PBK Research Grant as the head/chair of research team), and in 2020-2021 (Master Thesis research grant (in 2020), Doctoral Thesis research grant (in 2021)). The last two research grants are for supervising graduate students in order to produce a quality thesis and also publish the results in a reputable journal. She also has appointed as external examiner for doctoral thesis from Curtin University of Technology, Australia, and University Technology MARA, Malaysia.

Prof. Wamiliana also has experiences in the organization as the Vice Dean for General Issue and Finance FMIPA Universitas Lampung in 1995 – 1997, the head/chair of Management Informatics Study Program, FMIPA Unila in 2002 – 2011, the head of Department of Mathematics, FMIPA Unila in 2017 – 2021, and Vice Governor of Indonesian Mathematics Society (IndoMS) of South Sumatera Region for 2021-2023.

Prof. Wamiliana a had designed Remuneration System for Universitas Lampung, the system which record the lecturers' performance in order to give incentive to the lecturers, and that system is used until now.

**Short Biography**

Dr. Kiki Ariyanti Sugeng is an associate professor at the Department of Mathematics, Faculty of Mathematics and Natural Sciences, Universitas Indonesia. She has worked at Universitas Indonesia since 1986. She has got her Ph.D. from the University of Ballarat (Federal Union University), Australia, in 2005 with her thesis entitle 'Magic and Antimagic Graphs'. Her main research area is combinatorics, especially in graph labeling. In her research, she has got many research grants from the Ministry of Education and Higher Education and also from Universitas Indonesia since 2006. She experienced being an external co-supervisor from the University of Newcastle, Australia, and the Faculty of Computer Science-UI in Indonesia. She also has been appointed as an external examiner for the Ph.D. program from ITB-Indonesia, University of Gunadarma-Indonesia, and TUE-Netherland. She also a reviewer from many international and national journals, such as Discrete Mathematics, Australasian

Journal of Combinatorics, AKCE, Journal of the Indonesian Mathematical Society, and many more. She is being the chief editor of the Indonesian Journal of Combinatorics since 2016 and the Managing editor of the Electronic Journal of Graph Theory and Its Application since 2013.

Apart from doing her research, she also actives in mathematics society. She was a president of the Indonesian Combinatorics Society in the period 20132017 and vice president of the Indonesian Mathematical Society in 20122016. She is appointed as a Vice President of the Institute of Combinatorics and its Application, which is an international combinatorial society based in Boca Raton, USA.

### Research and Publication

Dr. Kiki Ariyanti Sugeng primary research is in graph labelling. However, she also works on graph coloring, antiadjacency matrix, and some other topics. Her works can be found at

<https://www.scopus.com/authid/detail.uri?authorId=12797262400> and <https://scholar.google.com/citations?user=rSzgoYAAAAJ&hl=en>

### **Short Biography**

Udjianna S. Pasaribu is an associate Professor in the Statistics group of Program Study of Mathematics, FMIPA Institut Teknologi Bandung, Indonesia. She was born in Bandung on August 6<sup>th</sup> 1962. Her primary research interests are in warranty, survival model, point process analysis, multivariate analysis, and sampling technique. Her educational background includes the following: Doctoral (Biostatistics, University of Wales Swansea, The United Kingdom, 1993); Bachelor (Mathematics, ITB, 1985). Numerous papers have been published in several scientific journals, including Heliyon, International Journal of Applied Mathematics and Statistics, Journal of Information, and many international proceedings published by IEEE, AIP, IOP, etc.

In addition to producing journals every year, Udjianna is also active in collaborating with industry in the form of statistical training or as a consultant team. In the last 5 years, the cooperation was carried out with PT. Astra Agro Lestari (2015), PT Komatsu Indonesia (2016 & 2018), PT East West Seed

Indonesia (2017), and PT Reasuransi Indonesia Utama, TBK (mid 2018-mid 2019) as Person in Charge (PIC) and Indonesia Mining Institute (2017) as Leader for statistics team. Since the pandemic (2020), Udjianna and team have become the data analyst team of COVID-19 data for the Bandung City Government.

Udjianna Pasaribu also has experiences in the organization as a Leader of Statistics Group of Program Study of Mathematics in 2012-2018. For the mathematical society, she was a member of Indonesia Statistician Forum (*Forum Masyarakat Statistik-FMS*) in 2 periods (2017-2018 and 2019-2020).

As a contribution in the current pandemic conditions, he became one of ITB's COVID-19 mitigation members from June 2020 – June 2021. In addition, she has joined as one of the National Disaster Management Authority (*Badan Nasional Penanggulangan Bencana-BNPB*) behavior change experts since 2019 until now.

### Research and Publication

Udjianna Pasaribu's research is on the warranty, multivariate analysis, and actuarial scope. Her mathematical works have been published in national and international journals.

Her list of Publications can be found at:

<https://scholar.google.co.id/citations?user=caMYoj0AAAAJ&hl=id&oi=ao>

ID Google Scholar : Rinovia Simanjuntak  
*h*- index Scopus : 11

**Short Biography**

Rinovia Simanjuntak studied in Institut Teknologi Bandung, with a BSc degree in 1996 and an MSc degree in 1998. Her PhD degree in 2003 was from the University of Newcastle, Australia, under the supervision of the late Prof. Mirka Miller.

Rinovia lectured various courses in Department of Mathematics, Department of Computational Science, and Department of Informatics at Institut Teknologi Bandung. She also supervised and co-supervised bachelor and graduate students; including thirteen PhD students, ten of them have graduated. She was the Vice Chair/Executive Secretary of Centre for Mathematical Modelling and Simulation ITB (2005-2007) and Person in Charge for International Collaboration of the World Bank's Indonesia – Managing Higher Education and Research (IMHERE) ITB Project (2009-2012). She is the current chair for three master's programs in ITB: Actuarial Sciences, Computational Science, and Mathematics (Teaching). Rinovia was one of 100 Outstanding Women Researchers, chosen by the Indonesian National Committee for UNESCO and the Indonesian Ministry of Women Empowerment in 2010. In 2016,

she was awarded FMIPA Award for Excellence in Research by the Faculty of Mathematics and Natural Sciences Institut Teknologi Bandung and the IndoMS Award by the Indonesian Mathematical Society.

### Research and Publication

Rinovia's research interests include distance-related problems in graphs and applications of graph theory. In the afore-mentioned research topics, she served as Principal Investigator for 34 research grants since 2003. She has written 63 articles published in peer-reviewed journals and proceedings. Her Scopus' h-index is 11 and Google Scholar's h-index is 18. Since 2000, she has presented her research results in international conferences yearly, some of them as one of the plenary speakers. She has involved in more than 20 conferences' program and organizing committees; in six of which, she chaired the committees.

### **Short Biography**

Fatmawati is Associate Professor of Mathematics at Department of Mathematics, Faculty of Science and Technology, Universitas Airlangga, Indonesia since 2014. She was born in Situbondo on July 4, 1973. She got a Ph.D. degree in Mathematics and Natural Sciences, Institut Teknologi Bandung in Indonesia in the year 2010 with the Ph.D. thesis entitled "Model Reduction and Low-order Controller Design Strategy for Infinite-Dimensional Systems". She now focuses on research and research supervision in Optimal Control, Robust Control, Model Reduction, Mathematical Modelling, Bio-mathematics, and Fractional Model.

Dr Fatmawati has won awards in research grant since 2005 from the Ministry of Research and the Higher Education Republic of Indonesia through Penelitian Unggulan Perguruan Tinggi, Penelitian Berbasis Kompetensi, Penelitian Dasar, Penelitian Dasar Unggulan Perguruan Tinggi and International Collaboration Research from Universitas Airlangga. She is also an external examiner of Ph.D. defense at some universities in Indonesia (Institut Teknologi Bandung, Universitas Gadjah Mada, Universitas Brawijaya and Institut Teknologi Sepuluh Nopember).

Dr. Fatmawati also has experiences in the organization as a Secretary of the Department of Mathematics in 2020, Vice Dean of Faculty of Science and Technology Universitas Airlangga in

2020-2025. For the mathematical society, Dr. Fatmawati was a Regional Secretary and Vice Chair for research and development of the Indonesian Mathematical Society (IndoMS) East Java in 2016-2018 and 2018-2020, respectively.

### Research and Publication

Dr. Fatmawati's research is on Optimal Control, Robust Control, Model Reduction, Mathematical Modelling, Bio-mathematics, and Fractional Model. Her mathematical works have been published in international journals.

### **Short Biography**

Nuning Nuraini is an Associate Professor at the Mathematics Department, Faculty of Mathematics and Natural Sciences, Institut Teknologi Bandung (ITB), since 2011. She got a Ph.D. degree in Mathematics, Institut Teknologi Bandung, Indonesia in 2008. She has extensive experience in mathematical epidemiology, e.g., modeling tropical diseases such as Dengue, Zika, Chikungunya, infectious diseases such as MERS, SARS, COVID-19, the efficacy of vaccinations, and other medical interventions. She also interested in mathematical modeling in Biology. She is the Person in Charge of some research grants from ITB, Kemenristek Dikti, and other funding in mathematical modeling of infectious diseases from 2009 until now.

Dr. Nuraini is the Head of the Mathematics Undergraduate Study Program at ITB. She was the Head of the Center for Mathematical Modelling and Simulation ITB from 2012 until 2020. She is also the President of the Indonesian Bio-Mathematical Society since 2012 until now. And a member of the Society of Mathematical Biology since 2017.

She has been designated as a scientific expert by the Indonesian government for this challenge as she currently sits in the Coronavirus Disease Mitigation Acceleration Task Force for Sumedang district, ITB, North Kalimantan West Java. She also develops the early warning system of Dengue disease based on climate information with BMKG, Jakarta Province, and the Health Office. The engagement for a wider audience will naturally follow activities of Dr. Nuraini, who has been giving interviews on COVID-19 in Indonesia at various mass media, such as Reuters, The Jakarta Post, BBC, ABC, iNewsTV, KompasTV, Metro TV, TVOne, CNN, and in addition to national newspapers and local Radio.

## Research and Publication

Dr. Nuraini main research is mathematical modeling, specifically mathematical epidemiology, modeling in biomathematics, population dynamics, and related fields.

The lists of her publication can be found at

<https://scholar.google.co.id/citations?user=JWD0YN0AAAAJ&hl=en>

### **Short Biography**

Nursanti Anggriani was born in Bandung in 1973. She holds a bachelor's degree in mathematics from Universitas Padjadjaran, Bandung (1996) and a master's degree in mathematics from the Faculty of Mathematics and Natural Sciences, Institute Technology Bandung (2002). In 2009, she received a higher education grant to join the Sandwich-like program at Flinders University Adelaide Australia. She obtained a doctorate in mathematics at the Faculty of Mathematics and Natural Sciences, Universitas Padjadjaran (2011). She started her career as a teaching staff in the mathematics department of the Faculty of Mathematics and Natural Sciences, Universitas Padjadjaran since 1998. The research subject focuses on applied mathematics, mainly in the fields of biological mathematics, epidemiological mathematics, dynamic systems and optimal control.

### **Research and Publication**

Doctor Nursanti Anggriani is a researcher in the field of epidemiological mathematical modeling and system dynamics. Her mathematical works have been published in national and international journals and books.

The list of publications can be seen at:

### **Short Biography**

Novriana Sumarti is an Associate Professor at Department of Mathematics, Faculty of Mathematics and Natural Sciences, Institut Teknologi Bandung, Indonesia since 2015. Born in Cimahi on November 15, 1970, she got a bachelor and master degrees from Institut Teknologi Bandung consecutively in years 1995 and 1998, a master degree from University of Cambridge in year 2001, and a Ph.D. degree in Mathematics from Imperial College London in the year 2005. The title of her Ph.D. thesis is Numerical Methods for Solving Two- Point Boundary Value Problems: Differed Correction Schemes, Interpolation, and Conditioning Methods.

Now her research interest includes Mathematical Modelling, Optimization, Mathematical Finance and Actuarial Science. Nationally, she initiated the research of Islamic Financial Mathematics in 2007 (<http://docplayer.net/46633736-The-3-rd-international->

conference-on-mathematics-and-statistics.html), and the research of dynamical system of banking in 2013 (<https://arxiv.org/abs/1306.0468>). Currently there are two doctoral students who studying these topics. The books authored by her and her colleagues, related to these topics, are Matematika Keuangan (Financial Mathematics) 2019 and Matematika Keuangan Syariah (Shariah Financial Mathematics) 2019, which were published by ITB Press, and incoming book Model Matematika Perbankan (Mathematical Model of Banking) in 2021.

Since 2006, she has won research grants from ITB and Ministry of Research and the Higher Education, Republic of Indonesia. She had become a research visitor in University of Cambridge, UK (2012), University of Waterloo, Canada (2018), and University of Durham, UK (2019). Now her position is the Head of Actuarial Science Undergraduate Study Program, Faculty of Mathematics and Natural Sciences, Institut Teknologi Bandung since 2021.

### Research and Publication

Sumarti's research is ranging from Numerical Analysis, Optimization, Mathematical Models on Banking, Islamic Finance and Biomath, and also Acutarial Science. Her mathematical works have been published in national and international journals and books.

Her list of Publications can be found at:

[https://scholar.google.com/citations?user=3Hbp\\_ZEAAAAJ&hl=en](https://scholar.google.com/citations?user=3Hbp_ZEAAAAJ&hl=en)

**Short Biography**

Titin Siswantining is Associate Professor of Statistics at Department of Mathematics, Faculty of Mathematics and Natural Sciences, Universitas Indonesia, Indonesia since 2001. She was born in Tuban (Indonesia) on April 28, 1961. She got a Doctor degree in Department of Statistics, Mathematics and Natural Sciences Institut Pertanian Bogor (IPB University) in Indonesia in the year 2013 with the Doctor thesis entitled Geoinformatics in the case of small area and its application to detect poverty pocket in Jember. She now focuses on research and research supervision in Group of Applied Statistics in medical research, biostatistics, & bioinformatics.

Titin Siswantining also has experiences in the organization as a secretary of Head of the Department of Mathematics in 2000 - 2004. For the mathematical society, Titin Siswantining was a Secretary of President of the Indonesian Statistical Society (FORSTAT) in 2016- 2022.

## Research and Publication

### The best five recent publications in journals and/or books

Number	Year	Title	Author(s)	Journal/Publisher	Link
1	2021	A novel centroid initialization in missing value imputation towards mixed datasets	Titin Siswantining*, Taufik Anwar, Devvi Sarwinda, Herley Shaori Al-Ash	SCI-K Publishing Corporation	<a href="http://scik.org/index.php/cmbn/article/view/5344">http://scik.org/index.php/cmbn/article/view/5344</a>

### **Short Biography**

Ema Carnia is an associate Professor of Algebra at the Department of Mathematics, Faculty of Mathematics and Natural Sciences, Universitas Padjadjaran, Indonesia since 2006. She was born in Bandung on March 6, 1967. She got a Ph.D degree in Faculty of Mathematics and Natural Sciences Universitas Gadjah Mada in Indonesia in the year 2011 with the Ph.D. thesis entitled Functoriality and Isomorphism of Incidence Algebra of Partially Ordered Set (POSET). She now focuses on pure and applied Algebra.

Ema Carnia also has experiences in the organization as a head of the bachelor study program of Mathematics in 2013-2021, and now she is a Head of the Department of Mathematics since 2021. For the mathematical society, Ema Carnia was a treasury of the Indonesian Mathematical Society (IndoMS) in 2012-2016.

## Research and Publication

Ema Carnia's research is on pure and applied algebra. Her mathematical works have been published in national and international journals and books.

Her list of Publications can be found at:

**Short Biography**

Denny Riama Silaban is Associate Professor of Graph Theory and Combinatoric at Department of Mathematics, Faculty of Mathematics and Natura Sciences, Universitas Indonesia, Indonesia since 1992. She was born in Dolo Sanggul on February 5, 1968. She got a Ph.D. degree (with Summa Cum Laude predicate) in Mathematics and Natural Sciences Institut Teknologi

Bandung in Indonesia in the year 2017 with the Ph.D. thesis entitled Restricted Size Ramsey Number Involving Graph of Size Two. She now focuses on research and research supervision in Ramsey Theory in Graph, Graph Labeling, Graph Coloring, and Adjacency and Antiadjacency Matrix of Graph.

Asc. Prof. Silaban won awards in research grant since 2008 from the Ministry of Research and the Higher Education Republic of Indonesia and from Universitas Indonesia.

Asc. Prof. Silaban also has experiences in the organization as a Head of Academic Quality Assurance Unit Faculty of Mathematics and Natural Sciences Universitas Indonesia in 2017-now. For the mathematical society, Asc. Prof.

Silaban is a Secretary of the Indonesian Combinatoria Society (InaCombS) in 2017-now, Treasury of the Indonesian Combinatoria Society (InaCombS) in 2013-2017, Member of Central Board of Indonesian Mathematical Society (IndoMS) in 2016-2020.

Asc. Prof. Silaban is a Managing Editor of Electronic Journal of Graph Theory and Applications since 2016 until now.

### Research and Publication

Asc. Prof. Silaban's research is on the Ramsey Theory in Graph, Graph Labeling, Graph Coloring, and Adjacency and Antiadjacency Matrix of Graph. Her mathematical works have been published in national and international journals and books.

**Short Biography**

Suci Astutik, is the associate professor at the Statistics Department, Faculty of Mathematics and Natural Sciences, Universitas Brawijaya Malang since 2015. Previously, in 1997-1999 as a Quality Assurance staff at Marufuji Kenzai Indonesia, Ngoro Industri Persada, Mojokerto. In 1997. she graduated bachelor at the Department of Mathematics, Universitas Brawijaya in the statistics field. In 2003, she achieved master degree at the Department of Mathematics, Institut Teknologi Bandung in the Statistics and Applied mathematics field. In 2013 she achieved doctor degree at the Department of Statistics, Institut Teknologi Sepuluh Nopember with the research focus on Bayesian Spatio temporal and statistics computation.

She have also published her research in some National and International conference and journals. Her published books are Analisis Multivariat, Teori dan Aplikasinya dengan SAS (Multivariate Analysis, Theory and Its Application with SAS) in 2018 and Analisis Data Kategorik Menggunakan R, Teori Dan Aplikasinya pada Berbagai Bidang (Categorical Data Analysis Using R, Theory and Its Applications in some Fields) in 2020.

## Research and Publication

Associate Professor Astutik's research is on the Bayesian Spatio Temporal Modelling and statistics computation.

Her list of Publications can be found at:

ID Orcid : <https://orcid.org/0000-0001-7036-7877>  
ID Google Scholar : Wq3UJU8AAAAJ&hl=en  
*h*- index Scopus : 8

#### Short Biography

Ikha Magdalena is a Lecturer at Institut Teknologi Bandung. She received a Doctoral degree in Mathematics from Institut Teknologi Bandung in Indonesia in 2006. Her dissertation was titled Non-hydrostatic Model for Free Surface Waves over A Submerged Porous Breakwater, and to this day she continues to conduct research on fluid dynamics, wave models, numerical modeling, and coastal protection. Since 2017, she has been appointed as the secretary of The Center for Coastal and Matine Development of ITB.

Her research has been published in Applied Mathematics and Computation Journal (Q1), and other reputable mathematics and engineering Journals. Since the beginning of her career as a researcher, she has been awarded numerous grants from the Indonesian Ministry of Research, Technology, and Higher Education as well as from Institut Teknologi Bandung. She received an Award in Industrial and Academia Partnership from Royal Academy of Engineering, the Individual Researcher Links Award from the British Council and a grant from the Newton Fund. She is also

the creator of Wave Interaction with Vegetation, a copyrighted fluid modeling software, and she actively manages ITB's Research Center for Coastal and Ocean.

She believes in the power of collaboration in research, and works on research problems with colleagues from Indonesia, the UK, the Philippines, China, India and the Netherlands. Aside from joint projects, she maintains active participation in mathematical societies. Since 2014, she has been heavily involved in the management of the Indonesian Mathematical Society (IndoMS) and now serves as its Coordinator of International Collaborations. She is a steering committee of the Silkroad Mathematics Center and the Executive Committee of the Society for Industrial and Applied Mathematics (SIAM). She is the faculty advisor of SIAM Student Chapter ITB.

She works with industry partners to bring the benefits of mathematical research to communities around her. Her work with Witteveen+Bos in Demak, involving the application of her research on mangroves, helps protect communities living along the coastline from wave damage. The UK Embassy in Indonesia and the British Council annually acknowledge the impact of her work in the publication Women In Engineering Days News.

### Research and Publication

Dr Magdalena has an established national reputation and burgeoning international track record in analytical and computational work on fluid and wave phenomena. This is evidenced by several papers published in highly impactful and reputable journals, where some papers are in Q1 Scopus indexed journals.

Additionally, her impact to the society is also recognized by the British Council during the International Women in Engineering Day (<https://mobile.twitter.com/UKinIndonesia/status/1275395933937627136>) and Women in Science day ([https://www.instagram.com/p/CLlw9pKLWFn/?utm\\_medium=copy\\_link](https://www.instagram.com/p/CLlw9pKLWFn/?utm_medium=copy_link))

Her list of Publications can be found at:

**Short Biography**

Herlina Napitupulu is a lecturer at Department of Mathematics, Faculty of Mathematics and Natura Sciences, Universitas Padjadjaran, Indonesia since 2018. She was born in Balikpapan on April 8, 1988. She got a bachelor degree in mathematics in the year 2011, Master of Science in Faculty of Science and Technology, Universiti Malaysia Terengganu in 2013, and Ph.D. in the same university in School of Informatics and Applied Mathematics in 2017. Her research interest and supervision are in the field of Optimization, Computational Mathematics, and Graph Theory and its Applications.

## Research and Publication

Napitupulu's research is on Global Optimization (Filled Function and Genetics Algorithm method), Computational Mathematics, and Graph Theory and its applications (Centrality Measures and Graph Coloring). Her mathematical works and publications can be found at: <https://scholar.google.co.id/citations?user=8YbKgv8AAAAAJ&hl=en>

### Short Biography

Ani Budi Astuti, was born in Kediri Regency, East Java to a late father who had a job as a trader and a mother who was also a trader who was very supportive of the education of her children. The author is blessed with a daughter who really gives great support and spirit to the author. The author is a Lecturer at the Statistics Study Program, Mathematics Department, Faculty of Mathematics and Natural Sciences, Brawijaya University Malang since 1992 and since 2018, the Statistics Study Program has the status of a Statistics Department. In 1991, the author obtained the title of Dra. in the Department of Mathematics, Universitas Brawijaya in the field of Statistics. In 1997, the author earned his M.Sc. at the Department of Statistics, Bogor Agricultural University in the field of Applied Statistics. In 2017, the author achieved the title of Dr. in the Department of Statistics, Sepuluh Nopember Institute of Technology Surabaya with a specialization Bayesian Mixture Averaging Model on the application of Microarray Data cases. Some of the subjects taught by the author include: Categorical Data Analysis (S1 and S2), Advanced Categorical Data Analysis, Introduction to Opportunity Science, Quality Control Statistics, Statistical Methods I, Mathematics I, Biostatistics, Introduction to Life Sciences, Basic Statistics, Bayesian Analysis, and Demographics. The author is active in various research activities published in international and national seminars, as well as international

journals. The author is also active in community service activities, one of which is the Serving Doctoral Program in 2018 and 2021. The work of Categorical Data Analysis Books, applications in various fields with R has been written in 2020. The author can be contacted via Email address: ani\_budi@ub.ac .id.

### Research and Publication

The research and publications that I have done as lead researcher for the last 6 years are research in the field of Biostatistics and Bayesian Statistical Modeling in the health. Various research topics are presented in the followin:

No	Year	Title
1	2021	Development of Bayesian Mixture of Mixture Modeling for Mapping Diabetes Mellitus Regions in Malang City, East Java
2	2021	Development of Spatial Hidden Markov Bayesian Approach Model for Daily Rainfall Prediction in East Java (Member)
3	2021	Bayesian Calibration of Monte Carlo Averaging Markov Chain Model on ARIMA Modeling for Covid-19 Cases in East Java Region
4	2020	SELECTION OF SPATIAL WEIGHTING MATRIX ON THE BEST LINEAR UNBIASED PREDICTION SPATIAL MODEL (SEBLUP) (Study of Per Capita Expenditure in Bali Province) (Member)
5	2019	Bayesian Modeling of Diabetes Mellitus Patients in Malang City: A Review of Various Distribution Approaches
6	2018	Continuous Ranked Probability Score (CRPS) Algorithm in Bayesian Mixture Modeling for Microarray Data in Indonesia
7	2016	Modeling Blood Sugar Levels in Diabetes Mellitus Patients Through the Development of the Bayesian Mixture Model Averaging Algorithm (Year II)
8	2015	Modeling Blood Sugar Levels in Diabetes Mellitus Patients Through the Development of the Bayesian Mixture Model Averaging Algorithm (Year I)

### **Short Biography**

Kristiana Wijaya is a lecturer of Mathematics at the Department of Mathematics, Faculty of Mathematics and Natural Sciences, Universitas Jember, Indonesia since 2000. She was born in Surabaya on August 13, 1974. She got a Ph.D. degree in Mathematics and Natural Sciences Institut Teknologi Bandung in Indonesia in the year 2017 with the Ph.D. thesis entitled Ramsey Minimal Graphs. She now focuses on research and research supervision in Graph Theory.

Since 2018, Kristiana Wijaya becomes chair of the Research Group of Graph, Combinatorics, and Algebra. She has around 19 publications. She has experience in the organization as a treasurer of the Indonesian Combinatorial Society in 2017 – Now. She is also active as an editorial team in several Mathematical Journals. Since 2018, Kristiana Wijaya becomes chair of the Research Group of Graph, Combinatorics, and Algebra. She has around 19 publications. *h*- index Scopus : 1

**Short Biography**

Since 1989, Dumaria Rulina Tampubolon is a fulltime faculty member of the Faculty of Mathematics and Natural Sciences at Institut Teknologi Bandung, Indonesia. She obtained her Doctor of Philosophy degree in Actuarial Studies from Macquarie University, Sydney, Australia, in 2008; her Master of Science degree in Mathematics, majoring in Statistics, from Monash University, Melbourne, Australia, in 1997; and her *Sarjana* degree in Mathematics from Institut Teknologi Bandung, Indonesia, in 1988.

Dr. Tampubolon's main research interests are in General (Non-Life) Insurance, such as: topics in earthquake insurance; the estimation of the outstanding claims liability for a long tail general insurance business; and the application of generalized linear models in determining the pure premium of automobile insurance and of health insurance.

Dr. Tampubolon is a Co-recipient, with Prof. Gary G. Venter, of the “2010 Variance Prize” for the paper “Robustifying Reserving” (*Variance* 4:2). The Variance Editorial Board awards the Variance Prize for the best paper published in each volume year of the journal.

From 2011 to 2019, Dr. Tampubolon was an actuarial consultant at PT Reasuransi MAIPARK Indonesia; in particular, for actuarial problems relating to earthquake insurance. From 2014 to 2019, Dr. Tampubolon was an Independent Commissioner at PT Asuransi AXA Indonesia (PT AXA General Insurance); and from September 2020 to present, Dr. Tampubolon is an Independent Commissioner at PT AXA Financial Indonesia. Since 2015 to present, she is also “Certified in Risk Governance Professional” awarded by the *Lembaga Sertifikasi Profesi Manajemen Risiko*, International Accreditation Organization and *Badan Nasional Sertifikasi Profesi*. Dr. Tampubolon speaks in conferences, seminars, and workshops as a keynote or guest speaker relating to general insurance and earthquake insurance. One of such events was giving an “*Orasi Ilmiah*” (scientific speech) at the 2010 graduation of “Asosiasi Ahli Manajemen Asuransi Indonesia”.

During the period of 2009 to 2012, Dr. Tampubolon was the Head of the ITB Research Team, in cooperation with *Biro Perasuransian, BAPEPAM-LK*, Indonesia Ministry of Finance and with the Society of Actuaries of Indonesia, in the “*Ratemaking for Automobile Insurance in Indonesia*” Project. From 2012 to 2015, Dr. Tampubolon was invited by the Faculty of Science and Technology, Prince of Songkla University Pattani Campus, Thailand, as a chairman and/or discussant at the Postgraduate Students Seminars of the Research Methodology Program. In the 1999 Indonesia General Election, Dr. Tampubolon was the Head of the Parallel Vote Tabulation (PVT) Program for the 1999 Indonesian General Election Monitoring, a cooperation between *Forum Rektor Indonesia* and the National Democratic Institute (the Carter Centre), USA. The 1999 PVT program was the first and the largest (covered all 27 provinces in Indonesia at that time, from Aceh to Papua) of such similar programs nowadays in Indonesia called the “*Quick Count*”.

From November 2013 to February 2021, Dr. Tampubolon was a Person in Charge at the Faculty of Mathematics and Natural Sciences, Institut Teknologi Bandung, for the establishment and the implementation of the READI (Risk Management, Economic Sustainability, and Actuarial Science Development in Indonesia) Project; a cooperation between University of Waterloo, Canada, and 8 (eight) Universities in Indonesia, funded by the Canadian Government, Manulife Indonesia, and Sunlife Indonesia. Dr. Tampubolon worked closely with colleagues from the Actuarial Science Department at the University of Waterloo, Canada. In the READI project’s Industry-University Task Force, Dr. Tampubolon played a significant role in the Actuarial Science Applied Research Working Group; and in the Recruitment and Development of Actuarial Science Lecturers Working Group.

For the periods of 2018 to 2020, and of 2020 to 2022, Dr. Tampubolon is the Head of the Actuarial Science Division of the Indonesian Mathematical Society (*Himpunan Matematika Indonesia* or IndoMS).

## Research and Publication

Dr. Tampubolon co-supervised a PhD student; and supervised many students in writing their *skripsi* (final projects) and master's theses with topics, such as: topics in earthquake insurance; the estimation of the outstanding claims liability for a long tail general insurance business; and the application of generalized linear models in determining the pure premium of automobile insurance and of health insurance.

**Short Biography**

Helena Margaretha is a mathematician with 15 years teaching experience at the Department of Mathematics, Universitas Pelita Harapan, Indonesia. She got a doctoral degree in Applied Mathematics from the University of Twente, The Netherlands in 2005, proceeding her master's degree in engineering mathematics from the University of Twente, The Netherlands in 1999, and her bachelor degree in Mathematics from Bandung Institute of Technology (ITB), Indonesia in 1997. Helena has a broad research interest: from fluid mechanics to AI. Since 2017 she concentrates her research mainly in the fields of actuarial science human health modelling, and financial risk modelling.

In 2017 and 2018 consecutively, Helena Margaretha won research grants on Actuarial Science, granted by the READI Project (a Government of Canada’s project on Risk Management, Economic Sustainability and Actuarial Science Development in Indonesia). She was also granted a 2-months research grant at the University of Waterloo, Canada.

At Universitas Pelita Harapan, Helena Margaretha was the chair of the Department of Mathematics (2005-2011), the Dean of the Faculty of Science and Mathematics (2011-2013), and the Associate Dean of the Faculty of Science and Technology (2013-2017). Since 2017 she concentrates on research, and she is in charge as the coordinator of Actuarial Science concentration at her institution.

### Research and Publication

Helena Margaretha’s publications can be found at

<https://scholar.google.co.id/citations?user=C31bpCEAAAAJ&hl=en>

In third quarter of 2021, she is also waiting for three papers accepted for publications to be published. The papers are:

Margaretha, H., Reynaldi, A., Sofian, F., Jap, and L., Saputra, K.V.I., A Dynamical Model of Dengue Primary and Secondary Infections with an Application to Microinsurance, accepted for publication in International Journal of Mathematics and Computer Science, 16(2021), no. 3, 1045–1062.

Mahisa, A., Margaretha, H., Saputra, K.V.I., and Lukas, S., Solving Sparse Reward Games using Deep Q-Learning with Demonstration and Partial Training, accepted for publication in the Proceedings of Mathtech 2020, to be published in 2021

Alam, K.E., Saputra, K.V.I., and Margaretha, H., Stocks Clustering with Fourier Transformation Towards Indonesian Stocks for Pairs Trading and Investment Diversification, accepted for publication in the Proceedings of Mathtech 2020, to be published in 2021

**Short Biography**

Maslina Darus obtained her first degree in 1992 from Acadia University, Nova Scotia. In 1996, she obtained her PhD from University of Wales, Swansea, U. K. in Univalent function theory (Geometric Function Theory). She became a lecturer at Universiti Kebangsaan Malaysia and was promoted as Associate Professor in 2001. In September 2006, she was promoted to Full Professor. She was appointed as the head of Math programme from 2004-2009. Then as Chair, School of Mathematical Sciences from 2010-2013. Later, she was appointed as Deputy Dean, Undergraduate of Faculty of Science and Technology (2013-2018).

She is very active in the Malaysian Mathematical Sciences Society (PERSAMA) holding the position as Honorary Secretary for almost 17 years (1997-2013). Currently, she serves as the President of the Malaysian Mathematical Sciences Society (PERSAMA). She is also the President of the Southeast Asian Mathematical Society (2020-2021).

Her interests in geometric function theory mainly focus on the univalence properties of certain subclasses of analytic functions. To this date in 2021, She has graduated more than 35 PhD students. The results from the research have indeed managed to publish more than 700 articles in refereed/indexed journals be it in Scopus, Web of Science and the traditional/conventional journals globally.

She was also awarded a handful of grants throughout 25 years of her academic career.

Be it the internal(University) grants or the national(Ministry level) grants such as the Fundamental Research Grant Scheme, Experiment Research Grant Scheme, Long Research Grant Scheme, Saga, e-Science Fund and few others. At times, she also served as the reviewer or evaluator for the national and international research grant.

Throughout her career in UKM, she received *UKM Excellent Staff Award* 1999 (2000), *UKM Young Researcher Award* 2001 (2002), *UKM Excellent Staff Award* (APC) UKM 2002 (2003), APC 2012, *Travel Young Award* (Princeton, IMU) to attend Math. Congress 2002 in Beijing. She also received *National Young Scientist Award* (Anugerah Saintis Muda Negara) in 2002 by the *Kementerian Sains Teknologi dan Alam Sekitar, Malaysia* and *Nishiwaki Prize* for univalent function theory in 2009 by the Slow Institute, Kyoto, Japan. She was also awarded the Fellow of The Academy of Sciences Malaysia (Akademi Sains Malaysia) in 2018.

### Research and Publication

Maslina Darus's research is on Geometric Function Theory specialised in univalent function theory and at times dealing with Real Inequalities and other applied research. Her mathematical works have been published widely in national and international journals.

Her list of Publications can be found at:

<https://scholar.google.com.my/citations?user=0mzrcZMAAAJ&hl=en>

**Short Biography**

Professor Dato Dr. Noraini Idris is an Educator, Consultant and Distinguished Mathematics Educator. She received her doctorate in Mathematics Education from The Ohio State University, USA. She has been entrusted with the position of the Deputy Vice Chancellor for Research and Innovation at Sultan Idris Education University, Tanjong Malim, Malaysia since 2010 until 2018. Prior to this, she had been the Dean of the Faculty of Education at University of Malaya, Kuala Lumpur. In addition Dato Noraini is an appointed President Indonesia, Malaysia, Thailand IMT-GT Uninet STEM, Associate Fellow

Academy Science of Malaysia and Chairperson, National STEM Movement. She is also research fellow, California State University, Long Beach, USA and President National STEM Association.

Professor Dato' Dr Noraini Idris interest in Mathematics Education has also motivated her to author several books on the teaching and learning of Mathematics, technology in science and mathematics education, some of which have been published and some will soon be published. As we know most students do not like to study Mathematics because they think Mathematics is tough and boring. The strength of her books lies in the overall presentation as well as her logical discourse on theories and practices of mathematics and make mathematics fun.

She has served the Ministry as a consultant in the design of the syllabus for the teaching of Mathematics, evaluation of the Mathematics and Additional Mathematics software production. She has also monitored the quality of modules and the progress of the recognition of Programme and evaluate the quality of SMART courseware in mathematics.

For over 36 years, Professor Dato' Dr Noraini Idris has been dedicating her efforts in field of Education. Thanks to her years of experience, endeavors and excellent educational leadership qualities, she is now a distinguished figure in the field of Education not only in Malaysia but at the international level as well. She has been honored with an outstanding total of 45 personal local and international awards and recognitions for her prominent achievement given by pretigious bodies and organizations which protrays to all her excellent and leadership in Education innovation. Among the most prestigious awards she received were :

- **Graduate Student Alumni Research Award** from The Ohio Sate University, Columbus, Ohio, USA
- **Distinguished Diversity Enhancement Award** from The Ohio Sate University, Columbus, Ohio, USA – the only Asian recipient for the project on Minority Young Scholars in Ohio, United States of America
- **Fullbright**, MACEE, USA.
- **British Council Research – CHICHE**, Principal Researcher.
- **Gold Medal** from Geneva, Switzerland for International Invention & Innovation Expo
- **Prime Minister Finalist** from Ministry of Science and Technology for Invention Award
- **Gold Medal** ITEX, PECIPTA for E-Assessment System for Tertiary Learning
- Education Leadership from The Golden Globe Tigers  
**Education Leadership Award** at Pullman Kuala Lumpur City Centre Hotel & Residences
- Special Award from Japan Intellectual Property Association  
**The JIPA SPECIAL AWARD for the Distinguished STEM**

**Leadership** at 17th Malaysia Technology Expo (MTE), Putra World Trade Centre, Kuala Lumpur. This award is for her leadership and contribution towards the promotion of STEM Education initiatives to all strata of the society in Malaysia. 2018

- **Visionary Leadership Category in International Education Award 2018**
- **Outstanding and Excellent Leadership in STEM, Republic of Croatia 2019**
- **Invited Speaker on STEM** at Regional Workshop on Regional Cooperation in the 4IR, **Asia Development Bank**, Manila, Philippines, 2019
- **Regional Experts Meeting**, invited by International Labour Organization, **United Nation**, Bangkok, Thailand, 2019

Her products have been nationally and internationally acclaimed and exhibited at PECIPTA, MTE, ITEX, as well as exhibitions in **GENEVA** and London, UK. Prof. Dato Dr. Noraini is an inspiration and a prime role model scholar and Mathematics Educator.

**Short Biography**

Roslinda Nazar is a Professor of Applied Mathematics and currently the Chairman at the Department of Mathematical Sciences, Faculty of Science and Technology, Universiti Kebangsaan Malaysia (UKM). She was born in Klang, Selangor, on the 5th October 1972. She received her primary and secondary schools education also at her hometown in Klang. She holds a Bachelor of Science (Mathematics) degree from the University of Illinois at UrbanaChampaign, Illinois, USA, and a Master of Science (Mathematics for Nonlinear Models) degree from Heriott-Watt University and University of Edinburgh, Scotland, UK. Subsequently, she obtained a Doctor of Philosophy (Applied Mathematics) degree from Universiti Teknologi Malaysia, Skudai,

Johor in January 2004. In February 2005 she was promoted to the post of Senior Lecturer and later to Associate Professor in August 2006. She was then promoted to the position of full Professor in January 2012.

Her research interests include studies in the fields of Fluid Dynamics, Heat Transfer and Mathematical Modelling and her main research interests are the boundary layer flow and heat transfer problems in Newtonian and nonNewtonian fluids. She is the Editor of several national and international journals as well as several conference proceedings. She is also an active researcher in publication and research and she has published 3 research books by UKM Publisher and more than 500 publications in the form of journal articles, proceedings and chapters in books. Most of her publications are published along with her PhD students and also with her local and international research collaborators.

It should be pointed out that she is a very active researcher and for the past years she has already obtained twenty (20) research grants as a Project Leader (Principal Investigator) from UKM as well as the Ministry of Higher Education Malaysia, Academy of Sciences Malaysia, and the Ministry of Science, Technology and Innovation, Malaysia, of a grand total amounting to more than RM 1 million. On the other hand, she is also an active life member of the Malaysian Mathematical Sciences Society (PERSAMA) and also an outreach member of the Society for Industrial and Applied Mathematics (SIAM). She is currently an auditor for PERSAMA.

### **Research and Publication**

Professor Nazar's research is mainly on Applied Mathematics and related to the fields of Fluid Mechanics and Heat Transfer, specifically on Convective Boundary Layer Flows. Her research works have been published in various high impact journals as well as in indexed proceedings and a few books.

Her list of publications can be found at the following databases:

<https://publons.com/researcher/2122703/roslinda-nazar/> (Web of Science)

#### Short Biography

Professor Dr. Zanariah Abdul Majid is a Professor of Mathematics at Department of Mathematics and Statistics, Faculty of Science, Universiti Putra Malaysia. She was awarded Doctor of Philosophy in Applied Mathematics specialized in Numerical Analysis, in 2004. Her research interest is in numerical methods, focusing on multistep methods and one-step methods for solving first and higher order ordinary differential equations. In addition, her research focused on developing new methods and new approaches for solving second and third order boundary value problems directly. Her research interest also includes solving first and higher order Delay Differential Equations for retarded and neutral type problems. She has published more than 150 papers as main author and co-author in the area of numerical analysis.

Prof. Dr. Zanariah was the Head of Laboratory at the Institute for Mathematical Research (INSPEM), Universiti Putra Malaysia from June 2012 until November 2017. Presently, she holds the position of Deputy Dean (Research & Postgraduate Studies) at the Faculty of Science, a post she holds since December 2017. A total of 6 PhD students and 21 Master students had graduated under her supervision and currently supervising another 5 PhD students.

Prof. Dr. Zanariah had won several awards and medals through her hard work and distinguished research efforts at national and international level. She has headed 15 research projects and collaborated with other researchers in more than 10 research projects. She has been invited as keynote speaker and invited speaker at various mathematics conferences and seminars. She has also served as research grant evaluator, journal papers reviewer for national and international journals, and external reviewer for academic promotions. Currently, she is the Editor-in-Chief for Malaysian Journal of Mathematical Science (MJMS) and as Section Editor for Matematika: Malaysian Journal of Industrial and Applied Mathematics.

Additionally, Prof. Dr. Zanariah was involved as a panel member for the development of new curriculum for the Additional Mathematics subject for Forms 4 and Form 5, under the Ministry of Education Malaysia, in 2017 and 2018. She is also actively involved in STEM and promoting community linkages; and has led the INSPEM Mathematics Camp from 2016 until 2018. She has continuously demonstrated commitment to her work and willingness to share her knowledge with her students and the Mathematics community.

### Education

**Short Biography**

Dr Jane Labadin is an Associate Professor at the Faculty of Computer Science and Information Technology as well as Research Fellow at the Institute of Social Informatics and Technological Innovation, Universiti Malaysia Sarawak (UNIMAS). She received her Ph.D. in Computational Mathematics specializing in Fluid Dynamics from the Imperial College of Science, Technology and Medicine, London, UK in 2002. Her Bachelor degree in Applied Mathematics was from the same university in 1995. She obtained her Master in Computation in 1997 from the University of Manchester, Institute of Science and Technology, UK. She is an active researcher evident from the many internal and external research projects that she leads as well as from her publications. Her research interest is generally in computational modeling of dynamical systems which includes infectious disease modeling.

### Research and Publication

Assoc. Prof. Dr Jane's research activities are mainly in the modeling of dynamical systems. This is evident from the research students she supervises as well as the research grants that she leads. Thus far, there are seven PhD graduates and ten Master graduates where Assoc. Prof. Dr Jane is the main supervisor. She has completed four Malaysia Ministry of Higher Education (MOHE) research grants and five UNIMAS (internal) research grants of which she was the principal investigator. Apart from these, she contributed as a co-researcher in more than ten other research grants. She is currently supervising a team of 4 postgraduate students (1 PhDs and 3 Masters) and leading one MOHE and one external research grants. Her research findings have been published and presented in many well-known journals and conference proceedings, locally and abroad, and were cited more than 500 times according to Google Scholar. She is also actively involved in exhibiting her research outputs and have successfully obtained few awards. Her expertise is always sought after evident from the reviewers' request from international conferences and journal editors. Assoc. Prof. Dr Jane is also actively involved as research fellow at the Institute of Social Informatics and Technological Innovations where she leads the Commercial Programme as well as the Information Technology group and overseeing as a site leader for ISITI's eBuayan. Assoc. Prof. Dr Jane has also contributed in various organizations of workshops and conferences for the faculty and institute.

Detailed list of her research and publication can be found at <https://expert.unimas.my/profile/374>

**Short Biography**

Dr Nor Haniza Sarmin is a Professor of Mathematics at the Faculty of Science, Universiti Teknologi Malaysia (UTM) Johor Bahru, Johor.

She received her BSc (Hons), Master and PhD in Mathematics from State University of New York (now known as Binghamton University), Binghamton, New York, USA. Her specialization of research is in Group Theory, Graph Theory, Formal Language Theory, Splicing Systems, and Their Applications.

She has written more than 500 research papers in national and international journals and proceedings, mainly in the area of group theory and splicing systems. She has also supervised and graduated 36 PhD students, 25 masters students and 83 undergraduate

students under her supervision. This includes the Youngest PhD Holder in Malaysia Book of Record 2014, Dr Hazzirah Izzati Mat Hassim.

Besides that, Dr Nor Haniza has participated in Malaysian Mathematical Sciences Society (PERSAMA) since 1998 as a lifetime member and served as the Vice President for five terms.

### Research and Publication

Prof Niza's research is mainly focusing in Group Theory and its Applications, Graph Theory, as well as Formal Language Theory and its Application in DNA Computation. Her works have been published in various journals and book chapters.

Her list of publications can be found at <https://people.utm.my/nizararmin/journal-papers/>.

**Short Biography**

Hailiza Kamarulhaili is a Professor of Mathematics in the School of Mathematical Sciences at Universiti Sains Malaysia (USM), Malaysia, where she is currently the Dean of the school since 2016, after serving the school as the Deputy Dean of Academic and Student Affairs from 2010 until 2015. She obtained her PhD degree in Mathematics from the University of Liverpool, United Kingdom in 2000. Her research interests lie in the areas of Number Theory and Cryptography.

She was the President of the Malaysian Society for Cryptology Research from 2015-2018. She is an Editorial Board member of several journals, namely the International Journal of Cryptology Research, the Malaysian Journal of Mathematical Sciences, and Discovering Mathematics. She is also an editorial board member for several series of Cryptology Conference Proceedings published from 2012 until 2020. She chaired several international and National conferences, amongst them were, International Cryptology Conference 2008 and International Cryptology Conference 2012. She has been appointed as a panel of expert under the National Cryptography Policy by CyberSecurity Malaysia since 2016.

She is also a member of the International Association for Cryptologic Research (IACR), life-member of the Malaysian Mathematical Sciences Society (PERSAMA) and life-member of International Society for Analysis, its Applications and Computations (ISAAC). She has published more than 100 articles in both Journals and Proceedings. She has been active in research and recently has been granted funding from the Ministry of Higher Education Malaysia under a fundamental research grant scheme on topic related to Lattice-based Cryptography.

### Research and Publication

Professor Hailiza Kamarulhaili has contributed in the domains of Elliptic Curves Cryptography, Lattice-based Cryptography, and Diophantine Equations. Her recent publications also include topics related to Matrix Theory and Graph Theory.

For list of her publications, please refer to the following link:

**Short Biography**

Nor Muhainiah Mohd Ali is an Associate Professor who specializes in algebra & group theory and its applications under the Department of Mathematical Sciences, Faculty of Science, Universiti Teknologi Malaysia (UTM). She was born in Jerantut, Pahang, Malaysia on November 17, 1981 and is now married and has been blessed with 4 children. She completed her degree in 2002 which then went on to further her studies to master's level in 2004 and finally graduated with a PhD in 2008 under the field of Mathematics in the same university she works now which is in Universiti Teknologi

Malaysia (UTM) in Skudai, Johor, Malaysia with a Ph.D. thesis entitled Capability and Homological Functors of Infinite 2-Generator Groups of Nilpotency Class Two.

Throughout the working period which started in 2002 until today, Dr Nor Muhainiah has won several awards in different sections such as in the field of teaching & learning, research, and also sports. Below is the list of awards that she has won.

#### TEACHING AND Learning

- i) Anugerah Kumpulan Penyelidikan Fakulti Sains & Anugerah Pengajaran dan Pembelajaran Fakulti Sains **(2019)**
- ii) Anugerah Perkhidmatan Cemerlang Fakulti Sains **(2010, 2012, 2014, 2016, 2018)**
- iii) Active Blended Learning Course **(2016, 2017)**
- iv) Anugerah Perkhidmatan Cemerlang Citra Karisma **(2009, 2013)**
- v) Anugerah Khas Fakulti (Khidmat Pembelajaran Matematik kepada Masyarakat), Ahli Kumpulan Pemantapan, Pengajaran dan Pembelajaran Matematik **(2013)**
- vi) Tokoh Alumni Fakulti Sains **(2011)**

#### RESEARCH

- i) Bronze Medal, 'Model Development for Visualizing Properties of Finite Group', MTE **(2014)**
- ii) Bronze Medal, 'A Model for Visualizing Some Properties of Finite Groups', INATEX **(2011, 2013)**
- iii) Hadiah Saguhati Kategori Tesis Doktor Falsafah, Anugerah PERSAMA **(2010)**
- iv) Bronze Medal, 'GAP Algorithms for Homological Functors of Infinite 2-Generator Groups of Class 2', INATEX **(2009)**
- v) Best Fundamental Research Award, Faculty of Science's Staff Excellence Award, Finalist, Best Fundamental Research Award, University Excellence Award "Citra Karisma" **(2008)**

#### SPORTS

- i) Anugerah Sukan Fakulti Sains (Bola Jaring) **(2017)**
- ii) Tempat ketiga bola jaring, UTM Staff Games 2014 **(2014)**
- iii) Excellence Award in Sports, 2006. Menerima Sijil Perhargaan dalam Bidang Sukan Sempena Majlis Hari Pengiktirafan Staf 2006, Fakulti Sains, Universiti Teknologi Malaysia. **(2007)**

Besides, Dr Nor Muhainiah was also a member of American Mathematical

Society (Membership No: MHNRF) in 2012, IEEE (Membership No: 91309373) in May 2011, Golden Key National Honour Society in 2000 and also a life member of Persatuan Sains Matematik Malaysia, PERSAMA (Membership No: NS2007-2) starting in April 2007.

Dr Nor Muhainiah is also a group leader of Roadmap Outcome 1 (RO1) MyRoadmap Fakulti Sains on September 2020 – 31 Julai 2021 and is a group leader of Applied Algebra

and Analysis Research, Faculty Science and Frontier Material Research Alliance, UTM starting from 1 Ogos 2019 – 31 Julai 2020. She was also the head of Algebra and Analysis Panel, Department of Mathematical Sciences, UTM starting from 1 Ogos 2018 –. Aside from that, she was also an examiner for both PhD and master students starting from 2014.

Currently, she holds some grants under the university grant named UTMFR and RUG as a member and was a project leader and project member of university grant, UTMFR and a project member for Fundamental Research Grant Scheme (FRGS). Apart from that, some Groups, Algorithms and programming (GAP) algorithm on group theory have been created and have also been patented in 2013 and 2016.

### Supervision

Dr Nor Muhainiah has supervised more than 15 PhD student, more than 10 MSc student and more than 20 undergraduate student.

### Research and Publication

Dr Nor Muhainiah has also published some book chapters and journals in 2006 until today.

### The best five recent publications in journals and/or books

**Short Biography**

Saiful Hafizah Jaaman is Associate Professor at the Actuarial Science Program, Department of Mathematical Sciences, Faculty of Science and Technology, Universiti Kebangsaan Malaysia. She got her Ph.D. degree in Finance at Universiti Putra Malaysia in the year 2007. She now focuses on research and research supervision in the fields of Actuarial Science and Financial Mathematics particularly Portfolio Optimization and Diversification, Investment Analysis, and Islamic Financial Mathematics.

Dr. Hafizah was the Head of the Actuarial Science Program from 2013–2018. Currently she is the Coordinator for the Actuarial Science Program Final Year Projects. She has been the Honorary Treasurer for the Malaysian Mathematical Society since 2007.

Dr. Hafizah has won awards in research and has several research grants since 2006 as research leader, co-researcher, and mentor. Her research grants include the Fundamental Research Grant awarded by the Higher Education Ministry of Malaysia, UKM’s Research University Grant, UKM’s Teaching & Learning Grant, and industrial grants (PNB and UCIP). She is an external examiner for Ph.D at some universities in Malaysia in the field of Financial Mathematics and Islamic Financial Mathematics. She also serves as an external adviser and assessor for the Actuarial Science programs at several universities in Malaysia.

**Short Biography**

MAZLINI ADNAN is a Associate Professor of Mathematics Education at Department of Mathematics, Faculty of Science and Mathematics, Universiti Pendidikan Sultan Idris, Tg. Malim, Perak, Malaysia since 2003. She was born in Kuala Kangsar, Perak on 18th February 1975.

Holds a PhD and a master in Mathematics Education from the National University of Malaysia (UKM). Received bachelor's degree (BSc.Ed (Math) from the University of Malaya (UM). Also has an experience of teaching in secondary schools almost 4 years in the field of mathematics and additional mathematics before joining UPSI as a tutor in 2003.

She is active in research. She has led 6 research grants as the main researcher with 2 of the grants are KPM grants. Other than that, she is also the co researcher for 10 other project grants. She always inspired the research team and maintained a high-level enthusiasm for each project.

She is also an avid technical writer. She has published around five chapter in books and 100 articles in indexed journals including 19 Scopus documents.

Her publications have received 397 citations (h-index = 11, i10-index= 9) in Google Scholar and 43 citations (h-index= 4) in Scopus database.

She had supervised and graduated two PhD students and two master students in research mode, supervised and graduated 15 master students (Mode B and Mode C). Currently supervising three master student as the main supervisor and 15 PhD students (7 as main supervisor and 8 as cosupervisor).

Assoc. Prof. Dr. Mazlini Adnan also has experiences in the organization as a Deputy Director of UPSI Educational Research Laboratory (UERL) in 2017-2019, Coordinator of Commercialization Unit, Research Management and Innovation Centre (RMIC) Universiti Pendidikan Sultan Idris in 2019-2021.

**Short Biography**

Nazirah Ramli is an Associate Professor of Mathematics at the Department of Mathematics, Faculty of Computer and Mathematical Sciences, Universiti Teknologi MARA Pahang, Malaysia, since 1994. She was born in Pahang on

May 27, 1969. She got a Ph.D. degree in Fuzzy Mathematics from Universiti Teknologi MARA Selangor in 2013 with the Ph.D. thesis entitled Ranking Trapezoidal Fuzzy Numbers based on Set Theoretic with Hurwicz Criterion. She now focuses on research in Fuzzy Decision Making, Fuzzy & IFS Time Series Forecasting and Mathematics Education.

Associate Professor Nazirah has received a number of grants from the Ministry of Higher Education Malaysia under the area of Fuzzy Decision Making and Fuzzy Time Series Forecasting. She is an external examiner of Ph.D. and Master thesis at some universities

in Malaysia and India. She is also an assessor of Mathematics courses at private university in Malaysia.

Associate Professor Nazirah also has experience in the organization as a Head of the Department of Mathematics in 2003-2005, and Head of Faculty of Computer and Mathematical Sciences Universiti Teknologi Mara Pahang in 2015-2017. Currently she is the Deputy Rector of Academic Affairs, Universiti Teknologi Mara Pahang since January 2021. For the mathematical society, Associate Professor Nazirah is a member of the Malaysian Mathematical Science Society and was also a chairman of the 25th National Symposium of Mathematical Science Malaysia (2017), organized by the Malaysian Mathematical Science Society.

### Research and Publication

Associate Professor Nazirah's research is on Fuzzy Decision Making, Fuzzy and Intuitionistic Fuzzy Time Series Forecasting, and Mathematics Education. Her mathematical works have been published in national and international journals. Her list of Publications can be found at:

**Short Biography**

Yuhani binti Yusof is currently served as an Associate Professor in the Centre for Mathematical Sciences at Universiti Malaysia Pahang. Experiences of more than 15 years in teaching various mathematics subjects at some Institute of Higher Learning, she actively involved in research related to the mathematics education and biomathematics field- modeling, proving, and computing. Even her major experts are more on theory and application of Formal Language and Graph, she also interested in constructing C/ C++ and conducting STEM programs (Mathematics) for school level as a CSR program. She

has been acknowledged by receiving several grants, CITReX awards and, intellectual propertiescopyright

**Short Biography**

N. F.M. Noor was graduated from PhD in the field of Numerical Methods for Fluid Mechanics with 9 SCI-indexed journal publications in 2010. She was supervised by Prof. Dr. Ishak Hashim from Universiti Kebangsaan Malaysia (UKM), one of the top three Malaysians listed as The Most Influential Scientific Minds 2014. She did her full time PhD in UKM while teaching full courses in UNISEL (formerly known as Universiti Industri Selangor) as a full time lecturer. She acquired her first Fundamental Research Grant Scheme (FRGS) from the Ministry of Higher Education as a Principal Investigator (PI) in 2010 and was promoted to Senior Lecturer under Department of Mechatronics, Faculty of Engineering, UNISEL. She joined Institute of Mathematical Sciences (ISM), Faculty of Science in 2012 with a 3-year contract term but ended up as a permanent Senior Lecturer within 10 months of service. Her academic post was confirmed and she received Universiti Malaya Excellent Service Certificate in 2015.

In 2016, N.F.M. Noor was invited as a Plenary Speaker in CMES 2016 organized by Moulay Ismail University, Errachidia, Morocco. In 2017, she was among 54 Malaysian lecturers selected from more than 500 applicants under the flagship CEO@Faculty Program 2.0 by the Ministry of Higher Education, Malaysia to undergo a 6-month industrial attachment. She was hosted by the Department of Strategy, Sunlife Malaysia Assurance Berhad under direct mentorship of the Chairman, Datuk Dr. Syed Muhamad Syed Abdul Kadir who is also a Director Board Member of other 9 public listed companies in Malaysia. After her attachment was completed in February 2018, she was awarded a Mevlana mobility grant by the Turkish government hosted by Associate Prof. Dr. Mehmet Baskonus in Munzur University, Turkey in May 2018. In 2019, N.F.M. Noor spent her 9-month sabbatical leave in UM focusing on her postgraduate supervision and finishing her existing research tasks. She was one of the invited speakers sponsored by Academia Sinica in Taiwan in June 2019. She hiked Mount Qixing Main Peak and East Peak, the highest mountains in Taipei, Taiwan alone while fully fasting in that holy Ramadhan month. In July 2019, she hiked Mount Fuji, Japan and in that same month she was accepted as a Reservist Officer with Royal Malaysian Navy.

In January 2020, N.F.M. Noor visited Assoc. Prof. Dr. Shams-ul-Islam in Islamabad who taught her Lattice Boltzmann Method and some Pakistani PhD students who asked her guidance on their Ph.D. research as she was one of Pakistan Higher Education Council (HEC) approved thesis examiners. She hiked Mount Kinabalu in Mac 2020, the highest mountain in Malaysia before Movement Control Order was enforced by the government. She returned to UM from her sabbatical leave and was appointed as Assistant Deputy Head (Research) for ISM. In October 2020, she founded Center for Data Analytics Consultancy and Services (UM-CDACS), a new research center under Faculty of Science as the Director. In November 2020, she was appointed as a member of working committee for UM Industrial and Community Engagement Policy.

In January 2021, N.F.M. Noor was appointed as Deputy Head (Research) of ISM. She received UM Excellent Service Award 2021 in March. She was assigned as the Leader for Task Force 1.3 (Continuous Professional Education) for Action Lab Theme 1 under the Vice Chancellor of UM in May 2021. Today she has 26 SCI/SSCI journal publications, 2 graduated PhD students, 2 graduated MSc students (1 thesis & 1 dissertation), 2 post graduate students with submitted theses (1 PhD & 1 MSc) and 5 active postgraduate students (4 PhD & 1 MSc). She has acquired 3 external grants and 3 internal grants as Principal Investigator (PI) with an accumulated grant amount of RM 254,360.00. She has also involved as a Co-Researcher in 1 external grant and 1 internal grant with an accumulated grant amount of RM 120,500.00.

**Short Biography**

Hail from Port Dickson, Malaysia, Siti Norafidah Mohd Ramli is a senior lecturer at the Actuarial Program of Universiti Kebangsaan Malaysia (UKM). In 2015, she received a Ph.D. in Applied Finance and Actuarial Studies from Macquarie University, Australia, with a thesis titled Modelling Multivariate Dependence Structures in Insurance and Credit Risk Via Copulas.

In the year 2005, she obtained MSc in Risk and Stochastic from the London School of Economics & Political Science following her graduation in BSc in Actuarial Science with a First Class Honors from the same varsity in the previous year. Upon her PhD completion, she was hired as a Research Fellow at the Centre for Financial Risk, Sydney in the year 2014 where she worked with Prof. Stefan Trueck and Dr Jiwook Jang of Macquarie

Business School. She was also a Visiting Fellow at the Department of Applied Finance and Actuarial Studies of Macquarie University, in 2016 and 2017.

Dr Mohd Ramli has been awarded research grants from the Ministry of Higher Education Malaysia and UKM, as well as a scholarship to study the Chartered Financial Analyst (CFA) professional qualification from Yayasan Peneraju, an agency under the Malaysian Prime Minister’s Office. Mainly focusing on research in the field of financial mathematics and actuarial science, she is interested in the applications of jump-diffusion models and copula on financial instruments and risk portfolios. She had a stint as a quant analyst at the national asset management firm and is currently a Level 3 CFA candidate. She has also worked with investment and insurance firms such as Etiqa and Ficus Venture Capital solving real life problems in her capacity as a researcher. Other than being a member of Malaysian MENSA, she is actively involved in cooperative organisations. She is also an avid martial art apprentice in Japanese jujutsu and Silat Tomoi, as well as an occasional band guitarist and vocalist.

### Research and Publication

Dr Mohd Ramli studies the role of the jump-diffusion model in representing financial and mortality risks for prudent pricing of financial contracts, insurance & pension reserves, as well as the application of stochastic differential equations in strategic asset allocation. In the field of actuarial science, she is currently looking at the application of Weibull inter-waiting time distribution in modelling aggregate discounted claims with copula.

Her list of publications can be found at: [www.orcid.org/0000-0001-5892-9013](http://www.orcid.org/0000-0001-5892-9013)

**Short Biography**

Zamira is a senior lecturer at Department of Mathematical Sciences, Faculty of Science and Technology, UKM. She obtained her BSc in Actuarial Science from UKM and Master of Applied Statistics from University Putra Malaysia (UPM). She has a PhD in Statistics from Macquarie University, Australia. Her research interest mainly on statistical analyses of traffic accident count data, specifically by employing Bayesian and multivariate

techniques. She is also interested in exploring various computational statistical techniques typically found in the data science field.

**Short Biography**

Dr Tan Wooi-Nee received the Bachelor of Science, Computer and Education (Hons), Master of Science in Mathematics and the Ph.D. degree in Mathematics from the Technology University of Malaysia. Mathematical modelling and optimization, as well as data analytics, are among her research interests. She is currently attached with Faculty of Engineering in Multimedia University as a lecturer.

## Research and Publication

Majority of her current research focus in the area of mathematical modelling especially on optimization for various applications problems, such as vehicle to grid, industrial demand-side management, anomalous detection in smart grid, telecommunications network, etc. Her research interests also cover data analytics for a variety of industrial challenging projects, including prediction and manpower allocation for logistic industry, prediction and energy efficiency saving for rice milling project, etc.

Complete list of her publication works can be found at

Field-1 : Computational Fluid Dynamics  
Field-2 : Numerical PDEs

### **Short Biography**

Ohn Mar is a professor at Department of Mathematics, University of Mandalay. She started to work as a teaching staff at University of Mandalay since 1986. She was a full time professor since 2009. She worked as a professor at Department of Mathematics, Myeik University, southern part of Myanmar in 2009-2010, at University of Mandalay from 2011 to 2017 and at Mandalay University of Distance Education from 2018 to 2020. Now she is working as a professor at Department of Mathematics, University of Mandalay. She was born in Meiktila, Mandalay Region on August 1, 1965.

She got a Ph.D. degree in Mathematics, University of Mandalay in the year 2007 with the Ph.D. thesis entitled effects of viscous potential flow on a boundary. Her research interests are PDEs, computational fluid dynamics and mathematical physics. Since University of Mandalay offers the PhD program in mathematics, she focuses on research and research supervision of Master and PhD degrees in these research interests at Department of Mathematics, University of Mandalay. She was also an external examiner of MSc and Ph.D defence at some universities in Myanmar. She have been attended ICM

2014 in Seoul, Republic of Korea and she presented a poster presentation entitled force on a boundary in an inviscid potential flow (session code and poster code: P11-03). In 2016, she participated as a speaker at Asian Mathematicians Conference AMC 2016 and Asian Women Mathematicians Forum 2016 in Bali Nusa Dua Convention Centre, Denpasar, Bali, Indonesia. Throughout her working times, she was working hard to improve the level of mathematics of the faculty members and students.

Professor Ohn Mar has won award in travel research grant in 2015 from the IMU-SIMON foundation for collaborative research with Professor Yasuhide Fukumoto, Director, Institute of Mathematics for Industry (IMI), Kyushu University, Fukuoka Prefecture, Japan.

Prof. Ohn Mar also has experiences in the organization as a Head of the

Department of Mathematics in 2015-2017 in University of Mandalay and in 2018-2020 in Mandalay University of Distance Education. For the mathematical society, she was assigned as a joint secretary of the Mathematical Society of

Myanmar (MSM) in 2014-2015 and Vice-President in

2016-2017. She was a member of local organizing committee of the

International Conference on Science and Mathematics Education for Developing Countries (ICSMEDC) from 2013 to 2017. In 2011-2014, she worked as a member of PhD steering committee and in 2015-2017, as a chair of PhD steering committee at Department of Mathematics, University of Mandalay. And she was also a member of Myanmar Academy of Arts and Science (MAAS) since 2014 to the present. She was a coordinator/ representative of The South East Asia Mathematical Network (SEAMaN) which is set up three universities, Royal University of Phnom Penh(Cambodia), National University of Laos, (Laos) , University of

Mandalay(Myanmar) and it is supported by International Science Programme(ISP), Uppsala University, Sweden for the development of mathematics within the region. In 2016-2017, she did the project of Mathematics at UM for International Master Degree Program cooperated with International Center for Pure and Applied Mathematics (CIMPA, France) but it was temporarily stopped in 2018-2020 and now it will be a plan to continue in 2021 or 2022. She organized South East Asia Mathematical Society School (SEAMS School 2018) which was supported by CIMPA, France as a head of the organizers in 2018 with the title PDEs and their applications. In 2015-2017, She participated in the Fellowship for International Programme in

Mathematical Science, ISP, Uppsala University, Sweden in 2015, in the Pilot Course Level I, Connecting with the World Course by Institute of International

Education(IIE), New York and Ministry of Education, Myanmar in 2015-2016,

Asian University Leaders Program by United Board in Assumption University, Bangkok, Thailand in 2016 and Knowledge Co-creation Program (Country Focus) by Japan International Cooperation Agency (JICA) in 2017.

Prof. Ohn Mar participates as an Ambassador of Committee of Women in Mathematics International Mathematical Union (CWM IMU) for Myanmar in 2021.

## Research and Publication

Professor Ohn Mar's research is on the computational fluid dynamics and PDEs. Her mathematical works have been published in national journals and books.

**Short Biography**

Polly Wee Sy is currently the only female professor emeritus at the Institute of Mathematics under University of the Philippines (UP). She holds a Master of Science (M.Sc.) and Ph.D. from the University of the Philippines and a Doctor of Science (D.Sc.) in Mathematics from the Nagoya University, Japan. Her research interests are differential equations, dynamical systems, spectral geometry, and mathematics biology.

Author to several publications, Dr. Sy has more than 30 papers in refereed journals, books and in a university bulletin, more than 30 papers presented in international conferences, university colloquia, and seminars, more than 15 papers published in international refereed proceedings, including commissioned work for the Commission for Developing Countries (CDC) of the International Mathematical Union (IMU), with Lee Peng-Yee entitled a “Mathematics in Southeast Asia : Challenges and Opportunities.” She has also edited and co-edited international proceedings and journals.

Dr. Sy is a recipient of several honors and awards among them the 1996 National Research Council of the Philippines (NRCP) Achievement Award, 1992 National Academy of Science and Technology of the Philippines (NAST) Third World Academy of Science (TWAS) Science Prize (in Mathematics), the 1992 UP Diliman Gawad Chanselor Pinakamahusay na Mananaliksik (Chancellor’s Award to Outstanding Scientist) and the 1988 NAST Outstanding Young Scientist Award.

Dr. Sy plays an active role in contributing further to the local and international mathematics organizations and communities. She was the former president of the Southeast Asia Mathematical Society (1998-1999) and two-time chair of the UP Diliman Department of Mathematics (1994-1996; 1999-2002). She is a member of various professional and scientific organizations such as the Southeast Asian Mathematical Society, Mathematical Society of the Philippines, and Mathematical Society of Republic of China. She also served as a member of the Governing Board of the National Research Council of the Philippines (NRCP) for two terms (2015-2019), as President of the UP Diliman Mathematics Foundation, Inc (2018-2020), as well as a member of the CDCIMU from 2011-2018. At present, she is one of the ambassadors of the Committee for Women in Mathematics (CWM) of IMU from the Philippines. Moreover, her service to the community includes being a content reviewer of the Department of Education (DepEd) of the Philippines for elementary/high school textbooks in mathematics for used in public schools (2004-2012) and a member of the Quality Assessment Team (National Capital Region) in mathematics of the Commission on Higher Education (CHED) up to 2012.

**Research Interests**

Professor Polly W. Sy’s research interests are differential equations, dynamical systems, spectral geometry and mathematics biology.

*h*-index Scopus : 7

### **Short Biography**

Dr. Cristina B. Corcino is currently a Professor of Mathematics at the Department of Mathematics of Cebu Normal University, Cebu City, Philippines. She was also a Professor of Mathematics in Mindanao State University and an Associate Professor at the Institute of Mathematics in UP Diliman before moving to Cebu Normal University. She got her PhD in Mathematics degree from UP Diliman, Quezon City in 1999.

Her research works started with her PhD thesis entitled Asymptotic Approximations of  $r$ -Stirling Numbers and Asymptotic Expansions of some Sheffer polynomials. Her recent research works include the papers: Logarithmic generalization of the Lambert  $W$  function and its applications to adiabatic thermostatics of the three-parameter

entropy published in the journal *Advances in Mathematical Physics*, Vol. 2021 (Feb 2021); Resolution of the Plane-symmetric Einstein-Maxwell fields with a generalization of the Lambert W function published in the *Journal of Physics Communication* Volume 4 No. 8 (2020); and Approximations of Genocchi polynomials of complex order published in *Asian-European Journal of Mathematics* Volume 2 (2021).

Professor Cristina Corcino was cited as one of the top 150 Filipino scientists in 2015 by Cybermetrics Lab. She was also given Research Excellence Award in 2018 and Presidential Citations in 2019 and 2021 for publishing scientific papers in international journals indexed by Web of Science and Scopus and for being 5<sup>th</sup> among the top 10 most cited university Math professors in the country based on google scholar h-index. She also received research grants from the National Research Council of the Philippines (NRCF) and from the Commission on Higher Education (CHED) in the Philippines. Her research grant from CHED-Philippines has just ended on June 3, 2021 and she was able to produce eight (8) publications as outputs of the research project. She also received travel grants for research dissemination abroad which include NANUM 2014 travel grant for the International Congress of Mathematicians held in Seoul, South Korea and CHED travel grant in 2016 for paper presentation in the International Conference of Diophantine Analysis and Related Topics held in Wuhan University, Wuhan, China.

Professor Cristina Corcino was designated as Director of the Summer Upgrading Program for College Mathematics Teachers (SUPCOM 2016) organized by the Mathematical Society of the Philippines (MSP). She also served as Treasurer/Board Member of MSP Cebu Chapter. She has been designated as the Science Research Chair of the College of Arts and Sciences of Cebu Normal University since 2017 until present. She has also served as Chair of the Mathematics Department of Mindanao State University for two years (2003-2005).

Ongoing researches of Professor Cristina Corcino include seven (7) research projects with the Research Institute for Computational Mathematics and Physics (RICMP) and two (2) research projects with the Center for Research and Development (CRD) of Cebu Normal University.

### **Research and Publication**

Professor Cristina Corcino's research is on Asymptotic Analysis and Analytic Combinatorics. Her mathematical works have been published in national and international journals.

Her list of Publications can be found at:

[https://scholar.google.com.ph/citations?hl=en&user=8\\_y5HhsAAAAJ](https://scholar.google.com.ph/citations?hl=en&user=8_y5HhsAAAAJ)

## CURRICULUM VITAE

### WOMEN MATHEMATICIAN AT ASEAN COUNTRIES

COUNTRY: Philippines

Name : Prof. Dr. Ma. Louise Antonette N. De Las Peñas  
Affiliation : Ateneo de Manila University  
Office Address : Department of Mathematics  
Loyola Heights Quezon City Philippines 1108  
e-mail : mdelaspenas@ateneo.edu  
Phone/WA : 0917-180-1505  
Field-1 : Group Theory (Algebra)  
Field-2 : Discrete Geometry  
ID Scopus : 6506022503  
ID Orcid : <https://orcid.org/0000-0003-1222-8961>  
ID Google Scholar : phcwgrMAAAAJ&hl=en  
*h*- index Scopus : 5

#### Short Biography

Ma. Louise Antonette N. De Las Peñas is a Professor of Mathematics at the Department of Mathematics, Ateneo de Manila University since 1996. Currently she is the Associate Dean for Research and Creative Work of her university, where she is primarily in charge of the Office of Research and Creative Work. She obtained her Phd in Mathematics from the University of the Philippines-Diliman in Algebra (Group Theory). She went to Sophia University, Japan in 1998 for post-doctoral studies and worked on Representation Theory of Finite Groups. Her research areas are Group Theory, Discrete Geometry, Mathematical Crystallography and Technology in Mathematics Education. She heads

three research labs in the University where she supervises Phd and Postdoctoral students, and works on government funded projects: Symmetries in Algebra and Geometry Lab, Mathplus Resources, and the Mathematics in Art, Culture and Creativity Residency Lab. Among her current research projects involve the creation and dissemination of mathematical resources and technology applications to support online and blended learning in Grades 1 to 11 during the time of the pandemic; and the mathematical analysis of Philippine baskets. Her numerous projects in the past years focusing on methods of analysis of Philippine cultural heritage has resulted in several consultancies with Philippine museums and national cultural agencies. Moreover, Prof. De Las Peñas through her work on the Mathematics of Philippine Indigenous Artwork, has enabled the empowerment and support for Philippine women weavers and artists.

Prof. De Las Peñas is a recipient of several research awards including the National Research Council of the Philippines (NRCP) Achievement Award in the Mathematical Sciences and the Philippine Commission on Higher Education Republica National Research Award. She has published her research extensively in international and national Scopus/Web of Science indexed journals, book chapters, international conference publications; and a number of her published articles have been given recognition by the Philippine National Academy of Science and Technology (NAST) as outstanding scientific papers. One of Prof De Las Peñas journal articles, *The Enigmatic Geometric Tattoos of Butbut of Kalinga, Philippines* was listed as one of the notable writings in the book *The Best Writings on Mathematics 2020* by the Princeton University Press.

She has served as dissertation/thesis adviser to about 39 graduate students including 11 Phd students.

Prof. De Las Peñas is currently the Vice Chair and Executive Member of the International Union of Crystallography (IUCR) Mathematical and Theoretical Commission, and is an International Program Committee Member of the Asian

Technology Conference in Mathematics (ATCM). She is currently the column editor of *The Mathematical Tourist* of the journal *The Mathematical Intelligencer* and member of the Editorial Board of the *Electronic Journal of Mathematics and Technology (EJMT)*.

Due to her significant contributions to science and mathematics, A children's book has been written about her "Rigid Motion: A story about Ninette De Las Peñas" as one of the 10 women of science in the Philippines in 2017.

Field-1 : Partial differential equations  
Field-2 : Chemical reaction network theory  
ID Scopus : 36006454100  
ID Orcid : 0000-0003-0969-3010  
ID Google Scholar : LzMyZbcAAAAJ&hl=en  
*h*- index Scopus : 5

### **Short Biography**

Editha C. Jose is an associate professor and the current director at the Institute of Mathematical Sciences and Physics, University of the Philippines (UP) Los Baños. She finished her bachelor's and master's degree in Mathematics from the UP Los Baños and a PhD degree in Mathematics from the UP Diliman in 2010. Her dissertation entitled "Asymptotic Behaviour of a Parabolic Problem with an Imperfect Interface" was completed at the University of Rouen, France under a Sandwich program of UP.

She is the past president of the Mathematical Society of the Philippines CALABARZON chapter and now sits as a board member of the Mathematical Society of the Philippines National. In 2016 and 2017, she was awarded the College Outstanding Senior Faculty and University's Outstanding Teacher in the Physical Sciences (Senior Category), respectively. Her research outputs earned her the UP Scientist 1 distinction from 2017-2019 and a candidate for renewal of the award for the period 2020-2022.

She is particularly involved as one of the proponents and organizers of the annual International Workshop on Mathematical Biology which started in 2018. The workshop conference initiated by local mathematical biologists aims to stimulate young mathematicians of possible inter-disciplinary research directions in mathematics and biology. On the other hand, together with her collaborators from France, India and the USA, they are co-organizing a biennial summer school (since 2017) in multi-scale analysis and homogenization.

Her research interests revolve around three fields: the homogenization and control of partial differential equations; chemical reaction network theory; and biomathematics. She is a fun-loving, smiling face mother to her five children and her countless students. She aspires to be an inspiration to mankind, in particular, for women, that hard work and perseverance always pay off.

## Research and Publication

Research works of Dr. Jose can be classified into three main areas, namely, homogenization and controllability of partial differential equations, chemical reaction network theory and biomathematics.

The list of her publications can be found in her google scholar page:  
<https://scholar.google.com/citations?user=LzMyZbcAAAAJ&hl=en>

ID Google : pwzgQTwAAAAJ&hl=en  
Scholar  
*h*- index Scopus : 6

**Short Biography**

Angelyn R. Lao is currently an Associate Professor in the Mathematics & Statistics Department and the Assistant Dean for Research & Advanced Studies of College of Science at De La Salle University (DLSU). She joined DLSU after the completion of her Doctorate degree in Systems Biology at the University of Rostock (Germany). She obtained her BS and MS degree in Mathematics at DLSU. She held a Research Fellowship (2015-2019) and two Professorial Chairs in Mathematics namely the Br. C. John Lynan FSC Professorial Chair in Mathematics and the Br. Albinus Peter FSC Professorial Chair in Mathematics (2018-2023). Together with her co-authors, they received the Outstanding Scientific Paper Award given by the Philippines National Academy of Science and Technology (2020). Several of her most notable publications include her work on establishing the first mathematical and compartmental models to describe and analyze

the influence of the receptor SORLA in the amyloidogenic processing of Alzheimer's disease. Her recent works apply chemical reaction network theory, bioinformatics and machinelearning approaches to study and discover the patterns in the topological structures of the disease networks, and identify biomarkers associated to different diseases.

Dr. Lao has been actively attending conferences, workshops and summer schools as a means for continuous learning, and to keep abreast on the latest developments in the field of systems biology and related fields. She has presented her work in several prestigious conferences such as the International Congress of Mathematics, International Conference on Systems Biology, Annual Convention of the Mathematical Society of the Philippines, Annual Meeting of the Society of Mathematical Biology, and International Congress for Industrial and Applied Mathematics. She also engages in sharing her knowledge and resources with the research community and wider society by organizing and giving training workshops. She is one of the few selected female mathematicians who have received from the International Mathematical Union travel grants (NANUM in 2014 Korea & Open Arms in 2018 Brazil) to attend the International Congress of Mathematicians where the Fields Medals in Mathematics are awarded.

She plays an active role in contributing further to the local research scene. She has been invited by different universities, meetings, and conferences to give talks and lectures. To support and empower female students, she has been organizing workshops, lecture series, and conferences that provide platforms for women in science to talk about their research and build linkages with other women in STEM.

She was able to independently establish and lead two Research Units under

De La Salle University's Center for Natural Sciences and Environmental Research (CENSER): the Mathematical and Statistical Modeling Research Unit (MaStMod) and the Systems and Computational Biology (SComB). As the unit head, she was able to build linkages and collaborations among members and students of MSMU to other research units under CENSER. This boosted research productivity and publication output of the Mathematics & Statistics Department.

Since 2014, as a mentor, she has already mentored 29 mentees (18 are female). For undergraduate thesis, students have the option to do it by pair. Whereas for graduate thesis/dissertation, this has to be done by the student independently. Out of the 29 mentees, she has supervised 13 undergraduate theses and 9 graduate level theses (4 completed and 5 still ongoing). Most of her students (even before completion of their theses) were able to present their works in local or international conferences and publish in reviewed and abstracted journals. She helps undergraduate and graduate students to gain confidence in presenting their ideas. She supports and empowers female students, colleagues and other women in STEM by providing them with the

foundation they need, a strong support system, and proper opportunities so that they, too, can become independent and competent professionals.

### Research and Publication

Her research focuses on establishing mathematical theorems and models to understand and analyse complex biological systems. Her research addresses various health disease problems by proposing preventive measures and control strategies, which are relevant to health preventive.

Her list of Publications can be found at:

<https://scholar.google.com/citations?user=pwzgQTwAAAAJ&hl=en&oi=ao>

h- index Scopus : 3

**Short Biography**

Dr. May Anne E. Mata obtained her Bachelor of Science degree in Applied Mathematics (major in Operations Research) at the University of the Philippines (UP) Mindanao (Davao) where she graduated *cum laude*, a Best Special Problem awardee and a class valedictorian in 2007. In 2011, she was awarded a Master of Science degree in Applied Mathematics at the University of Washington (Seattle) as a fellow under Ford Foundation International Fellowship Program. She then started her journey in

modeling biological systems as a PhD Mathematics student at the University of British Columbia (UBC) Vancouver under the supervision of Dr. Leah Edelstein-Keshet, where she gained a two-year research experience on mathematical modelling with biochemical motifs, and analysis and simulations of intracellular actin waves using differential equations. She continued her doctoral study in UBC Okanagan and, in 2017, she was conferred a PhD degree in Interdisciplinary Studies (theme: mathematical biology) with a dissertation entitled “Avian influenza epidemic recurrence and approximate stochastic models”.

At present, she is serving as a tenured associate professor of applied mathematics and chairperson in the Department of Mathematics, Physics, and Computer Science at the University of the Philippines Mindanao. This year she was awarded the *Gawad Chanselor sa Pinakamahusay na Guro for Senior category (Chancellor’s award for being the best professor in UP Mindanao)* in the same institution. She has also been actively involved in various government-funded research projects as a project and study leader and recently been appointed as fellow in UP Resilience Institute.

Dr. Mata is the program leader of the Department of Science Technology Niche Center for R&D (NICER) in Applied Modeling, Data Analytics, and Bioinformatics for Decision Support Systems in Health. In terms of extension services, Dr. Mata is leading the Interdisciplinary Applied Modeling team in UP Mindanao in providing technical assistance to the Department of Health in Region XI (DOH XI) and is a member of the DOH XI Regional Adverse Event following Immunization Review committee. Dr. Mata has also served as consultant for the development of a COVID-19 game entitled, “In the Time of Pandemia”. She also served as chair in organizing the 4<sup>th</sup> International Workshop on Mathematical Biology (virtual meeting) held last June 9-11, 2021.

Outside the academe, Dr. Mata enjoys traveling with family and friends, mentoring, ministering, watching sci-fi movies, playing video games, and making music. She was a local rap artist and was known for her hit-maker original Visayan rap song entitled “Gugmang Uros-Uros” way back in 2004. Her rap theme has changed, however, and she is now interested in making songs/raps that promote health, wellness, and faith-based upliftment.

### **Research and Publication**

Professor Mata’s has written papers in the theme of infectious disease modelling and other mathematical sciences. Her work has been used to support decisions of local policy makers in the area of health.

Her list of publication can be found on this link:

[https://scholar.google.com/citations?hl=en&user=0\\_Nsj9QAAAAJ](https://scholar.google.com/citations?hl=en&user=0_Nsj9QAAAAJ).

**Short Biography**

Born on 02 June 1965, Agnes Paras is Professor of Mathematics at the Institute of Mathematics, College of Science, University of the Philippines Diliman (UPD).

She completed her BS and MS Mathematics degrees at the University of the Philippines Diliman and PhD Mathematics degree at the University of Wesleyan, Connecticut, USA in 1993 under the supervision of James Reid. Her dissertation was on Aspects of Abelian Groups as Modules over their Endomorphism Rings. She resumed teaching at the University of the Philippines Diliman in 1993. Under a DAAD grant, she later completed two years of post-doctoral research at the University of Essen, Germany under Rudiger Göbel through a DAAD scholarship.

Dr. Paras is one of the leading algebraists in the country. She started her research in infinite abelian groups, and ring and module theory. She eventually shifted her focus to matrix analysis, an area combining matrix theory and complex analysis, concentrating on the algebraic aspects of matrix theory. She is the current Head of the Matrix Analysis and Linear Algebra Academic Group at her Institute.

Professor Paras received the Research Achievement Award from the National Research Council of the Philippines in 2008 and the Outstanding Young Scientist Award from the National Academy of Science and Technology (Philippines) in 2003. She was an invited speaker at the 2009 Asian Mathematical Conference in Kuala Lumpur. In 2020, she assumed the post of Editor-in-Chief of the Matimyas Matematika: the Official Journal of Mathematical Society of the Philippines, after serving for many years on the Editorial Board.

**Short Biography**

Dr. Arlene A. Pascasio is a Full Professor of Mathematics at De La Salle University. She obtained her PhD in Mathematics at University of the Philippines in 1991 under a government scholarship program. Her dissertation research on inherited arcs and derived conics in Hall planes of odd order was conducted at the University of Western Australia under the supervision of Dr.

Christine O'Keefe. From geometry, she developed an interest in algebraic combinatorics. She became an Honorary Fellow at the University of Wisconsin in Madison in 1996-1997 for a postdoctoral training under the mentorship of Professor Paul Terwilliger.

Dr. Pascasio studies distance-regular graphs using algebraic tools such as tridiagonal pair, Terwilliger algebra and tetrahedron algebra. Dr. Pascasio was recipient of the 2001 National Research Council of the Philippines Achievement Award in the Mathematical Sciences Division.

She served as Chair of the Mathematics Department (1993-1995), Dean of the College of Science (2012-2015), and Head of the Society of University Fellows (2018-2020). Her recent community engagement includes serving as Department of Education Consultant in Mathematics, Curriculum Development for a Unified Science Program in the Philippines (2017 – present), Mathematics Consultant, Philippine Science High School System Test Item Development for Readiness Exam and National Competitive Examination (since 2016), Member of the Technical Panel, Mathematics-Teachers'-Association-of- the-PhilippinesMetrobank-Department-of-Education Math Challenge (since 2015). She served as member of the Mathematical Society of the Philippines for two terms, and currently co-editor of its official journal, Matimyas Matematika.

**Short Biography**

Born on 21 February 1968, Carlene Pilar-Arceo is a Professor of Mathematics at the Institute of Mathematics, College of Science, University of the Philippines Diliman (UPD). She joined UPD in 1988 and completed her MS Applied Mathematics and PhD Mathematics degrees there, aided by a 2-year research stint at Waseda University in Tokyo, Japan, for her dissertation, *On a Parabolic Equation with Singularity on the Boundary*. Her current research interests include mathematical modeling, optimization and mathematics education. She heads the Modeling and Applications academic group of the Institute.

Professor Arceo is a two-time recipient of their University's Outstanding Teacher Award (*Gawad Tsanselor Natatanging Guro 1993, 2004*). She has also been awarded research and scholarship grants from Monbusho and the

Department of Science and Technology as well as professorial chairs and faculty grants from their University. A recent paper she co-authored was chosen as an Outstanding Scientific Paper (202) by the National Academy of Science and Technology. Aside from publishing scientific papers, Professor Arceo has also published several popular math articles and co-authored a series of math textbooks for high school and elementary students. She also actively participates in extension work nationwide and in the ASEAN Region.

Professor Arceo has also held a string of administrative positions, including a just-completed her term as the Director of the Institute of Mathematics, before which she was the Director of the General Education Center Diliman. Currently, she is the Director of the Office of International Linkages Diliman, a member of the National Board of the Mathematical Society of the Philippines, and the Philippine representative to the International Commission on Mathematical Instruction of the International Mathematical Union.

### Research and Publication

Published work of Professor Arceo includes papers on partial differential equations, nature-inspired optimization, mathematical modelling, particularly on epidemics, biochemical systems, and chemical reaction networks. They may be accessed through the various IDs listed above.

**Short Biography**

Dr. Roque, born in San Fernando, Pampanga on June 3, 1965, has been teaching in the University of the Philippines since 1989. Her research interests are in the areas of ordinary and partial differential equations, mathematical modeling and applications. She obtained her undergraduate, master's and doctoral degrees in mathematics from the University of the Philippines. Her PhD program was completed under a sandwich program at the University of Essen, Germany under the supervision of Bernd Schultze.

Her publications include two graduate textbooks in partial differential equations co-authored with two renowned international experts. The book is now being used in the country and in universities in France and Italy. She has successfully mentored numerous students at all levels, several of whom have finished their PhDs and are now productive

researchers themselves. She has held visiting professor and visiting researcher positions in universities in Japan, Germany and France.

She has occupied key positions in research and professional organizations here and abroad. These include election as member of the Executive Committee of the international research agency *Centre International de Mathématiques Pures et Appliquées* (CIMPA) and President of the Mathematical Society of the Philippines. She has also served two terms as Director of the Institute of Mathematics, UP Diliman. She is currently the Associate Dean for Facilities and Resource Management at the College of Science of UP Diliman. She has also served as Associate Dean for Student and Public Affairs. Dr. Roque is active in fostering international linkages especially in Taiwan and in Europe, and has coordinated two Erasmus Mundus programs. She has also been active in extension work, particularly teacher-training programs.

She has received various awards such as the UP Scientist I award, in recognition of her excellent research outputs, and the Gawad Chanselor (Natatanging Guro) from UP Diliman – the most prestigious faculty award that is given for over-all excellence in teaching, research and extension/service to the university and the country. The National Research Council of the Philippines bestowed on her the Achievement Award (for Mathematical Sciences) for her lifetime contributions to research. Dr. Roque has also twice received the Outstanding Publication Award from the National Academy of Science and Technology.

**Short Biography**

Jocelyn Paradero Vilela is a Professor of Mathematics at the Department of Mathematics and Statistics, College of Science and Mathematics, MSU-Iligan Institute of Technology, Mindanao, Philippines since 1997. She was born in Bansarvil, Kapatagan, Lanao del Norte on July 26, 1975. She got a Ph.D. degree in Mathematics at the University of the Philippines, Diliman, Quezon City in the Philippines in the year 2005 with the Ph.D. thesis entitled On Quasi-Regular Torsion-free Modules. Sixteen years after her Ph.D., she handles algebra related graduate courses, supervises

graduate thesis and dissertation and do research in hyperstructure theory. She also collaborated with Prof. Bijan Davvaz of Yazd University, Iran, Prof Rozbeh Hazrat of Western Sydney University, Australia and Prof. Wolfgang Bock of University of Kaiserlautern, Germany in advising some of her research students.

Professor Vilela availed of the Department of Science and Technology-PCASTRD and Jose Maria Feliciano Foundation Scholarships during her PhD studies and availed several CIMPA School grants. Her dissertation also was one of the two finalist in the 2005 DOST Best Dissertation Award in Mathematics. She is also a consistent faculty research awardee in her institution, MSU-IIT. As of this year, she has published 32 papers in an International/National Refereed Journal of Mathematics. She served as scientific paper reviewer of some international journals such as the Italian Journal of Pure and Applied Mathematics, European Journal of Pure and Applied Mathematics, Afrika Matematika, and Computational and Applied Mathematics; and also national journals such as Asia-Pacific Journal of Science, Mathematics and Engineering of MSU\_IIT, Surigao del Sur State University Multidisciplinary Research Journal, PRISM Journal of NORSU, and Journal of Multidisciplinary Studies of Misamis University, She is also an external examiner of Ph.D. defense at Negros Oriental State University, Dumaguete City and University of Science and Technology of Southern Philippines, Cagayan de Oro City.

Prof. Vilela also has experiences in the organization as the Chairperson of the Department of Mathematics and Statistics, CSM, MSU-Iligan Institute of Technology in 2013-2015, member of the Mindanao State University System Curriculum Committee, and is currently the Acting Institute Registrar since June 2019. For the mathematical society, Prof. Vilela was the treasurer of the Mathematical Society of the Philippines Regions 10, 12 & ARMM in 2008-2019 and a Mathematical Olympiad Coordinator for Regions 10, 12 & ARMM in 2010-2013. She also served as Commission on Higher Education National Trainer in Mathematics for STEM Education Program in 2017.

### **Research and Publication**

Professor Vilela's research is on Algebra and Hyperstructure Theory. Her mathematical works have been published in national and international journals.

Her list of Publications can be found at:

<https://scholar.google.com/citations?authuser=1&user=DWtbBWYAAAAJ>

**Short Biography**

Dr. Catherine P. Vistro-Yu is a professor and the Program Coordinator for Mathematics Education at the Department of Mathematics, School of Science and Engineering of the Loyola Schools, Ateneo de Manila University, Quezon City, Philippines. She has been influential in the design and implementation of the Master of Science in Mathematics Education and the Doctor of Philosophy in Mathematics Education degree programs offered in her department. Armed with her advanced degrees from The University of Georgia, USA (MEd in 1987 and EdD in 1991), Prof. Vistro-Yu has been teaching at the Ateneo's Department of Mathematics, since coming back from the USA in 1991.

Prof. Vistro-Yu is a prominent Mathematics Education expert in her country and is one of the well-known Asian woman mathematics educators, internationally. She broke the proverbial glass ceiling when she was elected to the Executive Committee of the International Commission on Mathematical Instruction (ICMI) in 2012 for a four-year term from January 2013 to December 2016. She was the first Philippine woman and only the second Philippine mathematics educator to be elected to the highest decision making body for international mathematics education matters. She served as the ICMI country representative from 2008 to 2016, extending her term to 2020 while waiting for a replacement. In 2015, she was the Chair of the 7<sup>th</sup> ICMI-East Asia Regional Conference on Mathematics Education (EARCOME 7) held in Cebu, Philippines. EARCOME is the conference series on mathematics education that evolved from the South East Asia Conference on Mathematics Education (SEACME) organized by the South East Asia Mathematical Society (SEAMS) from 1978 – 2002.

Recognized for her pioneering efforts in Philippine mathematics education, Prof. Vistro-Yu was awarded as one of The Outstanding Women in the Nation's Service in 2007. She was chair of the First Mathematics Teacher Education Conference in 1995, which drew more than 500 participants from all regions in the country. In 1996, Prof. Vistro-Yu and other like-minded mathematics educators in the Philippines formed the professional organization Philippine Council of Mathematics Teacher Educators (MATHTED), Inc., which has been at the forefront in initiating and implementing significant reforms in mathematics education, and specifically in mathematics teacher education. She was one of the first module writers for the PhD in Mathematics Education program offered by the University of the Philippines Open University. Prof. Vistro-Yu's most cited pioneering work was directing the project "Philippine Mathematics Framework for Basic (K-10) and Teacher Education Levels" for MATHTED and the Philippines' Department of Science and Technology Science Education Institute. This project produced two important documents that have guided mathematics teachers and teacher educators and have influenced educational policy makers at the national level. These were the Mathematics Framework for Philippine Basic Education and the Philippine Mathematics Teacher Education Framework, both published in 2011.

Prof. Vistro-Yu was instrumental in her department's recognition and eventual acceptance of mathematics education as an academic field deserving of respect and worthy of engagement equal to the field of mathematics. the work of an educator is not confined to the classroom. Prof. Vistro-Yu is also known and loved by the Ateneo's Department of Mathematics as an outstanding teacher, an inspiring mentor to younger mathematics teachers, helping set the research agenda for the Mathematics Education Research Group and giving workshops and tips on teaching strategies and assessment to less experienced teachers, as a fun-loving colleague and as an equally committed mother to her two daughters and wife to her husband. For Prof. Vistro-Yu, being a mentor has always meant "being present to your students in their educational journey." She has always believed that a teacher's availability to her students outside the

classroom, be it for consultations, extra teaching sessions, or heart-to-heart talks, plays a huge role in effective mentoring.

### Research and Publication

Prof. Catherine P. Vistro-Yu's most important scholarly publications are mostly chapters in themed-books: (1) D. M. B. Verzosa and C. P. Vistro-Yu, "Prospects and Challenges in Implementing a New Curriculum in the Philippines", In: Vistro-Yu C., Toh T. (Eds) *School Mathematics Curricula. Mathematics Education: An Asian Perspective*. Springer, Singapore, 2019, 207-226, International; (2) Verzosa, D., Tulao-Fernando, M. T., & Vistro-Yu, C. P. (2017). Congruence between context and opportunities for professional development of mathematics teachers in the Philippines. In B. Kaur, Kwon, O. N., & Leong, Y. H. (Eds.), *Professional Development of Mathematics*

*Teachers, An Asian Perspective*, pp. 89 – 96. Singapore: Springer; (3) VistroYu, C. P. (2009). Using Innovation Techniques to Generate 'New' Problems. In B. Kaur, B Yeap, & M. Kapur (Eds.), *Mathematical Problem Solving Yearbook 2009*, 185 – 207. Singapore: World Scientific; (4) Vistro-Yu, C. P. & Villena-Diaz, R. (2009). Teachers' Beliefs, Instructional Practices, and Culture: Understanding Effective Mathematics in the Philippines. In J. Cai, G. Kaiser, B. Perry & N. Wong (Eds.), *Effective Mathematics Teaching from Teachers' Perspectives: National and Cross-National Studies*, 183 - 202. Netherlands: Sense Publishers; (5) Vistro-Yu, C. P. & Irwin, K. C. (2007). The benefits and challenges for social justice in international exchanges in mathematics and science education. In B. Atweh, A. Calabrese Barton, M. Borba, N. Gough, C. Keitel, C. Vistro-Yu, R. Vithal (Eds.), *Internationalisation and Globalisation in Mathematics and Science Education*, 321 - 342. Netherlands: Springer; (6) Gates, P. & Vistro-Yu, C. (2003). Is mathematics for all? In A. J. Bishop, M. A. Clements, C. Keitel, J. Kilpatrick, & F. K. S. Leung (Eds.), *Second international handbook of mathematics education*, (pp. 31-73). Dordrecht: Kluwer Academic Publishers.

The book that Prof. Vistro-Yu edited with colleague Tin Lam Toh of Singapore, entitled *School Mathematics Curricula. Mathematics Education: An Asian Perspective* and published by Springer, Singapore in 2019 has been especially recognized by her university.

### Short Biography

Berinderjeet Kaur is a professor of mathematics education at the Nanyang Technological University. She graduated with a PhD in mathematics education from Monash University (Australia) in 1995. For the past 32 years she has been involved in the education of mathematics teachers in Singapore and her work has also contributed towards the development of teachers internationally. She is a leading mathematics educator in Singapore

### Research and Publication

Berinderjeet Kaur's research focusses on the teaching and learning of mathematics in grades 1-10 and the school mathematics curriculum. She has obtained research grants amounting to 6.8 million Singapore dollars for her research. She has delivered more than 60 keynote lectures. Amongst them are two outstanding ones, as they recognise her scholarship in mathematics education. In 2016, Berinderjeet was the first Singaporean to have had the honour of delivering one of the four plenary lectures at the 13<sup>th</sup> International Congress of Mathematics Education organised by the ICMI. To date, only 52 mathematicians and mathematics educators from around the world have been invited to deliver plenary lectures at these congresses. In July 2021 she also delivered one of the four plenary lectures at the 44<sup>th</sup> conference of the International Group for the Psychology of Mathematics Education (PME).

Again, she was the first Singaporean to have had the honour to do so. Both ICME and PME are the cornerstone academic meetings of mathematics educators. Her publications appear both in national and international publications. She has edited 17 scholarly books and authored 79 book chapters, 65 journal papers, 85 conference papers published in proceedings. In addition, she has also contributed in numerous ways, such as workshops, seminars, consultancies towards the development of mathematics teachers in Singapore and elsewhere.

**Short Biography**

I was born on 27 August 1949, Surat Thani in the South of Thailand. I graduated B.Sc. (Mathematics, 1<sup>st</sup> class honor), Chulalongkorn University, 1970. I had started working as a lecturer there since 1971. I graduated M.Sc. (Mathematics), Chulalongkorn University, 1973. I was awarded a scholarship from Chulalongkorn University to further study in 1978 and I obtained Ph.D. (Mathematics), University of North Carolina, Chapel Hill, USA, 1983.

I had continued teaching and become an assistant professors, 2 years later an associate professor. In the old days, there were a small group of professor in Mathematics, so I was an Invited lecturer at Thammasart University, Thai Chamber of Commerce

University, Bangkok University, KingMongkut Institute of Technology at Ladkrabang, during 1986 – 2001.

I have been involving with Royal Institute Dictionary Committee in Mathematics and had published 1 dictionary (Thai version), Royal Institute since 1990.

I was served as a deputy department head in foreign affairs during 1990 – 2001. I was appointed as Department Head during 2002 – 2006. I was chair of the graduate program in mathematics, 2007 – 2009.

I was Director of the Centre for Promotion of Mathematical Research of Thailand under Mathematical Association of Thailand (CEPMART) during 1996-1997, 2000-2009, an honorary member of CEPMART since 2010. I was a council member of SEAMS (South East Asian Mathematical Society) council since 1996. I was appointed as Vice President of SEAMS, 1998-1999, 2002-2003. I was appointed as President of SEAMS, 2006-2007.

After retirement (2014) I have been involving with the following activities:

#### **Invited speaker and International program committee of**

- the 6<sup>th</sup> - 10<sup>th</sup> International Conferences on Science and Mathematics Education for Developing Countries, Mandalay University, Myanmar November 2013 – 2017.
- the 11<sup>th</sup> and 12<sup>th</sup> International Conference on Mathematics and Mathematics education for Developing Countries, the National University of Laos, Vientiane, Laos November 2018 – 2019.

#### **Workshop leader**

- for undergraduate students, the preconference workshop of the 7<sup>th</sup> – 10<sup>th</sup> International Conferences on Science and Mathematics Education for Developing Countries, Mandalay University, November 2014 – 2017.
- for undergraduate students, graduate students and teachers the preconference workshop of the 11<sup>th</sup> International conferences on Mathematics and Mathematics education for Developing Countries, the National University of Laos, Vientiane, November 2018, October 2019, respectively.

#### **Others**

- Join a panel discussion on “Sharing Problems of Female Mathematicians in South East Asian Countries” at the Asian Women Mathematicians Forum, Indonesia, July 26, 2016.
- Give a short talk on “the role of women Mathematicians in Thailand” at the South East Asian Women Mathematicians Meeting (SEAWM2), Yogyakarta, Indonesia, July 30, 2019.

**Short Biography**

Patanee Udomkavanich is a professor in Algebra at Department of Mathematics and Computer Science, Faculty of Science, Chulalongkorn, BANGKOK, THAILAND. She was born in Songkhla, Thailand in 1954. She started working at the Department of Mathematics and Computer Science (named Department of Mathematics at that time), Faculty of Science, Chulalongkorn University, Bangkok, Thailand in 1977 just right after she got her M.Sc. in Mathematics from Chulalongkorn University. After that, she got a scholarship from Chulalongkorn University to study and got a Ph.D. in Mathematics in 1985 from The

Pennsylvania State University, USA. Her research area is Algebra, especially semigroups and coding theory.

She has experiences in the department as a Deputy Head of the department for Academic Affairs, Committee member of M.Sc. Program and of Ph.D. Program in Mathematics. She is also an external examiner of Ph.D. and M.Sc. defense for many universities. In addition, she was also a consultant for M.Sc. Program and Ph.D. Program in Mathematics in many universities.

She also has had contribution in other organizations, for examples, The Mathematical Association of Thailand under The Patronage of His Majesty The King as a committee member since 1993 and International Mathematics Olympiad Thailand.

### Research and Publication

Professor Udomkavanich's research is Algebra, especially, algebraic semigroups and coding theory. Her mathematical works have been published in national and international journals and books.

Her list of Publications can be found at: <https://math.sc.chula.ac.th/faculty/pattanee-u/>

**Short Biography:**

My current academic position is an Associate Professor of Statistics at Department of Mathematics and Computer Science, Faculty of Science and Technology, Prince of Songkla University, Pattani Campus since 2005. I was born in Songkhla Province on December 3, 1969. I got a Ph.D. degree in Research Methodology, Faculty of Science and Technology, Prince of Songkla University, Pattani Campus in the year 2009. My Ph.D. thesis entitle is "Statistical Methods for Modeling Incidence of Infectious Diseases Mortality and Length of Stay in Hospital for Patients Dying in Southern Thailand". Currently, my research interest is statistical modeling for public

health and environmental science including spatial-temporal analysis, time-series analysis, data science, machine learning.

**Short Biography**

Duangkamon Baowan is an associate professor in mathematics at Mahidol University, Thailand. She received her PhD in 2008 from the University of Wollongong, Australia. Her PhD research won her an outstanding thesis award from the National Research Council of Thailand in 2009. She was awarded Endeavour Postdoctoral Fellowships in 2009 and 2013 from the Australian Government, and received the Alexander von Humboldt Postdoctoral Fellowship in 2011. Furthermore, Dr. Baowan was awarded the accolade of Thailand's Young Scientist in 2013, and the World Academy of Sciences (TWAS) for the Advancement of Science in Developing Countries, TWAS Prize for Young Scientists in Thailand 2016 (Mathematics) from UNESCO.

In 2014, she was an ambassador of the 2014 International Congress of Mathematicians (ICM 2014) and its invitation program (NANUM 2014) held South Korea. Since January 2021, Dr. Baowan is an executive committee in East Asia Section of Society for Industrial and Applied Mathematics (EASIAM). Dr. Baowan also has experiences in the organization as a chair of the MSc program in Applied Mathematics (international program), a chair of the PhD program in Mathematics (international program), and a deputy head of the Mathematics department at the Faculty of Science, Mahidol University.

Dr. Baowan won awards in research grant since 2009 from both national and international funding agencies. Her past and present research works in the field of mathematical modelling are mainly focused on the energy and force distribution between organic and inorganic molecules. The aim of this study is to gain insight into the energy behaviours at a molecular level, and to reduce the time for a computational calculation.

## Short Biography

Petarpa Boonserm is an Associate Professor of Mathematics at the Department of Mathematics and Computer Science, Faculty of Science, Chulalongkorn University, Thailand, since 2010. She has published widely in the areas of differential equations, mathematical physics, general relativity, and nonrelativistic quantum physics. She is best known for her contributions, alongside Professor Matt Visser and Professor Silke Weinfurtner, in the development of several new transformation generating theorems that map perfect fluid spheres into perfect fluid spheres. In addition, one of her most well-known research is associated with the use of a technique called the Bogoliubov coefficients in deriving the rigorous bounds on the greybody factors for various black holes, including black holes in dRGT massive gravity, and the dRGT black strings.

She was born in Thailand on December 25, 1980. She had received the Royal Thai Scholarship to study in New Zealand where she completed her Ph.D. in Mathematics from Victoria University of Wellington in the year 2009, with a Ph.D. thesis entitled “Rigorous bounds on Transmission, Reflection, and Bogoliubov coefficients”.

She now focuses on conducting research and research supervision in groups of numerical theories, differential equations, applied mathematics and mathematical physics, including general relativity, greybody factors for black holes, and in the generation of perfect fluid spheres.

Associate Professor Boonserm has won awards and research grants since 2010 from various institutes, particularly grants for the professional development of new academic staff from the Ratchadapisek Somphot Fund at Chulalongkorn University, from the Thailand Toray Science Foundation (TTSF), the Research Strategic Plan Program (A1B1), Faculty of Science, Chulalongkorn University, and the ERASMUS MUNDUS (individual mobility programme sponsored by the European Community between Asian and European Universities) in the year 2011, the Thailand Research Fund (TRF), the Office of the Higher Education Commission (OHEC), and Chulalongkorn University (MRG5680171) for the year 2012-2014, the Ratchadapisek Sompoch Endowment Fund, Chulalongkorn University (Sci-Super 2014-032) for the year 2014-2015, the Thailand Research Fund (TRF), and by the Office of the Higher Education Commission (OHEC), Faculty of Science, Chulalongkorn University (RSA5980038) for the year 2016-2018, the Thailand Center of Excellence for the year 2018-2021 as a co-researcher in the project entitled “Developing Models of the Accelerating Universe from Theories Beyond Einstein’s Theory of Gravity”, in association with Associate Professor Khamphree Karwan from The Institute for Fundamental Study, Naresuan University, as a project leader.

Additionally, she is also an external and internal examiner for the Master and Ph.D. defense exams at certain universities in Thailand. Associate Professor Boonserm also has experiences in the organization as a Deputy Head of Research in the Department of Mathematics and Computer Science, Chulalongkorn University, since 2018-2021. Associate Professor Boonserm has won the Young Researcher Award from the Faculty of Science, Chulalongkorn University, in 2010, and the 18th

Science & Technology Research Grant, and a supporting grant from the Thailand Toray Science Foundation in 2011.

### Research and Publication

Associate Professor Boonserm's research focuses on ordinary and partial differential equations, applied mathematics and mathematical physics, including general relativity, greybody factors for black holes, and in the generation of perfect fluid spheres.

Her mathematical works have been published in national and international journals.

Her list of Publications can be found at:

<https://scholar.google.com/citations?user=uUfxdakAAAAJ&hl=en>

**Short Biography**

Puntani Pongsumpun is Associate Professor of Mathematics at Department of Mathematics, School of Science, King Mongkut's Institute of Technology Ladkrabang since 2004. She was born in Chiangmai. She got a Ph.D degree in Mathematics (International Programme) from Mahidol university, Thailand in 2004 with the Ph.D. thesis entitled Transmission model for dengue virus infection in Thailand. She now focuses on research and research supervision in Mathematical Modelling in epidemiology, Biomathematics, Differential equations, Numerical analysis,

Optimization and Control. Associate Professor Puntani has got The Royal Golden Jubilee Ph.D. program (RGJ), Research Fund (TRF), Thailand, 2001-2004. She has got Franco-Thai Project 20052008 and 2009-2010 from Commission on Higher Education Thailand, Research Fund and National Science and Technology Development Agency, Thailand, Ministry of Foreign Affairs and Ministry of Youth, Education and Research, France. She has got Research Grant for New Scholars from Commission on Higher Education and the Thailand Research Fund (TRF) 2006-2008, 2011-2013, 2014-2016, 2016-2018, KMITL Research Funding: Academic Melting Pot 2018, 2020 and many research grants from King Mongkut's Institute of Technology Ladkrabang. She was Assistant Dean in School of Science, King Mongkut's Institute of Technology Ladkrabang, 20132017. She got poster Best Paper award from 13<sup>th</sup> PATTAYA Int'l Conference on "Advances in Science, Engineering and Technology" (ASET-18), Pattaya (Thailand), 2018 and 20<sup>th</sup> PATTAYA Int'l Conference on Science, Engineering, Technology & Natural Resources (SETNR-20), Pattaya (Thailand ), 2020. She is the editor of Journal of Science Ladkabang and the Editorial Board of CAST(scopus index).

### Research and Publication

Associate Prof.Dr.Puntani's research is on the Mathematical Modelling in epidemiology, Biomathematics, Differential equations, Numerical analysis, Optimization and Control. Her mathematical works have been published in national and international journals. Her list of Publications can be found at:

**Short Biography**

Saifon Chaturantabut is currently an Associate Professor in Applied Mathematics at Department of Mathematics and Statistics, Faculty of Sciences and Technology, Thammasat University, Thailand, where she has joined since August 2013. She was born in Bangkok on May 22, 1982. She has won a scholarship from the Development and Promotion of Science and Technology Talents Project (DPST), Thailand, to study in the United States of America from Bachelor's degree through Ph.D. degree in the field related to Mathematics. She obtained her Bachelor's degree in Mathematics in 2005 and her Master's degree in operations research and industrial engineering in 2006 from Cornell University, New York, USA.

She received Master’s degree and Ph.D. degree in computational and applied mathematics from Rice University, Texas, USA, in 2009 and 2011, respectively. Her Ph.D. study was done under the supervision of Prof. Danny C. Sorensen with the thesis entitled *Nonlinear Model Reduction via Discrete Empirical Interpolation*. During her Ph.D. study in 2010, she has joined a research group at Delft Institute of Applied Mathematics (Delft University of Technology) in the Netherlands. During 2011–2013, she was a visiting assistant professor under the Patricia Ann Caldwell post-doctoral fellowship at the Department of Mathematics, Virginia Polytechnic Institute and State University, Virginia, USA. Her research interests include model reduction techniques for nonlinear dynamical systems, numerical linear algebra, numerical analysis, large-scale scientific computing, numerical optimization, and machine learning.

After joining the Department of Mathematics and Statistics at Thammasat University, Saifon Chaturantabut has taken part in establishing the Ph.D. program in Mathematics at Thammasat University. Since 2013, she has supervised many graduate students and several undergraduate senior projects in applied mathematics. She is now served as a Deputy Director for Administration and Finance of Special Program in Mathematics. She has been awarded a number research grants from Thammasat University during 2015-2021 and awarded new researcher grants from Development and Promotion of Science and Technology Talents Project and Thailand Research Fund during 2015-2019.

### Research and Publication

Saifon Chaturantabut's research is currently on nonlinear model reduction, numerical analysis, scientific computing, optimization, and machine learning. Her research works have been published in various international journals. A complete list of her publications can be found in her Google Scholar website below.

**Short Biography**

Usa Humphries is Associate Professor in the Department of Mathematics, Faculty of Science, King Mongkut's University of Technology Thonburi (KMUTT), Bangkok, Thailand. She was born in Ratchaburi Thailand on February 22, 1968. She graduated Ph.D. in applied mathematics from the University of Exeter, UK. She received the research fellowship in applied mathematics institute of atmospheric physics funded by the Chinese Academy of Sciences and the Academy of Science for the Developing World (CAS-TWAS) in 2005 and another postdoctoral fellowship funded by the University of Southampton, UK in 2001-2002. Her expertise is numerical oceanic and atmospheric modeling, modelling of biological processes, numerical methods, weather and climate change, data assimilation, and data analysis. She is the director of the KMUTT Research Center of Atmospheric and Oceanic Prediction (K@TOP), which contributes research on

the mathematical application of climate change and its effects. Some examples are the development of coupling atmospheric (WRF) and regional oceanic models (ROMS) for precipitation forecasting, the simulation of heavy rainfall, and the simulation of sea surface temperature. Moreover, the group is recently expanding to support the research on mathematical for agriculture, aiming to solve the challenge question, such as food demand and security. For example, the project focuses on rice blast disease simulation under combining atmosphere and soil conditions and other plant disease models that are being developed to become alternative tools for crop protection. Also, she continues to combine technology like image processing to contribute to the high value of research, helping solve real-world problems.

**Short Biography**

Kanokwan Sitthithakerngkiet is Associate Professor of Department of Mathematics, Faculty of Applied Science, King Mongkut's University of Technology North Bangkok, Thailand since 2013. She was born in Thailand on August 29, 1981. She got a Ph.D. degree in Mathematics at Naresuan University, Thailand in the year 2013 by Scholarship from Office of the Higher Education Commission, Thailand with the Ph.D. thesis entitled Thesis: Existence theorems of the generalized Ekeland-type variational principles and generalized quasi-equilibrium problems. She now focuses on research and research supervision in Group of Fixed Point Theory and Applications, Variational Inequality, Functional Analysis, Optimization Problems, Signal Recovering and Image Processing.

Associate Professor Kanokwan Sitthithakerngkiet has TRF Grant for New Researcher 2017-2019 from The Thailand Research Fund, research grant from King Mongkut's University of Technology North Bangkok 2015-2021, and Thailand Science Research and Innovation Fund, and King Mongkut's University of Technology North Bangkok 2021.

Associate Professor Kanokwan Sitthithakerngkiet has awards in **Outstanding New Researcher Award in Science and Technology 2017**, King Mongkut's University of Technology North Bangkok and **Outstanding Researcher Award in Science and Technology 2019**, King Mongkut's University of Technology

North Bangkok

### Research and Publication

Kanokwan Sitthithakerngkiet is currently at Intelligent and Nonlinear Dynamic Innovations Research Center, Faculty of Applied Science, King Mongkut's University of Technology North Bangkok (KMUTNB), Bangkok, Thailand. Her research is on Fixed Point Theory and Applications, Variational Inequality, Functional Analysis, Optimization Problems, Differential Equations, Signal Recovering and Image Processing. Her mathematical works have been published international journals and list of Publications can be found at:

**Short Biography**

Pattarasinee Bhattarakosol is an Associated Professor of Computer Science at Department of Mathematics and Computer Science, Faculty of Science, Chulalongkorn University, Thailand since 1986. She received her B.Sc. in Mathematics, M.Sc. in Applied Statistics, and Ph.D. in Computer Science. Her major research is related to software engineering and computer network design where statistical methods have been applied to support the assumption of the experiments. Moreover, she applied her knowledge in mathematics and statistics to develop a mechanism for lung checking and then signed as Chulalongkorn's license, including develop to be a software named as "Lung Care" which was loaded in Google Play Store Last year.

Moreover, she also applied her knowledge in mathematics to develop network flow architecture for an equipment that will be used for bedridden patients. This equipment and the design of algorithm were granted for Chulalongkorn patent on the year 2019.

Assoc.Prof.Dr. Pattarasinee Bhattarakosol has been invited as editor of many international journals, both in ISI web of knowledge and Scopus. Moreover, she has been involved as a committee in many research granting and evaluating of various organizations. In addition, she was invited to be a guest lecturer at many universities, both government and privates.

### Short Biography

Chinviriyasit is Associate Professor of Applied Mathematics at Department of Mathematics, Faculty of Sciences, King Mongkut's University of Technology Thonburi (KMUTT), Thailand since 2010. She was born in Khon Kaen on January 23, 1968. She got a Ph.D. degree in Applied Mathematics at Brunel University, United Kingdom, in the year 2003 with the Ph.D. thesis entitled "Spatio-temporal numerical modelling of whooping cough dynamics". She now focuses on research and research supervision in a Group of mathematical epidemiology and biology which focuses on Epidemiological Modelling including dynamical analysis, mathematical analysis, and constructing numerical modelling for solving differential equations. In 2015-2016, she received awards honoring of researcher who was able to publish the research results with the highest Impact factor in the Web of Science (WoS) database of the Department of Mathematics, Faculty of Science. King Mongkut's University of Technology Thonburi.

Chinviriyasit also focuses on constructing learning methods based on using active learning, problem-based, and project-based learnings in order to enhance the achievement of student's learning outcomes via the mathematical modelling process. In 2016, she received the prestigious award for outstanding learning and teaching, which was evaluated and approved by KMUTT assessment board. Now, she has achieved the status of Senior Fellow (SFHEA) in recognition of attainment against the UK Professional Standards Framework for teaching and learning support in higher education, which was evaluated and approved by Advance HE on October 9, 2020.

## Research and Publication

Chinviriyasit's research is on mathematical modelling, dynamical systems and its applications in epidemiology, and constructing numerical modelling for solving differential equations. Her mathematical works have been published in national and international journals.

Her list of publications can be found at:

<https://scholar.google.com/citations?user=J4dxVn0AAAAJ&hl=en>

**A. Personal Statement**

My research focus has always been related to environmental topics. The two specialties, combinatorial optimization and mathematical modelling, that I have been known for the last 10 years are self-trained. My work during my PhD though closely done on environmental issues was merely nonlinear nonconvex optimization and systems of difference equation. Right now I am pretty open to any application of optimization problems that others have trouble solving. Sometimes the answers are simple to people in the area. For times to times, tailored algorithms are needed to tackle the problems. The pleasure in the doing is why I am here for.

**B. Director of Research Plans**

2019-2022: Effects of population, rainfall and water management systems on main crop Productions. (Excellence Centre in Mathematics: 3.0 MBaht)

2017-2020: Clustering and location routing problems with distribution centers. (Thailand Research Fund: 1.4 MBaht)

2017-2020: Research and Development on Renewable Energy for Secure, Reliable and Affordable Energy. (Excellence Centre in Mathematics: 8.86 MBaht)

2016-2019: Atmospheric Modeling Related to Northern Thailand Utilizing Control Theory, Efficient Numerical Scheme and Large-scale Optimization Techniques. (Excellence Centre in Mathematics: 13.5 MBaht)

### **C. Selected Peer-reviewed Publications**

Phonin, S., Likasiri, C., 3-Phase Heuristics for Capacitated Multiple-depot Vehicle Routing Problem with Separate Backhaul and Linehaul with a Case Study on Corn Residue Management System, *Computers & Industrial Engineering*, 2021, 158, 107395. (IF 4.135)

**Short Biography**

Phantipa Thipwiwatpotjana is an Associate Professor of Mathematics at the Chulalongkorn University, Bangkok, Thailand. She received her Ph. D. in Applied Mathematics from the University of Colorado Denver in 2010 for the dissertation titled “Linear programming problems for generalized uncertainty”. She received scholarships from the Development and Promotion of Science and Technology Talents Project and Thai Government to study Mathematics for both undergraduate and graduate levels. Her primary research interests are in optimization under uncertainty, uncertainty relationship, and their applications.

## Research and Publication

Assoc. Professor Thipwiwatpotjana recently interests in the research work on optimization with interval information. Her list of Publications can be found at:

## Short Biography

Associate Professor Dr.Surattana Sungnul is a professor at the Department of Mathematics, Faculty of Applied Science, King Mongkut’s University of Technology North Bangkok, Thailand. She was born in Bangkok on February 1, 1974. She graduated with a Ph.D. in Applied Mathematics at the Suranaree University of Technology, Nakornratchasima, Thailand in the year 2006 under supervisor Professor Nikolay Moshkin and the Ph.D. thesis entitled Numerical Simulation of Fluid Flow Past Self-propelled Body. Her research interests are in the field of Numerical Analysis, Computational Fluid Dynamics, Mathematical Modeling and Optimization.

## Research Training

- Research Training on Numerical Simulation of Fluid Flow past Self-Propelled Body with Professor Yong Hong Wu at Curtin University of Technology, Australia (February – May 2004).
- Research Training on Numerical Simulation of Laminar Flow over Two Rotating Circular Cylinders with Professor Graeme Wake and Professor Robert McKibbin at Massey University, New Zealand, (March – May 2007).

#### Short Biography

Vimolrat Ngamaramvaranggul is Associate Professor of Applied Mathematics at Department of Mathematics and Computer Science, Faculty of Science, Chulalongkorn University, Bangkok, Thailand since 1996. She was born in Bangkok, Thailand on June, 10 1962. In 2000, she was awarded her PhD in Computer Sciences from the University of Wales Swansea with the Ph.D. thesis entitled "Numerical Simulation of Non-Newtonian Free Surface Flows". She now focus on research and research supervision in Computational Fluid Dynamics, Element Stretching, Extrudate Swell, 4 to 1 Contraction Flow, Free Surface Flows, Viscoelastic Fluids, Die-Swell Problem, Simulation of Wire Coating Problems, Numerical Method, Finite Element Method.

Assoc. Prof. Ngamaramvaranggul had ever been a managing director of APAN (Asia-Pacific Advanced Network) Secretariat since 2007-2009. APAN is an Internet networking consortium. Founded in 1997 and it was designed to promote advanced research in networking technologies and the development of high-performance broadband applications.

Assoc. Prof. Ngamaramvaranggul was a consultant of Marine Department, Ministry of Transport, Thailand for the development project of data management information system to

support the internal safety audit under International Maritime Organization (IMO) during the period from July till December 2020. Now, she is professional skills for dangerous goods regulation instructor.

### Research and Publication

Assoc. Prof. Ngamaramvaranggul's is on the Numerical Simulation of viscoelastic fluids for stick-slip, die-swell, wire coating and 4 to 1 contraction problems. Her mathematical works have been published national and international journal and book.

#### Short Biography

Imchit Termwuttipong is a professor in Analysis at Department of Mathematics and Computer Science, Faculty of Science, Chulalongkorn University, BANGKOK, THAILAND since 1994. She was born on April 20, 1953. She got a Ph.D. in Mathematics in 1986 from Chulalongkorn University, Thailand. She first worked at the Department of Mathematics, Faculty of Science and Industrial Education, King Mongkut's University of Technology Thonburi, Bangkok, THAILAND in 1987 then moved to the Department of Mathematics and Computer Science, Faculty of Science, Chulalongkorn University, BANGKOK, THAILAND in 1993. Her research area is Analysis, especially nonlinear analysis and fixed point theory.

Assoc. Prof. Termwuttipong also has experiences in the first organization as a Head of the Department of Mathematics in 1987 and a Deputy Dean of the Faculty of Science and Industrial Education for Graduate Studies in 1992. At Chulalongkorn University, she served as a Deputy Head of the Department of Mathematics and Computer Science for Academic Affairs in 1996 – 1999, a Chair and a committee member of M.Sc. Program and of Ph.D. Program in Mathematics for many years. She is also an external examiner of Ph.D. and M.Sc. defense for

many universities. In addition, she is a consultant for M.Sc. Program and Ph.D. Program in Mathematics in many universities. Nevertheless, she has been not only a committee member of The Mathematical Association of Thailand under The Patronage of His Majesty The King but also a committee member of Mathematics Dictionary Committee and of Science Dictionary Committee of the Royal Society (since 2020 and 2015, respectively) until now.

### Research and Publication

Assoc. Prof. Termwuttipong's research is in Analysis;- nonlinear analysis and fixed point theory. Her mathematical work was published in national books and international journals.

#### Short Biography

Chariya Uiyasathian is the Associate Professor of Mathematics at Department of Mathematics and Computer Science, Faculty of Science, Chulalongkorn University, Thailand since 2004. She got an M.S. in Mathematics from Department of Mathematics, University of Illinois at Urbana-Champaign, USA in the year 1998, and received a Ph.D. in Applied Mathematics from Department of Applied Mathematics, University of Colorado at Denver, USA in the year 2003 with her Ph.D. thesis entitled Maximal-clique Partitions. She now focuses on research topics in graph theory and combinatorial designs.

#### Research and Publication

Associate Professor Chariya's research is on graph theory and combinatorial designs. Her list of publications can be found at: <https://math.sc.chula.ac.th/en/faculty/chariya-u/>

**The best five recent publications in journals and/or books**

**Short Biography**

Kitiporn Plaimas is a lecturer at Department of Mathematics and Computer Science, Faculty of Science, Chulalongkorn University, Thailand since 2012. She was born in Bangkok on October 26, 1980. She earned her bachelor's degree in Mathematics at Mahidol University, Thailand, in 2002 with first class of honor. She graduated a master's degree in Computational Science at Chulalongkorn University, Thailand, in 2005, and got a doctorate in Applied Mathematics and Computer Science at Heidelberg University, Germany, in 2011. Her dissertation is entitled "Computational Analysis of the Metabolic Network of Microorganisms to Detect Potential Drug Targets", in which she developed and applied various mathematical and computational techniques into a machine learning. After that, she had worked at

Department of Bioinformatics and Functional Genomics, Institute of Pharmacy and Molecular Biotechnology (IPMB) and at Theoretical Bioinformatics, German Cancer Research Center (DKFZ), Heidelberg, Germany, in 2006-2011. During her bachelor and master studies, she had been supported by the Development and Promotion of Science and Technology Talents Project (DPST) from the Institute for the Promotion of Teaching Science and Technology (IPST), Thailand. She had won a Higher Educational Strategic Scholarship for Frontier Research Network (SFR) (for Mathematics Subject) from the Commission Higher Education, Thailand, for her PhD research and study in Germany.

In 2021, Kitiporn Plaimas received an Outstanding Mid-career Researcher Award from Faculty of Science, Chulalongkorn University. She is now working at Department of Mathematics and Computer Science, Faculty of Science, Chulalongkorn University, Thailand. She teaches in a graduate program of Applied Mathematics and Computational Science at Department of Mathematics and Computer Science and teaches in a graduate program of Bioinformatics and Computational Biology at Faculty of Science, Graduate School, Chulalongkorn University, Thailand. Her research interest is in developing a new strategy and algorithm based on Mathematics and Computer science to model and analyse cellular mechanisms such as metabolic processes, signal transductions, and protein-protein interaction networks in several organisms: both prokaryote and eukaryote. She is also interested in drug repositioning, drug target identification, disease-related genes. Especially, most of her developed computational techniques are based on graph-based algorithm, machine learning, and mathematical modelling.

### Research and Publication

Kitiporn Plaimas's research is on developing a new strategy and algorithm based on Mathematics and Computer science to model and analyse biological systems. Most of the developed computational techniques are based on graph-based algorithm, machine learning, and mathematical modelling. Her list of Publications can be found at:

[https://scholar.google.com/citations?user=eIC\\_oKMAAAAJ&hl=en](https://scholar.google.com/citations?user=eIC_oKMAAAAJ&hl=en)

**Short Biography**

I have been an Assistant Professor in Bioinformatics at the Department of Mathematics and Computer Science, Chulalongkorn University since 2017. I received a Ph.D. degree in Bioinformatics from North Carolina State University, USA in 2012. My dissertation was entitled "On the SNP-based and Sequence-based Whole Genome Studies for Complex Traits". My current focus is on identifying genes involved in rare human diseases and salt tolerance in rice by analysing high throughput omics data, e.g. RNA sequencing or whole exome/genome sequencing and array-based technology data, e.g. methylation array or SNP array.

I contributed significantly to the team led by Prof. Dr. Vorasuk Shotelersuk that won the award for the title "Identification of a new human disease gene for epilepsy and an abnormal movement" from the National Research Council of Thailand in 2020. I also contributed substantially to another team led by Dr. Wichai Pornthanakasem that applied for a petty patent on an invention titled "ALK gene rearrangement detection technique in cancer cells" in 2020.

I have experience in the organization as a computer science program secretary for the undergraduate level from 2018-2021 and bioinformatics and computational biology program secretary for the graduate level from 2021- present. I have been a member of the committee of computer science and information technology for the graduate level from 2018-present and Omics Sciences and Bioinformatics center from 2016-present. I have also been a member of the steering committee of the Joint Conference on Computer Science and Software Engineering since 2021 and a member of the Thai Society of Human Genetics since 2019.

### Research and Publication

My research is on computational methods for gene/trait identification. My works have been published in national and international journals.

The list of my publications can be found at:

<https://scholar.google.com/citations?hl=th&user=sSIGUjEAAA&hl=en>

**Short Biography**

Nichaphat Patanarapeelert is a lecturer at Department of Mathematics, Faculty of Applied Science, King Mongkut's University of Technology North Bangkok, Thailand since 2009. She was born in Rayong, Thailand, on September 17, 1978. She got a Ph.D. degree in Mathematics from Mahidol University, Thailand, in the year 2009 with the Ph.D. thesis entitled Nonlinear Stability Analyses of a Model for Vegetation Distribution: Pattern Formation in Arid Environments. Now, her research areas are difference calculus and mathematical modelling.

### **Short Biography**

My name is Areena Hazanee, a lecturer at the Department of Mathematics and Computer Science, Faculty of Science and Technology, Prince of Songkla University Pattani Campus since 2009. My current academic position is an Assistant Professor of Mathematics which was promoted in 2020.

About my education, I received a scholarship namely the Project for The Promotion of Science and Mathematics Talent Teacher (PSMT) from The Institution for Promoting Science and Technology (IPST) for my Bachelor degree in Mathematics from Prince of Songkla University, Songkhla Thailand, and then continue my study at Chiangmai University, Chiangmai Thailand, for Master degree in Applied Mathematics. For my PhD degree I have got a scholarship namely the Royal Thai Government Scholarships Ministry of Science and Technology from The Ministry of Science and Technology, Thailand to study at University of Leeds, England, and received a PhD degree in 2015.

### **Research and Publication**

My Ph.D. thesis entitle is "Boundary Element Method for Solving Inverse Heat Source Problems" and my currently research interest is inverse problem, numerical methods, and differential equation. Now I have 8 research papers shown in SCOPUS in total and were cited 99 times.

**The best five recent publications in journals and/or books**

### **Short Biography**

Chanakarn Kiataramkul is Assistant Professor of Mathematics at Department of Mathematics, Faculty of Applied Science, King Mongkut's University of Technology North Bangkok, Bangkok, Thailand since 2012. She was born in Bangkok on May 1, 1982. She got a Ph.D. degree in Mathematics at Mahidol University, Bangkok in the year 2011 with the Ph.D. thesis entitled "Optimal Nutritional Strategies for Mammalian Development: A System Approach". She now focuses on Optimal Control Problem, Mathematical Modelling and Operations Research.

Asst. Prof. Dr. Chanakarn has won the outstanding academic record award from the Professor Dr. Tab Nilanidhi Foundation, Chulalongkorn University, Thailand in 2008. She got the scholarship from the Thailand Research Fund

through the Royal Golden Jubilee for studying the Ph.D. program at Mahidol University, Thailand in 2007-2011. And she got the fund from the National Research Centre for Growth and Development (NRCGD) when she did the research in New Zealand in 2010.

Asst. Prof. Dr. Chanakarn joined in the research groups funded from Centre of Excellence in Mathematics (CEM), Thailand with the program entitled “Mathematical Modelling and Simulation: Environmental Issues, Health and Food Assurance” and “Mathematical Modelling and Simulation for the Protection of Sustainable Economy: Optimal Farming Practices, Healthcare and Safety Assurance” in 2015-2018 and 2016-2019, respectively. She also worked as a research assistant in the project of Logistics and Supply Chain Management, Thailand in 2005 and 2007.

### Research and Publication

Asst. Prof. Dr. Chanakarn’s researches are on the Optimal Control Problem for farm animals and crops and also in Operations Research. Her mathematical works have been published in national and international journals and books.

Her list of Publications can be found at:

<https://scholar.google.com/citations?hl=en&user=1nIPdGYAAAAJ>

**Short Biography**

Jiraphan Suntornchost is an assistant professor in Mathematics at the Department of Mathematics and Computer Science, Faculty of Science, Chulalongkorn University, Bangkok, Thailand. She received her Master's degree in Mathematics from the Department of Mathematics, Faculty of Science, Chulalongkorn University, Thailand in 2003. Her thesis title is "A uniform bound in a combinatorial central limit theorem" under the supervision of Professor Dr. Kritsana Neammanee. In 2012, she received Ph.D. in Mathematical Statistics from the Department of Mathematics, University of Maryland, College Park, Maryland, USA. Her Ph.D. thesis title is "Analysis of

Models for Epidemiologic and Survival Data” under the supervision of Professor Eric V. Slud. Her dissertation focused on Statistical models for mortality data and lifetime data.

Currently, she works in various fields in probability theory and statistics such as small area estimation, time series data analysis, distribution theory, and actuarial science. Her research focuses on obtaining new statistical tools and techniques for variable selection, parameter estimations, and statistical hypothesis tests.

Jiraphan has supervised many research projects in the areas of probability, statistics, and actuarial science at both undergraduate and postgraduate levels. Moreover, she also served as a consultant for companies and organizations.

Alongside her supervisory roles for students and organizations, Jiraphan has also taught numerous courses in mathematics and statistics. The topics covered in the courses range from probability theory, mathematical statistics, foundation of applied statistics, Bayesian statistics, small area estimation, statistical methods, and mathematical foundation of actuarial science.

## Research and Publication

**Jiraphan’s research is on Mathematical Statistics, Probability Theory, and Actuarial Science. Her list of publications can be found at:**

**Short Biography**

Yaowaluck Khongtham is Assistant Professor in Mathematics at Faculty of Science, Maejo University since 2005. She was born in Chiang Mai, Thailand on January 8, 1966. She got Master degree in Mathematics at Chiang Mai University in the year 1993. She started working at Maejo University in the year 1993. She now focuses on research in Functional analysis, Fixed point theory, and Linear matrix inequality.

Asst. Prof. Yaowaluck also has experience in the organization as the head of

Department of Mathematics and Statistics, Faculty of Science, Maejo University, in 1997-2001. She was the Assistant Dean for administration of Faculty of Science, Maejo University, in 2001-2005.

## Curriculum vitae

**1. Name:** Wannasiri Wannasit

**2. Present position:** Assistant Professor of Mathematics, Chiang Mai University, Thailand

**3. Email:** wannasiri.w@cmu.ac.th

**4. Education:**

2001 – 2004     B.S.(Mathematics) Chiang Mai University, Chiang Mai, Thailand.

2005 – 2007     M.S.(Mathematics) Chiang Mai University, Chiang Mai, Thailand.

2008 – 2011     PhD. (Mathematics) Chiang Mai University, Chiang Mai, Thailand.

2012             Postdoctoral Research (Graph design) Illinois State University, IL, USA

2013             Postdoctoral Research (Graph design) University of Queensland, Brisbane, Australia

**5. FIELDS OF SPECIALIZATION:** Graph theory, Graph designs, Graph labelings

**6. ACADEMIC EXPERIENCES:**

**6.1 Lecturer:**

Department of Mathematics, Faculty of Science, Chiang Mai University, Chiang Mai, Thailand 2013 – 2016

**6.2 Assistant Professor:**

Department of Mathematics, Faculty of Science, Chiang Mai University, Chiang Mai, Bangkok, Thailand 2016 – present.

## 7. AWARD:

- 7.1 Research Scholar:** Thailand Research Fund, July 1, 2015 – June 30, 2017.
- 7.2 Research Scholar:** Thailand Research Fund, July 17, 2017 – July 16, 2019.
- 7.3 Visiting Scholar:** Department of Mathematics, Illinois State University, USA, June, 2018.
- 7.4 Research Scholar:** Thailand Research Fund, March 1, 2019 – February 28, 2021.

### **Short Biography**

Pakwan Riyapan is a lecturer of Applied Mathematics at Department of Mathematics and Computer Science, Faculty of Science and Technology, Prince of Songkla University, Thailand since 2005. She was born in Pattani on May 16, 1981. She got a Ph.D. degree in Applied Mathematics at University of Leeds, UK, in the year 2013 with the Ph.D. thesis entitled Mode Interactions and Superlattice Patterns. She now focuses on research about mathematical modelling with infectious diseases: Covid-19, rotavirus.

Dr. Riyapan also has experiences in the organization as a committee of International Seminar Research Methods in Practice 2021 (RMP2021) and the 13th Thailand Mathematics Olympiad organized by Faculty of Science and Technology, Prince of Songkla University in 2016.

## Research and Publication

Dr. Riyapan's research is on the mathematical modelling. Her mathematical works have been published in national and international journals and books.

Her list of Publications can be found at:

**Short Biography**

Tatdow Pansombut is a lecturer at the Department of Mathematics and Computer Science, Faculty of Science and Technology, Prince of Songkla University Pattani Campus since 2011. She received a Bachelor of Science and Master of Science degrees in Computer Science from Washington University in St. Louis and a Ph.D. in Computer Science from North Carolina State University. Her Ph.D. thesis title is “Advanced Learning Techniques for Improved Inference of Bayesian Belief Networks from Uncertain and High-dimensional Data”

## Experiences

### Study

- Oct 2011- **PhD Student**, INSTITUTE FOR MATHEMATICS, UNIVERSITÄT WÜRZBURG,  
Oct 2015 Under the supervision of **Prof. Dr. Alfio Borzi**, the research work is aimed at studying the modeling and controllability problems for multi-agent systems where focus on a flocking model. In addition, the presence of a leader in the system has been exploited in order to develop a control strategy for the flocking model to accomplish desired objectives. In collaboration with **Prof. Dr. Marco Caponigro**(Équipe M2N, Conservatoire National des Arts et Metiers, Paris, France), the research work deals with control strategies for the Hegselmann-Krause opinion formation model with leadership. In this system, the control mechanism is included in the leader dynamics and the feedback control functions are determined via a stabilization procedure and with a model predictive optimal control process (MPC). In collaboration with **Prof. Dr. Krzysztof Kulakowski** ( Faculty of Physics and Applied Computer Science, AGH University of Science and Technology, Kraków, Poland), the research work deals with control strategies for the Heider balance model with leadership. The Heider balance model describes the evolution of relationship in a social network. This differential model allows to insert a controlling agent to formulate an optimal control problem with the purpose to drive this model to desired relationship state. In this work, the stability, the local controllability, and the optimal control through leadership of this model are investigated. .
- 2011-2014 **PhD courses**, INSTITUTE FOR MATHEMATICS, UNIVERSITÄT WÜRZBURG, Germany.  
During my PhD I attended the following Lectures:
- Dynamische Systeme und Kontrolltheorie - (Dynamics and Control of linear Systems) - Examiner: Prof. Dr. Fabian Wirth;
  - Dynamik und Regelung Nichtlinearer Systems - (Dynamics and Control of Nonlinear Systems) - Examiner: Prof. Dr. Fabian Wirth;

### Activities

- June 2014 **six weeks working visit to Prof. Dr. Marco Caponigro**, ÉQUIPE M2N, CONSERVATOIRE NATIONAL DES ARTS ET METIERS, PARIS, France.  
This work is supported by the European Union under Grant Agreement Nr. 304617 'Multi-ITN STRIKE- Novel Methods in Computational Finance', by the European Science Foundation (ESF) Grant Science Meeting 4540

### Workshops and Conferences

- 2014 **Mini-Workshop in Stochastic Computing and Optimization**, WWCS - STRIKE - INSTITUTE FOR MATHEMATICS, UNIVERSITÄT WÜRZBURG, 1 - 2 October 2014, Würzburg, Germany.
- 2014 **Workshop: Lectures on Numerical Mathematics and Applications**, (*Courses of the series "Lectures on Numerical Mathematics and Applications"*) INSTITUTE FOR MATHEMATICS, UNIVERSITÄT WÜRZBURG, 27 - 28 August 2014, Würzburg, Germany.

2013 **Workshop: ESF OPTPDE Workshop InterDyn2013 Modeling and Control of Large Interacting Dynamical Systems**, UNIVERSITÉ PARIS-DAUPHINE AND CEREMADE (CENTRE DE RECHERCHE EN MATHÉMATIQUES DE LA DÉCISION), September 10 - 12, 2013, Paris, France.

2012 **ANTS 2012 : The Eighth International Conference on Swarm Intelligence**, UNIVERSITÉ LIBRE DE BRUXELLES, 12 - 14 September 2012, Brussels , Belgium.

### Talks

February, 18 2015 **Talk: Modeling and control through leadership of the multi-agent system**, (Part of the “project with Prof. Dr. rer. nat Klaus Schilling from Robotics and Telematics group”) UNIVERSITÄT WÜRZBURG, Würzburg - Germany.

July, 17 2014 **Talk: Modeling and control through leadership of a refined flocking system** , (Part of the “Joint oberseminar”) UNIVERSITÄT WÜRZBURG, Würzburg - Germany.

June, 04 2014 **Talk: Modeling and control through leadership of the multi-agent system**, ÉQUIPE M2N, CONSERVATOIRE NATIONAL DES ARTS ET METIERS, Paris - France.

September, 10 2012 **Talk: Modeling and control through leadership of a refined flocking system**, Université Paris-Dauphine and Ceremade (Centre De Recherche en Mathématiques de la Décision), Paris - France.

### Other work experiences

2004 - 2005 **Teacher**, INSTRUCTIONAL RESPONSIBILITY IN MATHEMATICS LECTURE FOR SECONDARY STUDENTS, San Sai School, Chiang Mai, Thailand.

2016-present **Lecturer**, DEPARTMENT OF MATHEMATICS, FACULTY OF SCIENCES, Chiang Mai University, Chiang Mai, Thailand.

---

### **Short Biography**

Ploy Naruemon Pratanwanich is a Faculty Member of the Department of Mathematics and Computer Science at Chulalongkorn University. She joined the University in 2017 after obtaining her PhD from the University of Cambridge. She has also worked with pioneering institutions including GSK, EBML-EBI, Sanger, Biogen, Takeda, on the Open Targets platform, an integrated data-driven target validation platform for drug discovery. In addition to the medical and pharmaceutical applications, she has applied machine learning techniques especially deep neural networks in other fields such as natural language processing, signal processing, finance, and property tech. Recently, she has expanded her research to quantum-inspired machine learning techniques and optimisations for quantum computing in the foreseeable future.

### **Research and Publication**

Pratanwanich's main research focuses on the design and development of machine learning techniques for medical and bioinformatics applications as well as other fields.

Her list of Publications can be found at:

### **Short Biography**

Le Thanh Nhan was born in 1970 in Vietnam. Nhan became a lecturer in Mathematics of Thai Nguyen College of Education in 1990 when she was 20 years old. She got her master degree at Hanoi University of Education in 1995, PhD degree at Hanoi Institute of Mathematics in 2001.

Nhan had worked as the head of Academic Department of Thai Nguyen College of Science from 2002 to 2009, Vice Rector of this College from 2009 to 2016 and Rector from 2016 to 2018. Then she has been working as a Director General of Vietnam Ministry of Education and Training since January 2019 till now.

Nhan has been conferred the title of Associate Professor in 2005, the title of Full Professor in 2015 and become one of the two women in the history of Vietnam receiving the title of Full Professor in mathematics (the first woman of Vietnam getting this title is Hoang Xuan Sinh, born in 1933, a former PhD student of A. Grothedick during the years 1970s').

## Research and Publication

Le Thanh Nhan's research field is Commutative Algebra. She is interested in the topics on local cohomology and structure of modules over commutative rings (Noetherian modules, Artinian modules, linearly compact modules).

Nhan has published 39 research articles on international reputed journals of mathematics, among them there are articles on Journal of Algebra, Proceedings of the American Mathematical Society, Journal of Pure and Applied Algebra, Journal of Mathematical Society of Japan, Communications in Algebra,... which attract the interests and citations of international researchers.

Following Mathscinet in May 2021, Nhan's MR Author ID is 656668 with h-index 9 and 292 citations.

Because of the above achievement, Nhan has received the Scientific Award given by Hanoi Institute of Mathematic in 2007. This highly-reputed national award is given every two years to at most two mathematicians of Vietnam, who are under the age of 40. Nhan was awarded the Kovalevskia Prize in 2011. This precious prize was founded in 1985 by prof. Neal Koblitz and his wife to honour women scientists in developing countries.

Nhan was selected to be a junior associate member from 2002 to 2007 and a regular associate member from 2009 to 2016 to do research at ICTP (Trieste, Italy). She has been selected to be a member of Scientific Committee in Mathematics for the terms 2009-2012, 2012-2015, 2015-2017 of Vietnam National Foundation for Science and Technology Development.

### Short Biography

Nguyen Thi Dung is a Professor of Algebra and Number Theory at Faculty of Basic Science, Thai Nguyen College of Agriculture and Forestry, Thai Nguyen University, Vietnam since 2014. She was born on July, 5, 1964. She got her master degree at Thai Nguyen University of Education in 2001, PhD degree at Hanoi Institute of Mathematics in 2007 with the Ph.D. thesis entitled The structure of some classes of Artinian module over commutative rings. She now focuses on teaching and research in Statistics and Commutative Algebra.

Dung has won awards Certificate of Merit granted by the Ministry of Education and Training for outstanding achievements in scientific research in the period of 2006-2010; Academic Research

Grants from ForMath Vietnam, Institute Fourier (Grenoble, France) in 2004, 2016 and 2019; Academic Research Grants from University of California (2011); Academic Research Grants from Vietnam Institute for Advanced Study in Mathematics (2013).

Dung also has experiences in the organization as an expert of Scientific Management and International Relation of Thai Nguyen University (from 2000 to 2007); Dean of Faculty of Basic Science of Thai Nguyen College of Agriculture and Forestry, Thai Nguyen University (from 2008 to 2019).

### Research and Publication

Nguyen Thi Dung's research field is Commutative Algebra. She is interested in the topics on structure of modules over commutative rings (Noetherian modules, Artinian modules) and irreducible decompositions of powers of edge ideals.

Dung is a manager of five projects under the grant funded by the Ministry of Education and Training. She is also a member of three projects supported by

Vietnam's National Foundation for Science and Technology Development

(NAFOSTED) under grant numbers: 101.101.04; 101.04-2017.14. and 101.04-2019.309.

Dung has published 16 research articles on international reputed journals of mathematics, among them there are articles on Journal of Algebra, Journal of Algebra and Its Applications, Journal of Mathematical Society of Japan, Communications in Algebra,... which attract the interests and citations of international researchers.

Because of the above achievement, *Dung has received* Certificate of Merit granted by the Ministry of Education and Training for outstanding achievements in scientific research in the period of 2006-2010;

**Short Biography**

Ta Thi Hoai An is Associate Professor of Institute of Mathematics, Vietnam Academy of Science and Technology since 2005. She was born in Vietnam on October 24, 1972. She got a Ph.D. degree in Vinh University, Vietnam in the year 2001 and Doctor of Science in Clermont-Ferrand, France in 2014. She spent three year as a postdoc in Academy Sinica, Taiwan from 2001-2004. She became associate professor in 2009 and now is head of Number Theory Department, Institute of Mathematics, Vietnam Academy of Science and Technology.

Ta Thi Hoai An has won the award for Vietnamese young Mathematicians in 2009 and The Humboldt Research Fellowship for experienced researcher in 2009. She has been PI for four projects from NAFOSTED (National Foundation for Science & Technology Development.).

She has been advisor of three Ph.D students and more than 20 master students.

### Research and Publication

She has published 32 publications in Mathematics Journals which are listed by <https://mathscinet.ams.org/mathscinet> Her list of Publications can be found at:

**Short Biography**

Nguyen Thi Thu Thuy is Associate Professor of Mathematics at Thai Nguyen University in 2016-2018 and at the Department of Applied Mathematics, School of Applied Mathematics and Informatics, Hanoi University of Science and Technology, Vietnam since 2018. She was born in Thai Nguyen, Vietnam on March 22, 1969. She got a Ph.D. degree in Mathematics in Vietnam in the year 2008 with the Ph.D. thesis entitled Regularization Methods for Ill-Posed Nonlinear Problems. She now

focuses on research and research supervision in Ill-Posed Problem, Variational Inequality Problem, and some related problems.

Assoc. Prof. Thuy had experience in the organization as a Head of the Department of Mathematics and Informatics, Thai Nguyen University in 2008-2018.

### Research and Publication

Associate Professor Thuy's research is on Numerical Optimization and Applications. Her mathematical works have been published in national and international journals and books. Her list of Publications can be found at:

**Short Biography**

Nguyen Thi Toan was a Lecturer at Department of Mathematics, Vinh University, Vietnam from June 2002 to July 2014. She is a Lecturer and also a Researcher at School of Applied Mathematics and Informatics, Hanoi University of Science and Technology, Vietnam since August 2014. She was born in Nghean Province on September 15, 1976. She got a Ph.D. degree in Mathematical Analysis in Vinh University, Vietnam in the year 2012 with the Ph.D. thesis entitled The Optimal Value Function and the Solution Map to Parametric Optimal Control Problems. She now focuses on

research and research senior member in Group of Optimality Conditions and Numerical Method for Multi-objective Optimal Control Problems and Their Applications for Electric Vehicles.

Doctor Toan has won fellowships in 2011 for Graduate Study and in 2012, 2013, 2015 for Post-doctoral from the Department of Applied Mathematics, The National Sun Yat-sen University, Kaohsiung, Taiwan. She also has won fellowships from the Vietnam Institute for Advanced Study in Mathematics, Hanoi, Vietnam for Junior Researcher in 2014 and Post-doctoral fellowships in 2017, 2018. Besides, She also has won awards of Vietnam Institute for Advanced Study in Mathematics for the best papers in high-ranking journals in 2014, 2015, 2016, 2018.

She is a supervisor of some PhD students. They have a team studying and working with optimal control problems. They have seminars on optimal control monthly. She used to be a head of a project which were funded by Vietnam Academy of Science and Technology as well as National Foundation for Science and Technology Development.

### Research and Publication

Her research area consists of Nonlinear and Variational Analysis, Optimization theory, and Optimal control governed by ODEs. She published 21 papers in prestigious journals with 11 of them are of SCIE-Q1.

Her list of Publications can be found at:

**Short Biography**

Le Hai Yen was born in Haiphong, Vietnam on August 17<sup>th</sup>, 1987. She studied Applied Mathematics in University of Toulouse 3 (France) and finished her PhD thesis entitled “A variational look at the rank function: Convex Relaxation; Generalized Subdifferentiation; Moreau’s Regularization approximation” in May, 2013. She has been a researcher in Department of Optimization and Control, Institute of Mathematics, Vietnam Academy of Science and Technology since November, 2013.

Her main research interests are theory and algorithms for convex and nonconvex optimization, numerical methods for equilibrium problems.

### Research and Publication

Dr Le Hai Yen has published 10 papers in national and international journals. Her list of

Publications can be found at:

**Short Biography**

I was born in Thanh Hoa Province on July 13, 1985. I am maths lecturer at Department of mathematics, Electric Power University from 2009 until now. I got a Ph.D. degree in Ha Noi University of Science and Technology in Viet Nam in the year 2013 with the Ph.D. thesis entitled *Global attractors for a class of degenerate parabolic equations*. I now focus on research in PDEs: Degenerate parabolic equations; Modified Navier-Stokes with delays; Parabolic equations in moving domain.

In 2010, i wrote a book name "Numerical method", published in our university. I have been joined in Nafosted researchs (National level): 2010-2012, 2013-2015, 2016-2018 and 2019-2021.

**Short Biography**

Dr. Pham Thuy Huong has been a lecturer at the Department of Mathematics and Statistics, Quy Nhon University, Vietnam, since 2006. She earned her PhD in 2016 at University of Kaiserslautern, Germany, with the Ph.D. thesis entitled "On Finite Determinacy of Hypersurface Singularities and Matrices in Arbitrary Characteristic" under the supervision of Prof. Gert-Martin Greuel.

Her research interest lies in Algebraic Geometry, in particular Singularity Theory.

**Short Biography**

Truong Xuan Duc Ha is a researcher at the Institute of Mathematics, Vietnam Academy of Science and Technology, Hanoi, Vietnam (since 1983) and Thanglong Institute of Mathematics and Applied Science, Thanglong University (since 2018). She got a master degree at the State Voronezh Pedagogical Institute (Russia) in 1979 and obtained the Ph.D. degree at this institute in 1983. Her fields of interest are Optimization, Nonsmooth Analysis, Variational Analysis, Differential Inclusions.

She got the Grant of Excelency from the AUPELF-UREP (now AUF) for a research stay in France in 1995 and the Georg Forster Fellowship from the Alexander von Humboldt Foundation, Germany in 2001.

She served as an associated Editor for the journal Optimization (2015-2018)

**Short Biography**

Dr. Truong Thi Thanh Phuong is currently Head of Division of Mathematical Economics which belongs to Department of Economics and Accounting, Quy Nhon University, Vietnam. She is also leader of the fifth research project in the IUC (Institutional University Cooperation) Programme proposed by Quy Nhon University which is among 5 Programmes in the world chosen by VLIRUOS in 2019 for the period of 10 years: 2022-2032. She was born on December 4, 1985. She got a Ph.D. degree in Applied Mathematics in France in the year 2015 with the Ph.D. thesis entitled “*Equilibrium in multi-criteria supply-demand networks*” under a Vietnamese government fellowship. She actively participated in a project on urban traffic networks with application to the Danang City bus system, financed by the Vietnam Research Foundation (NAFOSTED) for the period 2014-2016. She now focuses on teaching and doing research including Mathematics for Economists, Optimization, Scientific Research Methodology in Economics, Statistics.

Dr. Truong Thi Thanh Phuong has won Mathematical Research Award in the framework of National Programme for Development of Mathematics until 2020 from Vietnam Institute for Advanced Study in Mathematics in 2019; award for Achievements in Scientific Research from Vietnam Women’s Union in 2019; grant from Avignon University, France and LIAFV (Laboratoire International Associé Format Vietnam), France for a short visit at Avignon University, August 29-

September 15, 2016 and Ph.D. Grant from Ministry of Education and Training, Vietnam for the period 2011-2015.

### Research and Publication

Her research is on the Optimization and also on Mathematical Economics. Her mathematical works have been published in national and international journals and books.

### **Short Biography**

Dr. Le Thi Nhu Bich is a lecturer of the Department of Mathematics, Hue University, College of Education. She was born in Hue City, Vietnam, on April 29<sup>th</sup>, 1982. She got a PhD Degree in Physical and Mathematical Sciences at the Faculty of Mathematics and Mechanics, Saint-Peterburg State University, Russia with the PhD. thesis entitled Wavelets of non-zero heights. She now focuses on research in the field of wavelet theories and their applications, splines and local approximations and numerical methods.

She graduated with honors from Saint-Peterburg State University in 2007, won the Endeavour research Award (Australian Scholarships) in 2012. She won the award for the Vietnamese young scientific talents in 2014. She also received the certificates of merit from the president of Hue

University for having scientific research published in prestigious international scientific journals for the years.

Dr. Le Thi Nhu Bich also has experiences in the organization as a Deputy Head of the Department of Mathematics in 2015-2020.

### Research and Publication

Dr. Le Thi Nhu Bich's research is on the wavelet theories and its applications. Her works have been published in national and international journals.

Her list of Publications can be found at:

**Short Biography**

Yanhui Wang is an Associative Professor of Mathematics in the College of Mathematics and Systems Science, Shandong University of Science and Technology, China since 2019. She was born in Shanxi Province on July 20<sup>th</sup>, 1984. She got her Ph.D. degree in pure mathematics in the University of York, UK, in 2012 with the Ph. D. thesis entitled Beyond Regular Semigroups. She was awarded with a 2012 K M Stott Memorial prize for excellence in postgraduate research in the field of Algebra. She now focus on Semigroup Theory, Network Algebra and Bioinformatics.

Dr. Wang has won awards in research grants since 2013 from Shandong University of Science and Technology, from China Scholarship Council for the year 2014-2016, from National Natural Science Foundation of China for the year 2015-2018, from Shandong Natural Science Foundation for the year 2015-2017 and from Shandong University of Science and Technology for the year 2019-2023.

Dr. Wang also has experiences in the organization as a scientific research secretary of College of Mathematics and Systems Science, Shandong University of Science and Technology in 2014-2015, Deputy Head of the Department of Mathematics and Applied Mathematics since 2018.

### Research and Publication

Dr. Wang's research is on Semigroup Theory and also in Bioinformatics. Her mathematical works have been published in national and international journals and books.

**Short Biography**

Chunmei Gong is Associate Professor of Semigroup Theory at Department of Mathematics, Xi'an University of Architecture and Technology, China since 2011. She was born in Hebei Province on March 6, 1981. She got a Ph.D. degree in School of Mathematics and Statistics of Southwest University in Chongqing in the year 2011 with the Ph.D. thesis entitled Some Studies of G-Generalized completely regular semigroups. She now focuses on research and research supervision in Congruence theory of generalized regular semigroups.

Dr. Chunmei Gong has obtained two projects supported by National Natural Science Foundation of China for the year 2021-2023, 2013, a project supported by Shaanxi Natural Science Foundation. She also won the first prize in the lecture competition for young teachers and excellent postgraduate basic course teacher award of Xi'an University of Architecture and Technology in 2011.

Dr. Chunmei Gong also has experiences in the organization as a Assistant to the Dean of school of science of Xi'an University of Architecture and Technology in 2021, Associate Head of the

Department of Mathematics of Xi'an University of Architecture and Technology in 2019-2020, a member of the Commission for Shaanxi Mathematical Society in 2019-2020.

# Platform for a better connection of Asian-Oceanian Women in Mathematics

Motoko Kotani(Japan)  
2021. 07. 11

## Report of The first Asian-Oceanian CWM ambassadors meeting

June 25 – 26, 2021

**Similar organizations**

**Continental organization:**

- AWMA**(African Women in Mathematics Association),
- AWM** (Association for Women in Mathematics)
- EWM**(European Women in Mathematics)

**National or Regional organizations in Asia:**

- **CAWMA**(Central Asian Women in Mathematics Association)
- **IWM** (Indian Women in Mathematics),
- **KWMS** (Korean Women in Mathematical Society)
- **WoNiMS**(Women of Nepal in Mathematical Sciences)
- **PWM**(Pakistani Women in Mathematics)
- ...

From Bangladesh\_Prof. Dr. Salma...  
Thank you so much @ Prof Neela...

Participants (167)

Indonesia\_Bud... (Host, m)

AP A. Prabowo

**Case Study : EWM**

<https://www.europeanwomeninmaths.org>

- Founded in 1986
- 500+ members, 37 European countries

**Structures**

General Assembly (GA), Standing committee

- Convenor, Deputy Convenor, National Coordinators
- General meetings (every 2 yrs), summer schools, support of national/regional events, web-based mentoring scheme
- e-mail, newsletter, website, archive

# Maryam Mirzakhani

(1977–2017)

Pioneering mathematician and winner of the Fields Medal.

Maryam Mirzakhani was one of the greatest mathematicians of her generation. She made monumental contributions to the study of the dynamics and geometry of mathematical objects called Riemann surfaces. Just as impressive as her theorems was her ability to push a field in a new direction by always providing a fresh point of view. Her raw talent was rare, even among the most celebrated mathematicians, and she was known for having a taste for difficult problems.

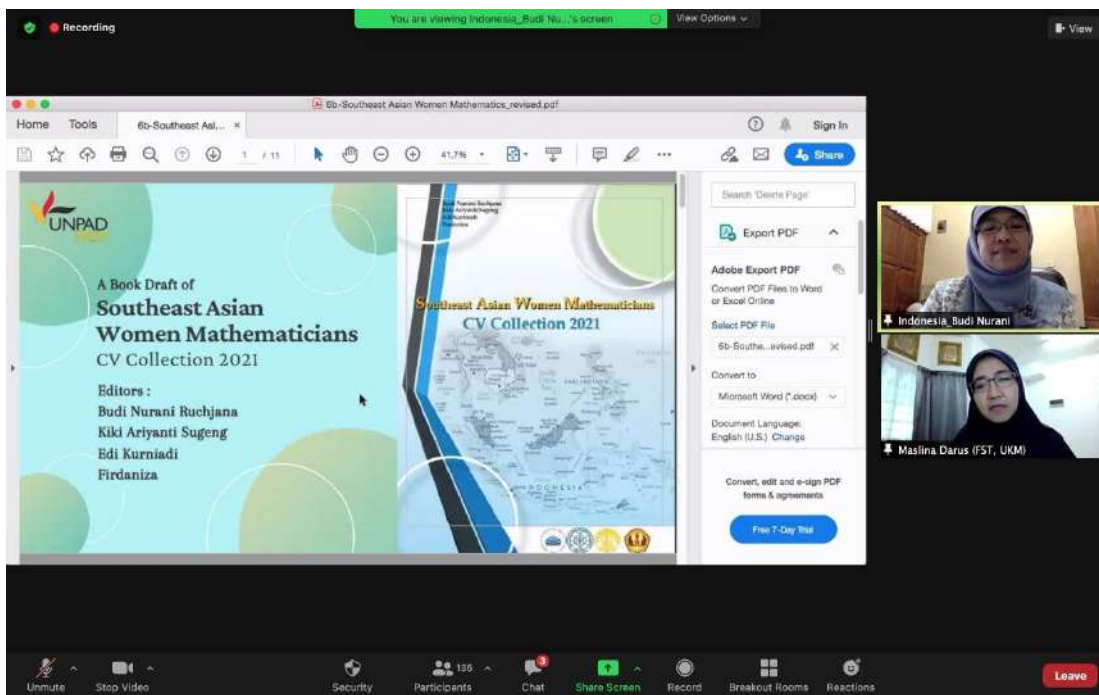

She became an icon without wanting to be. She was the first woman and first Iranian to win the Fields Medal, considered the highest honour in mathematics. For women, Mirzakhani was a role model, pursuing a successful career in a male-dominated field. For Iran, she represented the country's tradition of intellectualism. And for young scientists, she was a calming force that rose above the pressures of academia. She died

University of Chicago in Illinois, Mirzakhani used this method to prove, for such spaces, a version of a theorem about a group of symmetric geometric objects known as Lie groups. The theorem was proposed by Marina Ratner, another leading mathematician in the field who also died in July, aged 78. The proof — a monumental work written up in a 200-page paper (A. Eskin and M. Mirzakhani Preprint at <https://arxiv.org/abs/1302.3320>, 2013) — tied together disparate fields including geometry, topology and dynamical systems, and spawned a field of its own. It has been dubbed the 'magic wand' theorem because it enabled many previously intractable mathematical problems to be solved.

Despite the fame and attention she received, Mirzakhani remained humble and grounded, always avoiding the spotlight. She listened to the work of other mathematicians with excitement and asked forward-looking

The 2nd Southeast Asian Women Mathematicians Meeting (SEAWM<sub>2</sub>) 2021 is a realization of the participation of women mathematicians in developing mathematics and applications in various fields as well as the role of mathematics in human development in Southeast Asia. This book is one of the output of the second SEAWM<sub>2</sub> supported by the Committee Women in Mathematics International Mathematical Union (CWM IMU). The book is a collection of short curriculum vitae of women mathematicians in the Southeast Asian countries or ASEAN to highlight their contributions not only at the academic level (locally and internationally) but also their social services outreach.
