

## **Structure of CANP**

Each programme has, at its centre, a two-week workshop of about forty participants, half from the host country and half from regional neighbours'. It is primarily aimed at mathematics teacher educators, but each programme will also include mathematicians, researchers, policy-makers, and key teachers. Each workshop has associated activities such as public lectures, satellite workshops for students, or exhibitions reaching out to a broader audience.

The coordination of the workshop is undertaken by a group of eight (IPC) with equal participation by mathematicians and mathematics educators from the region and from the international IMU/ICMI/ICIAM community. The Local Programme Chair and the Programme Coordinator are members of the IPC. Each member of the IPC has to come from another country. The IPC and the Local Programme Chair are appointed by the ICMI EC.

After the appointment of the Local Programme Chair, the Programme Coordinator and the IPC, the Local Organising Committee (LOC) is appointed by the Local Programme Chair, the Programme Coordinator/ Manager (in agreement and consultation with the ICMI-EC).

The Local Organising Committee consists of the national/ country contact person (one each per participating country) and members of the host country. The LOC selects in together with the Programme Coordinator/ Manager the participants for each CANP programme.
